SH1925

**Creatistics Slim
Colouring Markers**
CS6000

**Natural
Beading Cord**
TH345

**Natural
Wooden Beads**
SH787

**TOP
TIP**

Draw using lighter
colours. Designs will
darken as they bake.

- 1 Colour in each animal design on the matte side of the shrink film, using coloured pencils or markers.
- 2 Carefully cut around your design and punch out the marked hole (this is where you'll attach cord later).
- 3 Pre-heat oven to 150°C.
- 4 Place each design on a lined tray (matte side up) and bake
- 5 Plastic will begin to shrink after 10 seconds, watch carefully! They will shrink to approximately 60% of the original size.
- 6 Remove from oven once plastic has flattened and set tray aside to cool completely before handling.
- 7 Thread beading cord through the shrink film decorations and add desired number of beads.
- 8 Firmly tie the cord onto the key chain to hold everything in place.
- 9 Done! The perfect key chain is ready.
