The Peg to Pen Programme

Learning to write letterforms requires the mastery of a series of different processes: motor, cognitive and perceptual. Motor processes involve learning to hold the writing implement in a comfortable and efficient way for writing; the cognitive ones lead to understanding the different lines that make up the letters; the perceptual ones help the child to create an internal representation of each letterform, prior to performing the right movement sequences to write them down. **The 'Peg to Pen' programme, through a stepped progression, provides experience in these three areas, which reflects the natural development of the child.**

Features of Guided Audio CD Collection:

- A lesson on CD to support guided reading. Expertly read to engage students with the book.
- Designed to engage one group of children in a meaningful book based activity.
- Students will benefit from an 'extra' lesson where they will be guided in an in-depth exploration of the text.
- Students will hear the book read aloud. The modelled reading will support the children in their own reading.
- The CDs DO NOT replace the guided reading lesson with the teacher but do provide an extra 'mini' lesson to support student growth in reading.

Teacher Support

Download from www.teaching.com.au

- Each CD title contains notes to assist the teacher in organisation and to provide an overview of the content of the lesson the group will be engaged in.
- In addition, each of the Guided Audio lessons is accompanied by a response to the reading in the form of a blackline master. The responses involve the students in writing with the aim of strengthening the reading/writing connection.

Teaching Points

The lessons, using selected LM Literacy titles, explicitly teach a range of text features including:

- letter-sound relationships
- text structure
- spelling
- reading strategies
- grammar
- punctuation
- visual literacy

Different aspects are in focus in the various titles.

Jolly Phonics

Jolly Phonics is a multi-sensory synthetic phonics programme that makes learning to read and write fun for all children. Research shows that the progress made by children using Jolly Phonics far exceeds that of children using a non-synthetic phonics approach. Reading and spelling ages of children who have used Jolly Phonics for one year are often at least a year above their chronological age. As these basic but essential phonics skills are taught so rapidly, the children are able to move on to more creative writing processes faster and also the higher-order reading comprehension strategies can be taught earlier.

“...children begin to understand key literacy...concepts and processes such as...letter-sound relationships, concepts of print and the ways texts are structured.”

Pre-Reading and Emergent Level titles:

- use bold type and additional spacing between words
- introduce and build phonemic awareness and phonic knowledge
- introduce upper and lowercase letters together to ensure automatic association of both forms
- use red highlighting to emphasise focus letters and punctuation
- feature exciting illustrations and photographs that give clues for word recognition and launch oral discussion and critical thinking
- ensure the child builds control of a bank of high-frequency words that can be instantly recalled

“Wushka levelled reading is an excellent cloud based program that is being enjoyed by my 5/6 composite class. The program is easy to set up and provided me as the class teacher excellent information on what and how the students are reading. The variety of text is impressive and the lesson plans and blackline masters associated with the text are great. Students in my class are asking to do reading groups so they can log on to Wushka.”

Lyn, Teacher Australian Primary School
