Impasto Acrylic Colour is built to last! Super strong structure, brilliant rich colours, high pigment loading, flexible, lightfast (non-fading), non-toxic, quick drying, waterproof and permanent intermixable colour. Whatever the artist shapes and renders on the canvas, this thick bold impasto acrylic WILL stay exactly as the artist intended. Most other educational acrylics are weak in structure so they change shape as they dry, resulting in a puddle with the look of melted ice cream. Real quality at an educational price.

Impasto Acrylic Colour is a professional grade artist acrylic colour that has been thickly formulated to offer a bold superior 3D shape retention for knife marks and brush strokes. It is loaded with high quality lightfast and waterproof pigments that offer very low shrinkage yet allows plenty of flexibility to ensure that every dynamic brush stroke, peak, valley retains the full expressive power intended by the artist. FAS Impasto Acrylic applied undiluted by brush or knife it gives a rich deep impasto finish that offers excellent shape retention without the need to use an impasto medium. The colours may easily be reduced with a medium or water to lower viscosities to allow the very subtlest of fine watercolour washes and glazes. Set of 14 colours to be used to mix and create new ones.

Taklon Brushes

- Smooth and easy to work with, Taklon brushes are available in several sizes for either fine details, or to cover large areas.
- Choose from either flat or round shape. Taklon is a type of brush that is softer and more absorbent.
- Exceptionally easy to clean, this economical grade of Taklon is a great choice as it withstands the caustic nature of solvents and acrylic paints better than animal hair for greater durability overall.

How to Make a Splatter Paint Print

Step 1: Use a piece of drawing paper (cover the table with newspaper or a mess free cloth).

Step 2: Place an item such as a pressed flower (stencils also work well) on the paper. Dip the bristles of the brush in watercolour or poster paint.

Step 3: Now rub the brush over the splatter screen to splatter the paint around the flower. Remove the flower.

The splattered paint looks like confetti outlining your picture. Let the paint dry. To create rainbow splatters, use different colours of paints.

Printmaking

Step 1: Produce the 'block' by simply pressing lines and areas into the special soft foam surface. Use a 4B pencil or a ballpoint pen. For larger areas, press into the foam with a popstick, spoon or a similar blunt object.

Step 2: Ink the surface with any kind of water-based printing ink or paint with a foam roller. Carefully lay a sheet of paper over the inked surface and rub all over with a hard roller, or with the back of a spoon or use the palm of your hand.

Step 3: Peel off the print slowly. Repeat the inking and rubbing for as many prints as desired. Experiment with different coloured inks and different coloured papers.

Step 4: To wash the block, simply hold under the tap or soak in a dish of water. The surface and lines may be carefully cleaned with a soft brush. The block will store easily for future use, when completely dry.

Screen Printing

Screen printing is one of the early methods of printing. It involves the passing of ink or any other printing medium through a mesh or 'screen' that has been stretched on a frame, to which a stencil has been applied. The stencil openings determine the image that will be imprinted.

Screen printing was a technique first used by the Chinese almost 2000 years ago.

The Japanese adopted the screen printing process and used woven silk. The use of silk is where screen printing got its alternative name – silk-screening or silk screen printing.
