LEGO® DUPLO® Bricks

Coding Express

A creative and intuitive train that introduces early coding concepts. It naturally sparks children's curiosity, creativity and desire to explore and learn. These LEGO® DUPLO® bricks encourage connections and exploration of early coding concepts, such as sequencing, looping and conditional coding. It develops problem-solving skills, critical thinking, collaboration, and social and emotional skills. Also available is a free optional app that provides four areas to explore: journeys, characters, music and maths. The different activities change the way the action bricks behave. The activities are open ended and children will practice a variety of skills relevant for early childhood development.

LEGS025

\$427.95

Key Learning Values

- Sequencing, looping and conditional coding
- Express ideas with digital elements
- Language and literacy
- Collaboration
- Problem-solving and critical thinking

Inspire children to explore early coding and critical 21st century skills through creative and collaborative play!

LEGO® DUPLO® Bricks STEAM Park

STEAM Park builds on the natural curiosity and desire to create, explore, and investigate the world of early science, technology, engineering, art and maths (STEAM) through creative play. Children can construct a STEAM Park full of dynamic moving rides, fun games and scenes using the special selection of LEGO® DUPLO® bricks. With every trip to STEAM Park, children grow their understanding of gears, motion, measurement and solving problems together in a fun and engaging way. Includes 295 LEGO DUPLO bricks, including gears, tracks, pulleys, boats and figures 8 double-sided building inspiration cards with 16 models to build.

LEGO DUPLO Bricks Tech Machines Set

Transform your children into expert builders! With the Tech Machines set in your classroom, you'll help children develop their fine motor and problem solving skills while simultaneously unleashing their creativity as they construct classic machines.

LEG5002

\$429.95

Key Learning Values

- Fine motor skills
- Problem-solving
- Engineering

"My five year olds love this set. Tech Machines is usually the most popular thing in the classroom particularly for those children who are looking for a challenge. They especially love the screwdrivers that you use to put the pieces together and the moving parts." – Kate Macauley, Early Childhood Educator

Top 5 Tips for using LEGO® Education in Early Childhood Settings – By Luke Touhill

1. Make LEGO® Education an everyday experience

When children have the opportunity to use LEGO® Education regularly they quickly learn how to use it effectively.

2. Build a collection of specialist pieces

Sometimes children's interest in a particular way or type of building means you need lots of specialist pieces. Consider some of the specialist equipment packs such as vehicle parts, roof tiles or windows, doors and people to supplement your general LEGO Education collection.

3. Is it easy to find the right piece?

Think about how children will search for the pieces they want – several containers are often better than one (especially if there are more than 3 or 4 children using the area) and wide shallow containers work better than smaller deeper ones. If you're really organised consider sorting the LEGO bricks into basic categories to make finding the right pieces even easier.

4. Encourage ideas

LEGO Education is about being creative but not everyone can be creative in a vacuum. Sometimes too much freedom is as limiting as not enough. Provide pictures and other stimulus to encourage children's ideas. Those who want them will use them, those who don't will build for themselves anyway. Pictures of real life objects, photos of children's previous models and simple instructions are all good ways to stimulate an initial idea.

5. It's not all about the building

Once children have built something they usually want to play with it. Is there room for this to happen? And what happens to the children's constructions once they've finished with them? Is there somewhere safe they can be kept to show parents and siblings at the end of the day or to return to later in the day? Can educators (or children) take a photo of the model for future reference or discussion?

"Children's first LEGO® brick creations may not look like much... but just ask a question and you'll usually find a powerful story and a whole set of complex ideas!"

– Luke Touhill

*"It's a flying car...
you can sit in the front or at the back or at the side so that you can go in whatever direction you want to. The propellers help it to fly and it has computers so that you don't get lost"*
– Will, age 4
