SERRATA
Cultivating the World of Science

Serrata Science Range Now Available Through MTA

Including
full range of
chemicals &
glassware

Serrata and MTA Partnership

We are delighted to welcome Serrata, one of Australia's largest suppliers of specialised science and education equipment, into the MTA family.

Since 1969, Serrata has been established as the premier science equipment supplier across Australasia, supplying the highest quality science education resources to primary and high schools.

FREE freight
on all orders over \$199

Conditions apply, see website for details.
Valid until 31st December 2020.
Promotional value excludes GST.
Offer excludes export & new projects.

Skin Burn and Normal Skin Model

The model is enlarged 6 times. The burn side of the model shows indication of 1st, 2nd, 3rd degree burns. The reverse side illustrates normal skin anatomy.

EISM0310

\$129.95

Human Liver with Gall Bladder Model

Excellent for introducing the structure and function of the liver and gall bladder. The display includes 4 lobes of the liver, gal bladder, bile ducts and portal vein. Half life size 17.8 x 12.7cm.

EISM0298

\$59.95

Human Heart Model

Model with 4 parts shows the auricles, ventricles, cardiac valves, large vessels, cardiac muscles and more. Size 14 x 13 x 28cm.

EISM0077

4 parts \$69.95

Human Skin Model - Enlarged 70 Times

Model depicts three layers of the skin, hair follicles, sebaceous and sweat glands, receptors, nerves and vessels. Mounted on 33 x 23 x 5cm.

EISM0088

\$69.95

Neuron Model

Enlarged 2500 times, the model shows electron microscopic structure with separate modulated nerve fibre. Size 42 x 30 x 13cm.

EISM101B

\$79.95

Prehistoric Man Skull Model

Set consists of prehistoric skulls such as Afarensis cranium, Africanus cranium, Habilis cranium, Erectus cranium, Neanderthalensis cranium and Steinheim.

EISM0127PMS

Set of 6 \$499.95

Embryonic Fetal Development

Set of nine individual models show the stages of human development. The set includes display of embryo, uterus, fetus, placenta and umbilical cord.

EISM0122

Set of 9 \$299.95

Animal Cell Model

Enlarged 20,000 times, the model shows animal cell in great detail. Display includes nucleus, endoplasmatic reticulum, mitochondria, ribosomes, golgi apparatus and more.

EISM0002

\$179.95

Animal Cell Model on Base

This is a dimensional model with one side dissected to show complete internal structure. The model is mounted on a base. Size 33 x 25 x 7cm.

EISM0004A

\$79.95

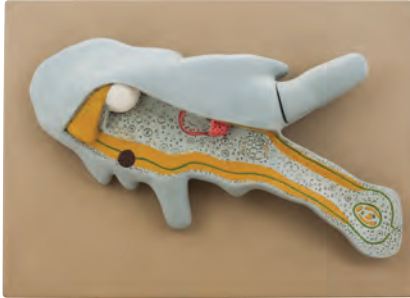

New for 2020

**Mosquito Life Cycle Model**

A set of models showing the life history of mosquito (culex) with different stages from its initial stage to its complete development. Size 60 x 45 x 8cm.

EISM0148

\$279.95

**Amoeba Model**

The model can be separated into two parts to show the amoeba proteus structure which is enlarged approximately 1000 times.

EISM0014

\$119.95

**Starfish Model**

This large star fish model is perfect for any classroom. The model depicts internal structures including digestive and reproductive organs. Size 45 x 40cm.

EISM0136

\$139.95

**Frog Dissection Model**

This detailed 3D rendering of a frog dissection is ideal for studying the structure and function of the basic organs in a frog. Size 58 X 40cm.

EISM0022AST

\$199.95

**Fish Dissection Model - Perch**

This model is ideal for studying the structure and functions in a perch fish. Anatomical parts such as skull, nostrils, fin, tongue, heart, kidney, stomach and more are colored and numbered with the key that is included. Size 49cm long.

EISM0018A

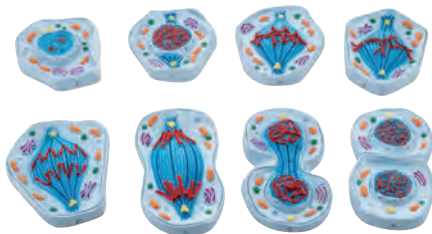

\$109.95

**Rat Dissection Model - Female**

Useful for students studying the structure of female rat anatomy showing all internal parts. Mounted on base. Size 61 x 30 x 5cm.

EISM0032

\$109.95

**Mitosis Models**

The brightly coloured models display each stage of mitosis in great detail. Chromosomes and centromeres are easily identifiable and explain each step of cell division.

EISM0008

Set of 8 \$129.95

**Meiosis Models**

Robust models illustrating the process of meiosis cell division. The chromosomes are painted to allow easy identification. Size 71 x 40 x 4cm.

EISM16082

Set of 10 \$179.95

**Plant and Animal Cell Comparison Models**

Use the animal and plant cell models to show similarities and differences and point out structures and organelle of each on one side. Size 15 x 12cm.

EISM0050

\$129.95

Plant Cell Model

This model shows the plant cell features such as ectoplast, endoplast, tonoplast, vacuoles, nuclear structure, plastids, mitochondria and more.

EISM0008A

\$69.95

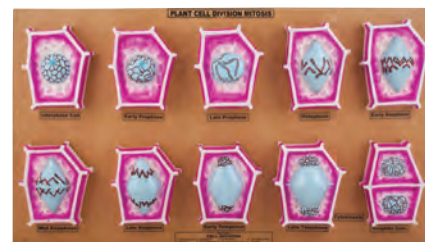

Plant Cell Model – Enlarged 10,000 times

This model shows the features of a simple plant cell which is magnified approximately 10,000 times. Organelles are raised and some are bisected to show internal structures. Size 29 x 20cm.

EISM0009

\$99.95

Plant Mitosis Model

The models shows all the stages of plant mitosis including a detailed look at interphase, prophase, metaphase, anaphase, and telophase, as well as the resulting daughter cells.

EISM0036

\$199.95

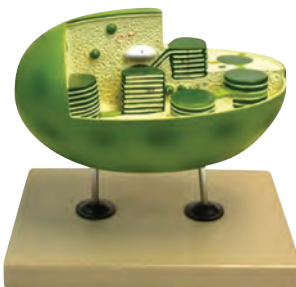

Germination Model

This germination model is enlarged to show beans. The model is mounted on a base and numbered with key card. Size 42 x 30 x 7cm.

EISM0047

\$149.95

Plant Chloroplast Model

This model is ideal for studying the structure and function of this key plant cell organelle. Key features such as ribosomes, DNA, starch granule and more are colored and numbered for comparison with the key that is included. Size 25 x 15cm.

EISM62AS

\$109.95

Photosynthesis Apparatus

For the measurement and collection of gas evolved by aquatic plants during photosynthesis. The gas evolved can be measured by the calibrated capillary tube and drawn off for analysis by the plastic syringes. Size 19 x 22cm.

EISIO228

\$24.95

Globe Model Earth – Cross Sectional

This model with 7 detachable parts shows the interiors of earth. When layers one by one are removed you can find the periphery of each layer.

EISBD007

7 pieces \$329.95

Underground Deposits Model

This model shows some mineral deposits and particularly oil fields, saltmines and a coal seam.

EISBD008

\$199.95

Tulgren Funnel

This Tulgren Funnel is supplied with coarse and fine mesh, glass collecting beaker and 3 core cable. Supplied without retort stand.

EISBI0502

\$99.95

New for 2020

Bio Viewer

This Bio Viewer is a light weight and easy to use micro slide viewer. It requires no power to operate and allows you to see super quality images, which the teacher can be assured that the entire class will see all of the key features quickly and easily.

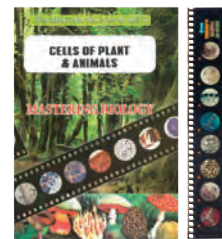

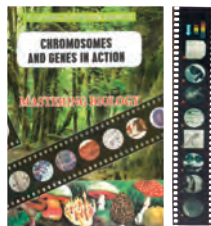

EIS0276BV

\$19.95

Bio Viewer Slide Sets

These Bio Viewer Slide Sets are a great cost effective alternative to microscope slides. Each kit has varied configurations of images from animals and humans to bacteria and viruses, plants and even fungi. The slide sets come with a protective cover for storage and to keep them dust free.

EISCRBAP

EISCRBAP25

Rubberized Cloth Apron 69 x 107 cm

This is a simple black rubberized cloth apron perfect for lab purposes. The apron measures 69 x 107cm.

EISCRBAP

Each \$12.95

EISCRBAP25

Pack of 25 \$279.95

Hand Crank Centrifuge

A very economic centrifuge that clamps right to any bench top. Apparatus has table clamp, hand crank, 4 buckets to hold tubes up to 15ml in capacity.

EIS266B

\$99.95

Mini Vortex Mixer

This vortex mixer offers variable speed control. Cup head and 3-inch accessory platform is included. It can be used for re-suspending liquids, mixing reagents, buffers, emulsions, ELISA assay and more.

OHAUVXMNAL

\$399.95

pH Meter with Temp and pH Probe

This is a reliable benchtop pH meter with product features such as built-in electrode arm and auto buffer to avoid errors. It offers a 2 point calibration with measurement resolution of 0.01pH.

OHAU2100F

\$649.95

Mini Centrifuge

This is a small but powerful mini centrifuge for simple and quick liquid separation. With an 8 place 1.5/2mL tube rotor, this centrifuge provides easy and safe operation for your everyday quick spin-down applications.

OHAUFC5306

\$369.95

Starter Pen Meter 0 - 1999 us/cm

This is a compact pen meter that provides fast and convenient measurement. Measurement range is 0-1999 us/cm.

OHAU20CB

\$179.95

Starter Pen Meter 0.00 - 19.99 us/cm

This is an economical pen meter that offers simple and fast operation. Measurement range is 0-19.99 ms/cm.

OHAU20CC

\$179.95

Starter Pen Meter 0.0 - 1000 Mg/L

This is a compact pen meter designed for fast, convenient electrochemistry measurement at your fingertips. Measurement range is 0-1000 mg/L.

OHAU20TB

\$179.95

New for 2020

**Analytical Balance – 120 x 0.0001g**

Designed for routine weighing applications, this balance offers accuracy and repeatability in essential weighing applications. The balance has a capacity of 120g with readability of 0.0001g. Internal calibration is included for PR124.

OHAUPR124 IC - 120 x 0.0001g \$1,699.95
OHAUPR124E 120 x 0.0001g \$1,599.95

**Analytical Balance – 220 x 0.0001g**

This balance delivers competitive performance at an economical price. The balance has a capacity of 220g with readability of 0.0001g. Internal calibration is included for PR224.

OHAUPR224 IC - 220 x 0.0001g \$1,699.95
OHAUPR224E 220 x 0.0001g \$1,599.95

**Analytical Balance – 420 x 0.001g**

The Pioneer 423/E offers uncomplicated performance for all basic weighing needs. The balance has a capacity of 420g with readability of 0.001g.

OHAUPR423E \$999.95

**Analytical Balance – 520 x 0.001g**

The balance has a capacity of 520g with readability of 0.001g. Featuring RS232 connectivity for easy communication, and a backlit display and a simple interface for uncomplicated operation, the balance is perfectly designed for your workplace.

OHAUPR523E \$1,199.95

**Analytical Balance – 1600 x 0.01g**

This balance offers accuracy and repeatability in essential weighing applications in laboratory, industrial and education settings. The balance has a capacity of 1600g with readability of 0.01g.

OHAUPR1602E \$949.95

**Analytical Balance – 2200 x 0.01g**

This balance has a capacity of 2200g with readability of 0.01g. It is designed for routine weighing applications in your workplace.

OHAUPR2202E \$949.95

**Analytical Balance – 4200 x 0.01g**

This balance has a capacity of 4200g with readability of 0.01g. It offers accuracy and repeatability in essential weighing applications in laboratory, industrial and education settings.

OHAUPR4202E \$999.95

**Analytical Balance - 4200 x 0.1g**

This balance has a capacity of 4200g with readability of 0.1g. Features include RS232 connectivity for easy communication, and a backlit display and a simple interface for uncomplicated operation.

OHAUPR4201E \$849.95

**Analytical Balance – 6200 x 0.1g**

This balance has a capacity of 6200g with readability of 0.1g. It delivers competitive performance at an economical price.

OHAUPR6201E \$899.95

Oil Free Vacuum Pump

Low voltage DC operated system supplied with an adaptor working range from 100V to 240V suitable for any type of power supply around the world.

LION1052060

\$199.95

Large Inertia Demo

Demonstrate inertia in a simple experiment. Pulling and releasing the trigger causes the square sheet to slide out from under the ball, dropping the ball in the receptacle by inertia.

EISLID17

\$99.95

Newton Fan

Use the fan to aid in demonstrating Newton's Laws. The fan can be used in cart experiments or other experiments where the use of a constant external force is needed.

EISNTNFN

\$59.95

Speaker Box on Stand

Adjustable height allows this speaker box to work at a suitable position. It's working range is from 60 to 16000Hz. Size 10 x 10 x 23cm.

LION1088010

\$24.95

Bottle Rocket Launching Platform

Introduce students in the most fun way to rocket science and concepts involving Newton's laws. Launch water powered rockets over 100 ft in the air.

EIS1120143

\$119.95

Crooke's Radiometer on Plastic Base

This Crooke's Radiometer allows you to detect or measure radiant energy. Comes with a evacuated glass bulb which contains a rotor that spins once radiant energy is detected. Size 17.8 x 7cm.

EIS0418A

\$19.95

Simple Electric Motor Kit

This is a simple motor kit designed to explain how electricity and magnetism behave.

LION1088012

Pack of 10 \$9.95

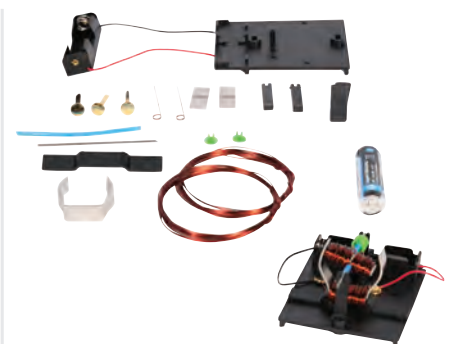

Build a Motor Kit

Use the components of this kit to build a simple motor that can run for hours. The kit includes copper coil, AAA battery and a magnet.

LION1088015

Pack of 10 \$6.95

DC Motor Kits

This kit contains all you need to build a working DC motor and learn its elements from the inside out. Kit includes 2 copper wire coils, plastic base, field poles, armature core, brushes and fasteners.

LION1088014

Pack of 10 \$5.95

New for 2020

**Meld's Apparatus**

This is designed to show the effect of vibration in a stretched cord. Investigate the relationship among frequency, tension, and density mounted in a clamp.

LION1088013

\$49.95

**Economy Air Table**

With its air source built in, the table provides a frictionless, two dimensional surface for the study of velocity, acceleration, Newton's Laws, centre of mass, moment of inertia and more.

LION1088024

\$449.95

**Air Source - Dual Output**

This is a variable speed air source designed with noise-reduction technology. It is powerful enough to float fully-loaded gliders or pucks.

LION1088022

\$249.95

**Motor Generator**

This is a great product for basic training in electricity. It includes 2-pole armature, field coil pair, permanent magnet pair, 4 brushes, commutator and slip rings. Size 9.5 X 9 X 11cm.

LION1088026

\$24.95

**Water Sampler**

This unbreakable plastic water sampler is ideal for schools. It has an impact-resistant grey PVC body with soft rubber seals which hold 1.75 litres.

LION1088029

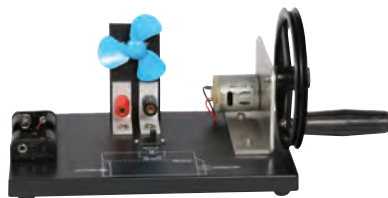

\$36.95

**AC DC Motor Generator Demo**

This apparatus allows students to easily compare and contrast an AC generator and a DC generator.

EIS1245N8

\$89.95

**Dynamo with Electric Motor Unit**

This motor unit shows the principle of transfer of mechanical energy to electrical power. Size 27 x 12 x 12.5cm.

LION1088011

\$24.95

**Hooke's Law Apparatus without Weights**

This complete apparatus has a 15cm adjustable scale. The adjustable scale helps to prevent parallax error.

EIS0323A

\$39.95

G Free Fall with Electronic Stop Clock

This electronic stop clock has a 4 digit LED display and it provides the option to record time in milliseconds or seconds to 0.001s. Size 25 x 22.5 x 12.9cm.

LION1057317

\$299.95

Desktop Pulley - Ball Bearing Adjustable

This apparatus is great for experiments that require pulley at different heights. The pulley rotates 360 degrees and can be adjusted. It includes glass-filled nylon molded clamp and pulley. Size 19 x 11 x 4cm.

LION1035136

\$12.95

Solar Cell Demo Kit

This is a simple way to teach student how solar energy can be transferred to electrical power to drive motor, generate sound, light and the LED. Size 20 x 12.5 x 6cm.

LION2874100

\$24.95

Solar Cell Array with Multiple Voltage Output

The solar cell array consists of four single units (1.5V) each; which can be used individually or combined into series 1.5, 3.0, 4.5, 6 V DC. Size 20 x 18 x 25cm.

LION2874101

\$39.95

Solar Heating Unit

This apparatus allows you to heat water with solar energy. It consists of a large black painted plate (55 x 35 cm) and its many loops ensures that water heats up quickly. Size 61 x 64 x 34cm.

LION2874400

\$229.95

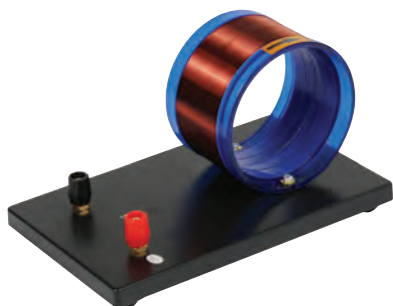

Volta's Hailstorm

The tiny balls inside the transparent cage bounce wildly near a Van De Graaf generator due to the electrostatic charge. The apparatus can also display Coulomb's Law. Size 9.5 x 9.5 x 30cm.

LION1035333

\$24.95

Air Core Solenoid - 500 T

The air core solenoid with multi selectable turns, shows students that the magnet field tension changes when the turn of the coils differ. Size 20 x 12.5 x 11cm.

LION1050260

\$22.95

Shaker Sieve

This is great for soil and general particle sifting. Size 61 x 42 x 12.5cm.

LION1088025

\$59.95

Digital Newton Meter

The value of force can be measured more easily than conventional spring scales with the digital newton meter. Since it supports both push and pull, it can be used for various experiments.

TECH336101

\$59.95

New for 2020

**Digital Ammeter LCD $\pm 0-20A \times 10mA$**

Measures from 0.00 (1 milliamp) to 1.999 amps. It is powered by a standard 9V battery, Power turns off automatically after 20 minutes to protect against forgetful users.

IEC2122001

\$79.95

**Digital Ammeter LCD $\pm 0-2A \times 1mA$**

Measures from 0.00 (10 milliamp) to 19.99 amps. It is powered by a standard 9V battery, Power turns off automatically after 20 minutes.

IEC2122010

\$79.95

**Digital Voltmeter LCD $\pm 0-20V \times 10mV$**

Measures from 0.00 to 19.99 volts DC. Power turns off automatically after 20 minutes. It is powered by a standard 9V battery.

IEC2123001

\$79.95

**Digital Voltmeter LCD $\pm 0-20V \times 10mV$**

Measures from 0.000 to 1.999 volts DC. Power turns off automatically after 20 minutes and one touch of the only button restores the display.

IEC2123010

\$79.95

**Resistance Set - 7 in 1 Housing**

This high power resistor set is a unique and useful set of 7 resistors that is designed to work hard. The housing is ventilated at both ends to dissipate heat. The accuracy of these resistors is within 5% of the marked value.

IEC2710001

\$99.95

**Power Supply 0-25V AC DC 6-10A with Digital Voltmeter**

This is a robust and compact unit suitable for most laboratory experiments where large current and smooth adjustment from 0 to 25 volts of both AC and DC is required.

IEC2641002

\$699.95

**Electricity Kit in Aluminium Case - Signal and Motor Generator Included**

Designed to last for many years, this is an excellent kit to teach students all about electrical theory. It is contained in a strong aluminium carry case and the whole system is of high quality.

IEC1763010

\$1,499.95

**Cloud Chamber Cold Plate**

This safe and affordable Cloud Chamber uses a specially designed cold plate that is capable of retaining a low temperature. Ethanol and hot water are used to observe tracks of ionizing radiation.

TECH003501

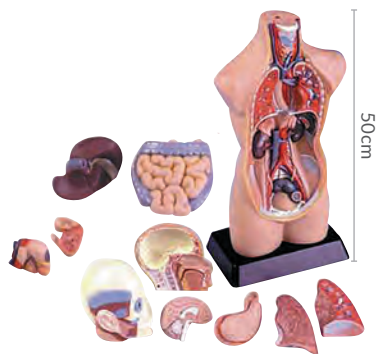

\$339.95

**Radioactive Source Simulator Electronic**

This instrument simulates a geiger counter but without using actual radioactive sources. The concept of half-life is easily demonstrated and the random nature of the particle counts can be shown.

IEC2668001

\$229.95

Anatomy Human Torso – 50cm

This model shows students exactly where all organs go. Students will develop an understanding of anatomy in a fun way with these 11 detachable plastic organs. A great resource for Science curriculum activities. Includes full colour instructions. Size: 50cm high.

FD05001

11 pieces \$136.95

~~\$199.80~~
\$179⁹⁵
 Save \$19.85

Human Anatomy

Children will have a better understanding of anatomy as they examine this model. The model comes with 6 detachable parts, a torso and a base. Supplied with a fully illustrated colour instruction manual. Size: 27cm high.

FD0278-4K

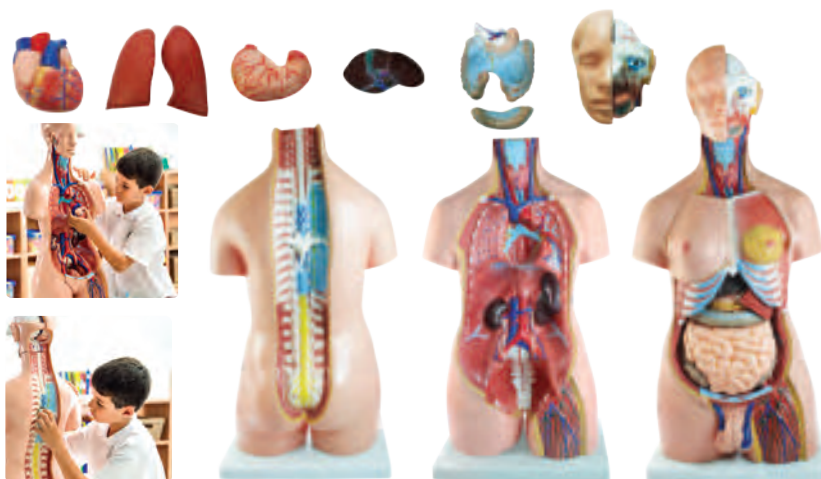

Set of 4 \$179.95

Life-Size Unisex Torso

This outstanding torso features an exposed spine with removable vertebra and spinal cord segments, a female breast plate and interchangeable male and female genitalia. The female organs include a foetus in the womb. Dissected into 23 parts: torso, female breast plate, head, eyeball, brain, vertebra spinal nerves, lung (2 parts), heart (2 parts), liver, kidney, stomach (2 parts), intestines (4 parts), male genitalia (2 parts), female genitalia with foetus (3 parts). Made of PVC plastic. Mounted on a plastic base. Size: 85cm high.

NK0306

23 parts \$399.95

Life-Size Unisex Torso

This outstanding human torso is a must have in every classroom! Enhance your anatomy lessons and engage your students with this excellent torso model. The model comes with 27 removable parts, so students can study the human body and its organs and location of these organs in great detail. Size: 87 x 33 x 26 cm.

SER1313024

27 parts \$649.95

Male Musculature Model

The model comes with 27 removable parts, so students can study the human body and its organs and location of these organs in great detail. Height: 85cm

SER1313060

27 parts \$799.95

Genderless Open-Back Torso

This model is an excellent resource to simulate an adult human body. This model demonstrates digestive, respiratory, and urinary systems. Open head (removable) & back of the model shows central nervous system. Size 87 x 33 x 26cm.

SER1313051

17 parts \$499.95

Human Anatomy

Miniature Superficial Musculature Model

This mini model accurately depicts the topography of the human superficial musculature. Great for classroom display. This model is a great visual tool for students to learn about the body's muscular system. Size: 40cm

SER1066079 40cm \$119.95

Genderless Torso – 50cm

This model which comes with twelve removeable parts, is perfect for student to learn about basic anatomy. The parts include left & right head, brain, left & right lung, heart, liver, stomach, intestine with pancreas. Size: 52x18x18cm

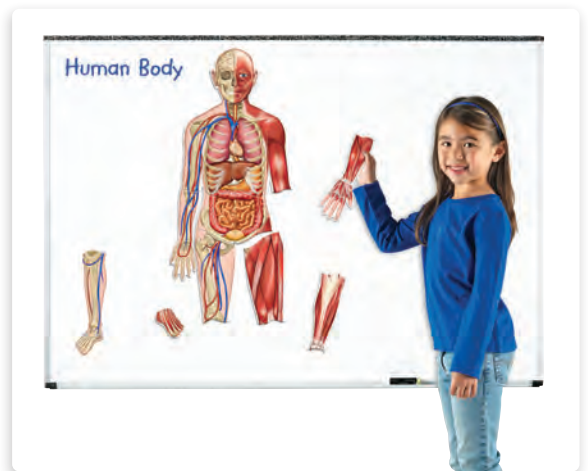

SER1313005 12 parts \$129.95

Double-Sided Magnetic Human Body

Twice the learning, skeletal system on one side and major organs and muscle groups on the other! Realistically detailed pieces combine to create a body over 90cm high.

LER6044 17 pieces \$47.95

Half-Size Circulatory System Model

This model displays all the main arteries & veins with heart & lungs. This model is half the natural size and is a great visual tool. Size: 90 x 30 x 8cm.

SER1066023 18 parts \$269.95

Human Eye Model – 6x Enlarged

This human eye model which can be dissected into 6 parts shows blood supply, origins of the muscles, various membranes, lens and vitreous humour. Size: 12 x 12 x 19cm

NK0401

\$65.95

Detailed Human Eye Model – 6x Enlarged

This highly detailed eye can be dissected into 6 parts to show internal structures of the eye. The cornea, iris, lens and vitreous body can each be removed. Model: 6x life size

SER1313028

6 parts \$80.95

Skull with Brain Model

This is a natural sized skull model with 8 part brain model inside.

SER1313084 8 parts \$149.95

**Dissectable Didactic Skull Model**

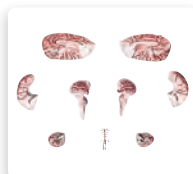

This skull model with 22 parts is visually an effective way to study the struture of the skull. Natural Size.

SER1313079 22 parts \$169.95

**Brain with Arteries Model - 8 Parts**

This model shows the brain arteries as well as the removable basilar artery, temporal with occipital lobes, half of brain stem, half of cerebellum, on removable base. Size: 18 x 14 x 14cm

EIS0019 8 parts \$184.95

**Brain with Arteries Model - 9 Parts**

Teaching students about the functions of the human brain is easy. This model demonstrates left and right cerebrum, cerebellum & stem & basilar artery.

SER1313002 9 parts \$149.95

**Life-Size Head with Brain Model**

This head with brain model is perfect for a deeper understanding of how the parts of the brain work together. The model which is of a natural size comes with 4 parts that are removable.

SER1313049 4 parts \$180.95

**Thalamus Model - 5x Enlarged**

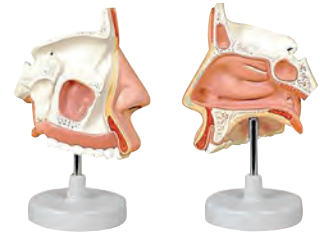

This model can be dissected in 5 parts; various functional areas are delineated with separate colours, thus providing a clear distinction between the different nuclei of each structure. 5x Life Size.

SER1066072 5 parts \$149.95

**Life-Size Regional Brain Model**

Life-size brain with distinct colour coding which shows the various lobes, cortex cerebellum and brain stem.

SER1066110 2 parts \$119.95

**Life-Size Nasal Cavity Model**

This life size model shows a section of the nasal cavity.

SER1066033 \$99.95

Cross Section Models

This kit includes one of each of the cross-section models: human brain (LER1903), tooth (LER1904), eye (LER1907) and heart (LER1902).

LER1903K Set of 4 \$132.95

**Soft Foam Cross-Section Human Brain Model**

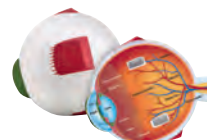

Features frontal, occipital and temporal lobe, cerebrum, medulla oblongata, thalamus, cerebellum, hypothalamus and more. Size: 12.5cm.

LER1903 \$29.95

**Cross Section of Tooth Model**

Features enamel, dentin, pulp, cementum, nerves, blood vessels, root and crown. Size: 12.5cm.

LER1904 \$29.95

**Cross Section of Eye Model**

Features cornea, iris, pupil, retina, lens, optic nerve, vitreous humor, sclera, choroid, macula, ciliary muscle, optic disc and zonules. Size: 12.5cm.

LER1907 \$39.95

Cross Section of Human Heart

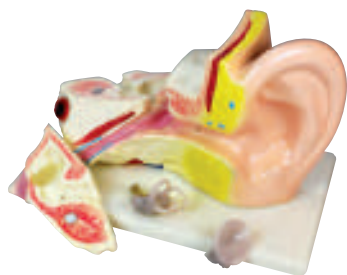

Features aorta, pulmonary artery, left & right atrium, inferior & superior vena cava tricuspid valve, pulmonary valve, aortic valve, mitral valve and left ventricle. Size: 12.5cm.

LER1902 \$39.95

Human Anatomy

**Human Ear Model**

View the fascinating internal parts of the ear. Three times enlarged. Ossicles and labyrinth can be removed. 30 x 16 x 9cm.

NK50542

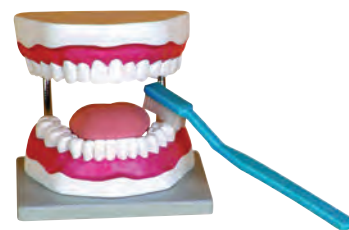

\$37.95

**Earl Model
- 3x Enlarged**

This ear model is 3 times enlarged with three parts (external & middle ear). It is made of high quality PVC with the hammer, anvil, stirrup, labyrinth which are removeable.

SER1066009

3parts \$89.95

**Teeth Care with
Large Tooth Brush Model**

Excellent model for demonstrating dental hygiene as well as tooth care. Size: 15x16x22cm

SER1313022

\$39.95

**Giant Teeth Demo Model**

This Giant Teeth model is 2x the actual size. It can be manipulated in a hand-puppet fashion and comes complete with toothbrush.

NK50544

\$49.95

**Tooth Decay Model - 3x Enlarged**

This model displays tooth decay. 3 times enlarged and contains 7 parts

SER1313071

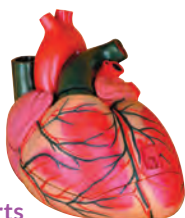

7 parts \$79.95

**Heart & Lungs Model
- 7 Parts**

Model shows heart, larynx, and lungs. The various parts of the model can be separated. Wind pipe, artery, vein, venacava, aorta, esophagus, and diaphragm are also shown in great detail. Size: 30 x 10 x 10cm.

EIS0068B

7 parts \$149.95

**Heart Model
- 3x Enlarged - 3 Parts**

This model of human heart is three times enlarged and can be separated to 3 pieces. Students can physically interact with the model and gain a more concrete understanding about this important organ.

SER1313011

3 pieces \$169.95

**Heart Model
- 2x Enlarged - 4 Parts**

This model which is 2 times enlarged provides an illustration of the anatomy of the human heart. The model can be separated into 4 parts.

SER1313097

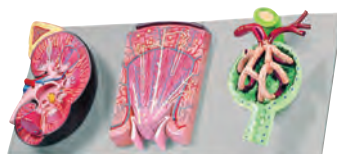

4 parts \$159.95

**Respiratory
System Model**

This model is composed of 7 parts showing the larynx, the lungs and a 2-part heart. Weight 13 kg approximately.

SER1313019

\$149.95

Further information can be found on www.teaching.com.au

**Kidney Section Model
- Nephron Renal Corpuscle**

View the fascinating internal parts of the kidney. Three times enlarged. The kidney shows the various glands with renal nephron and renal corpuscle. Size: 70 x 29 x 12cm.

SER1066155

\$279.95

**Lung Demonstrator Simple**

Lung Demonstrator Demo kit consists of transparent plastic container, Y tube (trachea), balloons (lungs), rubber sheet (diaphragm) and instruction sheet.

SER1014918

\$41.95

**Kidney with Adrenal
Gland Model - 3x Enlarged**

The model displays the various kidney parts in detail. Further information can be found on www.teaching.com.au

SER1313012

\$99.95

Digestive System Model

Teach your students all about the digestive path of food. Excellent tool to show the various parts which includes esophagus, liver, pancreas, spleen and gall bladder.

SER1313003

\$189.95

Kidney with Adrenal Gland Model – 2 Parts

A life-size model of the kidney with the adrenal gland. It can be divided into two parts to show internal structures. Mounted on base with stand.

SER1313044

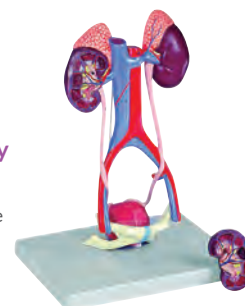

2 parts \$49.95

Life-Size Urinary System Model

This model shows the various parts of the urinary system in detail; including the cortex, medulla, pelvis, urethra and ejaculatory ducts. Size: 24x18x36cm.

SER1066042

5 parts \$79.95

Female Pelvi Skeleton Model

This is a great tool to compare male and female anatomy.

SER1066082

\$39.95

Spermatogenesis Model

This model shows the process by which haploid spermatozoa develop from germ cells in the seminiferous tubules of the testis.

SER1313018

\$139.95

Life-Size Male Reproductive Organs Model

This model displays male genital organs.

SER1313038

\$79.95

Male Bladder with Prostate Model

This two-part model, enlarged 3 times, shows the male urinary bladder with the prostate gland surrounding the urethra. The model can be separated to expose both internal and external structures.

SER1066123

2 parts \$139.95

Testicle Model with Cross Section

This three dimensional model provides an excellent cross sectional view of the testicle.

SER1066124

\$79.95

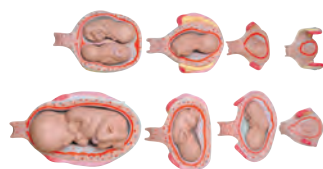

Female Reproductive Organs Model

This model which is 1.5 x life size, shows a dissected view of the vagina, cervix, uterus and ovary with follicles at various stages of development.

SER1066029

\$59.95

Fetal Development Model

This model which is a set of 8 shows the various stages of fetal development. This is an excellent visual tool that works perfectly in any classroom.

SER1313008 Set of 8 \$249.95

Life-Size Hand Muscles Model

This life-size model is composed of 4 parts. The underlying network of muscles, tendons, vessels and nerves are shown in great detail.

SER1066038 4 parts \$129.95

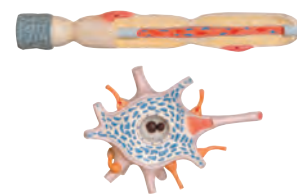

Blood Cell Model

This model shows the red blood cell and its various parts including lymphocyte and monocyte. The model is 2000x enlarged and made from high quality PVC.

SER1313001

\$179.95

Neuron Model – 2500x Enlarged

This 2 part model of a neuron which is enlarged 2500 times shows electron microscopic structure and nerve fibre.

SER1313058 2 parts \$149.95

EXCLUSIVE

Human Skeleton With Stand

This close to life size model is a great resource for anatomical study. The skeleton is 160cm high.

FD160

160cm \$414.95

Articulated Skeleton Model

This model of the human skeleton displays all the basic features and comes with stand.

SER1052318

85cm \$99.95

Articulated Skeleton Model - Wheeled

This detailed model of a skeleton comes with stand and all basic features. Height: 170cm

SER1313023

170cm \$399.95

Disarticulated Skeleton Model

This skeleton set provides a great amount of detail for knowledge-hungry students. It can be used for demonstration purposes as well as to explore the bones and structures.

SER1066010

\$179.95

Bones, Muscles & Ligaments Skeleton Model

The skeleton shows bones, muscles and ligament insertions. Coloured for easy viewing of these features. Supplied with wheeled stand. Height: 160cm.

SER1313031

160cm \$479.95

Two-Part Skull Model

This human skull model comes in two parts, the lower jaw is removable. It's made of fibre material and comes in a natural colour. An ideal classroom resource for demonstrations! Size: 24 x 16 x 17cm approx.

EIS0126

\$64.95

Magnetic Disarticulated Skeleton Set

Piece together a human skeleton on your whiteboard! The textures features in this set feel like real bones. Skeleton measures almost 90cm high when assembled.

EN1760

\$109.95

Skeleton Floor Puzzle

Kids learn all the major bones as they assemble this unique skeleton soft foam puzzle.

LER3332

15 pieces \$64.95

Human Anatomy

Hanging Skeleton Model

This skeleton which shows all the basic features, is fully articulated. The top of the skull is removable allowing the examination of the internal skull structures.

SER1313108

85cm

\$399.95

Half-Size Skeleton Model – Wheeled

Anatomically correct skeleton. Large size allows easy identification of individual bones, joints and major structures in the human body. Has 360° movement in joints and full movement in its jaw. 85cm.

NK0003

85cm

\$124.95

Human Skeleton Anatomy Model

Explore how the bones support the body, relate to the circulatory system and protect organ systems while constructing a realistic looking human skeleton model.

LER3337

85cm

\$39.95

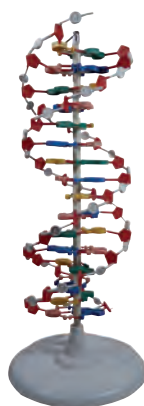

Orbit DNA Kit – Small

This simple model of DNA shows six base pairs and can be used to model strands of RNA. Each base (guanine, cytosine, thymine, adenine and uracil) is shown by a different colour with the sugar rings, phosphate groups and hydrogen bonds in black, red and white respectively. Assembled height: 24cm.

SER1001238

\$19.95

MolecModels3D – DNA Molecular Model 22 Layer Kit

This 22-layer model is designed for self-assembly, with the double helix structure becoming self-evident as the model is constructed. Components include colour coded bases (G,C,A And T), deoxyribose and phosphate groups, as well as a display stand.

SER1021368

\$120.95

MolecModels3D – DNA 10 Layer Kit

This model is assembled using Adenine-Thymine and Guanine-Cytosine base pairs. Arranged alternatively. It is supported on a transparent plastic platform and held to a metal rod.

SER1021021

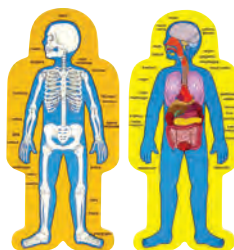

\$249.95

DNA Model Kit

It is easy to construct this three dimensional model of DNA. Emphasizing the base pair sequence and function of DNA, the sturdy, colorful bases snap together in the correct sequence, and the pairs attach to a center rod representing hydrogen bonds. Once completed, model can be rotated on its sturdy base. Includes enough materials to construct one models. Size 13 x 13 x 45 cm

SER1172501

\$64.95

Child-Size Human Body

This child-size human body is a helpful resource when locating, identifying and understanding relationships between organs and bones. It contains a set of two full-colour, child-size figures showing the body system and skeleton all clearly marked.

CD3215

\$44.95

My Body in Action

Take your students on a tour of the human body! 10 beautifully illustrated animation cards depict the intricate details of body systems. Move the cards from side to side to observe the processes of various organs, from light entering the eye to blood flowing through the arteries, veins and heart valves! Includes: 10 cards (22 x 28 cm) and guide.

RE9270

Set of 10 \$29.95

Animal X-Rays & Picture Cards

Study similarities and differences between animals. Examine real x-rays printed on clear, heavy-duty plastic, showing mammals, reptiles, fish, amphibians and birds. Includes: 14 x-rays and 14 matching picture cards, up to 10 x 25cm and teacher guide.

RE5910

Set of 28 \$39.95

Shell X-Rays & Picture Cards

Examine real x-rays of a wide range of seashells, coral and animals to see their inner structures. The picture cards show their outside structures, colour and design. Match up the x-rays to the printed card and lay the x-ray over the card to see how the inside and outside go together. The cards measure 10 x 15cm and the x-rays vary in size. Teacher's guide and activities are included. Set of 36 cards.

RE5913

36 pieces \$46.95

Giant Magnetic Life Cycles

These giant magnets teach students in great detail about life cycles of a frog, plant and butterfly on a whiteboard, which will interest all students in the classroom! A great resource for cross-curriculum activities. The activity guide includes detailed information about each step. The largest magnet (butterfly) is approximately 23 x 18cm. Available in set of 3 or separately. Kit contains: 1 x LER6041, 1 x LER6043 and 1 x LER6045.

Animals, Insects & Birds

**GeoSafari Ant Factory**

It's easy for students to set up and maintain their own ant habitats! Ant Factory, measuring 23(H) x 38(W)cm, provides great lessons in responsibility, basic ecology, and much more! Each habitat includes 24-page guide book with ant care and colony observation hints, water dropper and canal starting tool. Just find some ants in the backyard (not included) and get started!

EN5145

\$74.95

**Fish Model**

Teach students all about the anatomy of a fish and the function of each part with this model.

SER1066046

5 parts \$225.95

**Minibeasts Habitat Discovery Set**

Get your hands (imaginarily) dirty with this wonderfully creative Minibeasts set. Comprising of 6 interactive "rooms", learn about different Minibeasts in their environment. Made up of caterpillars, beetles, spiders and worms to name a few, children can move the pieces about nature's homes, with this high quality wooden set. Measuring 45x30x17cm, it is recommended for children aged 2+ years.

FR462

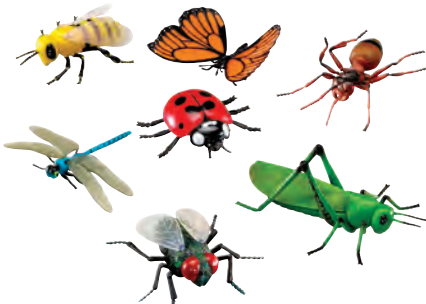

15 pieces \$81.95

**Chicken Life Cycle Set**

Crack open this set of 21 eggs and see the day-by-day development of a chick. The first 20 eggs show a detailed realistic illustration of the chick, a plastic 3D chick is inside the final egg. The eggs and storage tray are numbered for self-checking and easy storage. The durable plastic eggs measure 7cm long. The tray is 38(L) x 21.5(H)cm. Activity guide included.

LER2733

\$64.95

**Jumbo Insects**

This jumbo insects kit is realistically detailed and comes with an activity guide which includes facts about each animal. Students love playing with these over-sized animals while learning about their characteristics. The set includes the following insects: Fly, Ant, Bee, Ladybug, Grasshopper, Butterfly and Dragonfly.

LER0789

Set of 7 \$69.95

**Life Cycle Jigsaw Puzzle Set**

A set of 4 wooden jigsaw puzzles depicting life cycles of a butterfly, duck, frog and tree. Each puzzle has 9 pieces and is 20cm square. Ages 3+ years

JJ013

Set of 4 \$53.95

**Life Cycles - Butterfly & Frog & Hen**

Excellent for illustrating to young children the life cycle process of three different animals. The life cycles include that of a butterfly, frog and hen. A total of 12 wooden pieces supplied in a cloth bag (20cm square). Ages 3+ years

SK82 12 piece

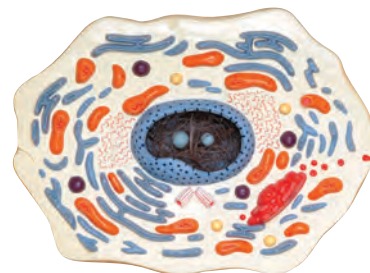

12 pieces \$42.95

**Insects Poster Cards A3**

These insects Poster Cards will expose your students to an interesting variety of insects and their habits. Furthermore the set of illustrated cards features facts about 25 insects. Also included are diagrams showing growth and development and the anatomy of an insect.

DC59063

\$44.95

**Animal Cell Model - 20000x Enlarged**

This model displays the cell of an animal. It is enlarged 20,000 times. The model shows structure & cell organelles. Made from high quality PVC. Size: 42 x 30 x 16 cm.

SER1066703

\$179.95

Animal Habitats Game

This Animal Habitats game allows children to compare animals in familiar habitats with animals found in less familiar habitats. The 4 double-sided A4 playing boards feature a single habitat on one side (coast, woodland, polar and desert) and a habitat bingo game on the reverse.

ZZ0046

\$54.95

Mitosis Model

This 8 model set shows the different stages of mitosis. Explore characteristics of structures such as chromosomes, spindle, centrioles and nucleus. Size: 18 x 18 x 3 cm.

SER1066704

Set of 8 \$199.95

Underwater Sea Life Felt Kit

A deep blue sea sets the scene for water-world adventures. Dolphins, whales and all sorts of exotic sea life are ready to play a role in underwater tales. The felt background measures 91 x 66cm and includes 40 underwater felt creatures. Supplied with a descriptive booklet. Ages 5+ years

LV2385

41 pieces \$56.95

External Features of Living Things Kit

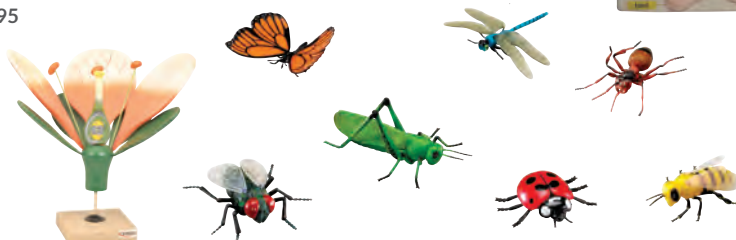

The items in this biology kit will teach students about the external features of plants, insects and humans. Contents may vary.

Mini Beast LED Slide Viewer

The LED Slide Viewer adds another dimension to the Mini Beast Specimens. Lights on the sides and bottom of the viewer illuminate the specimen slides in a way children will find amazing. Offers over 800 hours of viewing time.

KNBV

\$29.95

Land Mini Beast Slides & Viewer

This set includes 3 groups of arthropod specimens - insects, arachnids and myriapods. Using the viewer to illuminate these specimen slides provides children with an exciting way to investigate the amazing Animal Kingdom. Teacher's guide is included.

KNBS01

\$99.95

Air Mini Beast Slides & Viewer

These 6 insect specimens and viewer allow children to investigate the similarities and differences that exist between insects. The Mini Beasts specimens when illuminated look amazing. Teacher's guide is included.

KNBS03

\$99.95

Water Mini Beast Slides & Viewer

This set includes specimens representing the cnidaria, echinoderms, annelids and molluscs groups. These slides provide an opportunity to introduce children to the classification of the animal kingdom. Teacher's guide is included.

KNBS02

\$99.95

Large Insect & Spider Set

This set includes 15 different spider and insect specimens. Largest resin block measures 7.5cm square. Supplied in storage and display box. Teacher's guide included.

KNB2411

Set of 15 specimens \$199.95

Silkworm - Life Cycles

An excellent resource to introduce children to the different life cycles stages of silkworm - eggs, 2nd, 3rd and 4th instars, larva, cocoon, pupa and a male and female butterfly. Block measures 165 x 80 x 20mm. Includes teacher guide.

KNB3333

\$79.95

Frog - Life Cycle

This highly detailed plastomount, shows the frog life cycle from beginning to adult. The model comes with an identification key. Size: 140 x 64 x 18mm

SER1000012

\$29.95

Frog Plastomount

High quality and very clear plastomount of a frog. It comes with identification key. Size: 75 x 75 x 30 mm

SER1000018

\$19.95

Mini Beasts & Plastomounts

**Butterfly Specimens**

This set of 10 laminated butterflies show the beautiful wings in great detail. Identify differences and similarities between the 10 species. These laminated butterflies are a great resource in combination with a light box, or stick them to a window as decoration! Each sheet is 11cm square.

KNB007

Set of 10 \$39.95

**Mini Beasts Life Cycles - Lacewing Butterfly**

Four stages of the lacewing butterfly life cycle are encased in this high-quality acrylic block - eggs, larva, pupa and a male and female butterfly. Acrylic block measures 163 x 75 x 18mm. An excellent resource to introduce children to the different life cycles of living things. Includes teacher guide.

KNB1111

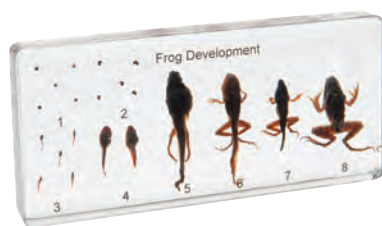

\$83.95

**Mini Beast Life Cycle Slides & Viewer - Insects**

The viewer illuminates these insect life cycles allowing students to see them in a whole new light! Honey bee, dragonfly, cabbage white butterfly, lanternfly and Grasshopper life cycles are included in this set. Warning: Contains coin/button battery. Hazardous if swallowed. Each set contains: 5 Insect life cycle slides 75 x 75mm, 1 Light up Viewer and a Teacher Guide.

KNB0500

\$99.95

**Mini Beasts Life Cycles - Frog**

Eight stages of the frog life cycle are encased in this high-quality acrylic block - eggs, tailbud, tadpoles with external and internal gills, tadpoles with hind and fore limbs, tadpole with shortened tail and froglet. Acrylic block measures 140 x 65 x 18mm. An excellent resource to introduce children to the different life cycles of living things. Includes teacher guide.

KNB2222

\$84.95

**Mini Beasts Large Ocean Set**

This set includes 11 different sea life specimens, from crabs to jellyfish and octopus. The largest resin block measures 7.5cm square. Supplied in storage and display box. Teacher's guide included.

KNB006

Set of 11 specimens \$199.95

**Toad Dissection Plastomount**

Toad Dissection is detailed and very clear and comes with an identification card. Ask and answer questions about the internal make up of a toad and understand all about a toad's anatomy. Size: 190 x 100 x 40mm

SER1000008

\$92.95

**Rabbit Skeleton Plastomount**

This plastomount of a rabbit skeleton is a great way to learn about rabbit's anatomy and function of parts. Size: 200 x 90 x 40mm

SER1000001

Handheld Digital Microscope with Stand - 2MP 200x

This is an amazing and easy to use handheld digital microscope with USB interface. It broke the conception of traditional microscope, it realised these functions: measurement, save, copy, transfer image and video which are difficult for a traditional microscope. It is small, easy to operate and portable fun.

Stereoscopic Dual Light Microscope - 80x

Features: 80x magnification and light source, inclined body LED illumination with variable light control, LED light variable sources, 10x eyepiece wide field

SER1122901

\$899.95

Digital Microscope - USB 5MP with Software

A USB microscope with a that allows students to make fine adjustments to the vertical height of the microscope and swivel the scope arm around a 360 degree range. The optics built into this microscope are excellent. The sharpness of texture on magnified objects is incredible to look at. It comes with a great piece of software for capturing 5MP (2592x1944) res JPGs, BMPs, TIFFs or PNGs and 1280x960 pixel AVI files. Compatible with WinXP/ Vista/7/8, Mac 10.6-10.8. Magnification ratio: 10x, 300x (at 5MP res). Find full specifications on our website.

Microscope Slides

Microscope Slide Sets

Have a deeper look into the microscopic world with these slide sets. The slide sets offer a wide variety of things to explore for kids as well as for higher secondary students.

SER2080105	Animal Tissue – Set of 12	Animal set of 12 common items which includes cerebellum, spinal cord, nerve, artery & vein, cardiac muscle, lymph node, spleen, scalp, skin, cervix, testis and thyroid gland.	\$29.95
SER2080906	Animal Tissues – Circulatory System	Slide set of 10 includes human blood, mammalian blood, frog blood, artery, aorta wall, vein, rat heart, capillaries in lung, lymph vessel, bone marrow.	\$29.95
SER2080907	Animal Tissues – Muscles & Bone	Slide set of 6 includes various animal muscles, bones, bladder and stomach.	\$25.95
SER2080905	Animal Tissues – The Nervous System	Slide set of 10 includes nerve, neurons, spinal cord, cerebellum, hypothalamus, muscle and brain sagittal among other samples.	\$39.95
SER2080903	Animal Tissues Digestive System	Slide set of 12 includes tongue, oesophagus, stomach, colon, rectum, gall bladder, liver, pancreas and salivary gland.	\$49.95
SER2080901	Animal Tissues Skin – Set of 10	Slide set of 10 includes sole of foot, eyelid, finger tip, scalp, hairless skin, sweat glands and hair follicles among other samples.	\$29.95
SER2080904	Animal Tissues Urinogenital System	Slide set of 15 includes ovary, uterus, vaginal wall, testis, urethra, penis, prostate gland, bladder, kidney and more.	\$179.95
SER2080890	Bacterial Types & Cell Division	Slide set of 10 displays various bacterial types and cell division.	\$69.95
SER1197002	Beginners – Set of 12	Slide set of 12 includes housefly wing, butterfly wing scales, water organisms, onion skin, cork section, cotton material, paper fibres, water flea and more.	\$29.95
SER1197006	Biology Basic – Set of 25	Slide set includes amoeba, human blood smear, artery, vein, lung ovary, testis, spirogyra and more.	\$49.95
SER1197007	Biology General – Set of 25	Slide set includes human blood smear, kidney, lung, skin, sweat glands, spinal cord, yeast, dicot stem, monocot leaf epidermis, kidney, pancreas moss leaf and many more.	\$49.95
SER2080899	Biology High School – Set of 20	Slide set includes samples commonly used in high school biology classes.	\$49.95
DC51774	Blood and Guts	Specimens include human stomach, heart, blood, kidney, and brain.	\$14.95
SER1139902	Blood Comparison – Set of 11	Slide set includes bird blood, bovine blood, blood stained fibres, camel blood, frog blood, cat or rabbit blood, human blood, crab blood, reptile blood, sickle cell and sheep blood.	\$39.95
SER2080886	Botanical Basic – Set of 20	Slide set includes spirogyra filaments, chlamydomonas, penicillium v.s on host, saccharomyces, marchantia v.s archegonial head, marchantia v.s antheridial head, moss v.s archegonial head, moss v.s antheridial head etc.	\$59.95

Detailed information of slides present in each set are available on www.teaching.com.au

Microscope Slide Sets

SER1197012	Botanical Basic – Set of 25	Slide set includes moss, spirogyra, mucor, yeast, penicillium, fern, zea root, cheery leaf and many more.	\$59.95
SER1197010	Cell Division: Mammal Testis TS	Slide set shows examples of mitosis, meiosis, spermatogenesis, insect salivary gland and more.	\$49.95
SER1198999	Commonly Found Items – Set of 12	Slide set contains insect debris, glass, sand, charcoal, salt, crystal, sugar, cornflour, silk, polycotton and more.	\$19.95
DC51775	Creepy Crawlies	The set of five prepared slides include a honeybee mouth, mosquito leg, ant, planaria, and an earthworm.	\$14.95
SER1197021	Earthworm – Set of 6	Slide set shows various parts of the earthworm.	\$15.95
DC51776	Edible Plants	Specimens include onion root, corn stem, tomato leaf, carrot root and rice leaf.	\$14.95
DC51777	Extraordinary Ordinary	Five slides showing common household objects like you have never seen before. What do hair, cork, fibres and other objects look like under a microscope?	\$14.95
DC51779	Flower Power	Specimens include sunflower stem, buttercup stem, lily leaf, lotus root, and also rose petal.	\$14.95
SER1197005	Food Science – Set of 20	Slide set shows meat cooked and uncooked, collagen, fish cooked and uncooked, bacteria, yeast, penicillium, potato cooked and uncooked, onion skin, carrot, flour, starch grains and more.	\$49.95
DC51780	Fun Guys	Specimens include rhizopus (bread mold), penicillium lichens, coprinus (mushroom) and saccharomyces (yeast).	\$14.95
SER2080089	Hair Examples – Set of 12	Slide set includes hair of rabbit, cat, dog, sheep, pig, horse, cow, human, bird feather, peafowl, duck and chick.	\$9.95
SER2080896	Histology Basic – Set of 24	Slide set includes oesophagus, intestine, mouth cells, adipose tissue, cartilage, bone, muscle, fibrous tissue, kidney, ovary, testis and more.	\$59.95
SER1066901	Histology Basic – Set of 50	Slides set includes stigma, stem, hydra with testis, tapeworm, striated muscle and more.	\$99.95
SER1197028	Histology Human – Set of 25	Slide set includes cerebellum, spinal cord, nerve, artery vein, cardiac muscle and many more.	\$59.95
SER1197020	Hydra – Set of 6	Slide set includes hydra with ingested animal, hydra with bud, hydra with testis, hydra with ovary and more.	\$29.95
SER2080889	Insect Anatomy – Set of 20	Slide set includes trachea, gizzard, wing scales, wings-fly, bee, grasshopper, bee sting, legs, flea, cornea, trachea and more.	\$59.95
SER1197022	Insect Anatomy – Set of 9	Slide set includes parts of cockroach, butterfly, housefly. Anatomy parts include antenna, wings, legs, head, eyes, apis, and more.	\$29.95
SER2080888	Insect Morphology – Set of 20	Slide set includes various insect parts such as larva, pupa, head of mosquito, house fly, cockroach, honey bee, beetle and more.	\$69.95
DC51783	Intermediate – Set of 25	Unique specimens include hair, sugar, pepper, yeast, fly head, fish skin, human blood, cotton stem, cotton leaf, hydra, sprout, muscle.	\$49.95
SER2080885	Introduction to Microscopy – Set 12	Slide set includes human hair, wool, nylon, crystal, dust, blood, insect leg, insect wing, plant cell, animal cell and more.	\$19.95

Detailed information of slides present in each set are available on www.teaching.com.au

Microscope Slide Sets

SER1103024	Life In A Pond	Slide set includes blue alga, green alga, hydra, freshwater oligochaetes and more.	\$69.95
DC51778	Lily Pad Leap	Specimens include frog intestine, kidney, liver, skin and lung.	\$14.95
SER2080897	Mammalian Embryology – Set of 3	Slide set includes mouse & early development head, torax and abdomen.	\$59.95
SER2080898	Mammalian Embryology Mouse – Set of 8	Slide set includes head through brain region, eye region, thorax, abdomen, foetus, umbilical cord of mouse	\$89.95
SER1197009	Mixed Bacteria – Set of 12	Slide set includes bacilli, cocci, spirillum, gram positive and negative, myobacterium tuberculosis in tissue, rhizobium in root nodule and more.	\$69.95
SER2080900	Parasitology Basic – Set of 12	Slide set includes hookworm, tapeworm, tick mouth parts, flea, louse and more	\$199.95
SER2080894	Plant Anatomy & Adaption – Set of 24	Slide set includes root hairs showing root cap, eucalyptus isobilateral leaf, mangrove leaf salt adaption, gymnosperm, angiosperm of leaf and more.	\$249.95
SER1197014	Plant Anatomy Basic – Set of 20	Slide set includes vicia root apex, zea (maize) stem, dicot stem, stigma with pollen tubes.	\$39.95
SER2080106	Pond Life Australian – Set 12	Slide set includes spirogyra, green filamentous alga, an ostracod, cyclops, a copepod and more.	\$129.95
DC51773K	Prepared – 40pc	This is a great complete prepared slide set for examining animals as well as plant tissues.	\$113.95
DC51782	Prepared – 12p	Unique specimens include cotton, nylon, corn starch, salt, wool, silk, pumpkin, honey bee, pollen, bird feathers, hydra and also frog blood smear.	\$28.95
SER1052961	Prepared General Biology Slides – Set 100	Slide set includes plant root tip, stems and seeds of plants, leaves, moss, penicillium, mouth cell, muscles, artery & vein. Blood smear, animal mouth parts, earthworm and more	\$132.95
SER1197008	Protozoa & Algae – Set of 20	Slide set includes amoeba, paramecium, filaments with heterocysts, spirogyra, vegetative filaments and more.	\$79.95
SER1197004	Textiles – Set of 12	Slide set includes wool, polyester fibre, nylon, yak hair, cotton, linen and more.	\$22.95
SER1197015	Timber Sections Mixed – Set of 12	Slide set includes Scots pine, African mahogany, English oak, red cedar, teak, birch, beech, fir, sycamore, lime and more.	\$29.95
SER2080908	Tissue Glands & Endocrine System	Slide set includes pancreas, thyroid, parathyroid, adrenal, pituitary, lymph, parotid, prostate and more.	\$39.95
DC51773	Wicked Wings	Specimens include mosquito wing, housefly wing, fruit fly wing, butterfly wing and a bee wing.	\$14.95
SER2080895	Zoology & Histology Basic – Set of 35	Slide set includes various basic and advaced zoology and histology slides.	\$399.95
SER1197018	Zoology Basic – Set of 25	Slide set includes parts of amoeba, tapeworm, round worm, butterfly, rabbit, frog and more.	\$89.95
SER2080887	Zoology Basic Animal Kingdom	Slide set includes hydra with bud, obelia hydroid colony, ancylostoma (hookworm) and more.	\$69.95

Deatiled information of slides present in each set are available on www.teaching.com.au

Microscope Slides

SER2080131	Slide – Allium (Onion) Root Tip L.S.	\$7.95
SER2080211	Slide – Allium Epidermis Onion Bulb WM	\$7.95

Recycling Stations

Always wondered if the waste recycling has been done correctly and which type of waste should go in which bin?

Introducing transparent recycling bins that allow you to see what's inside the bin, promoting the correct recycling of waste. The black bins are also still available, and the lids are compatible with both the transparent and black base.

The transparent bins are available in 30L bins. The 30L bins measure 57.5(H) x 41(W) x 30(L)cm. The bins come with a swing lid. The black bins are available in 30L and 60L. The 60L bins measure 69(H) x 43(W) x 50(L)cm and come with a foot pedal. Each set comes in 4 colours – blue, green, yellow and red. They are also available individually.

World Globe Class Set

With this set, students can have their own globe on their desk while the teacher demonstrates subjects like geography and the environment on the large globe. The set (FD36833) consists of 1 large globe (FD36899) and 12 small globes (FD36830). Both globes consist of 2 pieces and show up-to-date geographical maps. Sizes: large globe is 28cm in diameter, the small globe is 13cm in diameter.

FD36833	Set of 13	\$311.35	\$269.95
FD36830-6	Small Desk Globes – Set of 6	\$131.70	\$113.95
FD36899-4	Large Desk Globes – Set of 4	\$191.80	\$170.95

Giant World Felt Map with Bag

A giant, cloth world map which can be hung on the wall or used on the floor for fun interactive learning about the world, the countries, cities, environment etc.

KD15104 170 x 240cm **\$359.95**

Physical Globe with Raised Relief

Great display of geographical characteristics with a focus on the topography of the earth.

SER1052224 32cm **\$89.95**

Political World Globe

This globe is perfect to teach students all the countries and geographic characteristics of earth.

SER1052223 32cm **\$52.95**

Inflatable Labelling Globe

Customise this write & wipe globe to enrich geography, history, literature and social studies lessons and other cross-curriculum activities. Includes an activity guide, repair kit and display hook and string. Measures 68.6cm in diameter.

LER2438 **\$44.95**

68.6cm (dia)
 5+ yrs

Physical World Globe

This globe displays the climate, vegetation and geographical conditions.

SER1070002 32cm **\$49.95**

Puzzle Globe

Teaching geography to little ones has never been easier, or more fun! The removable continents also include(s) animals and famous landmarks. Size: 20cm in diameter.

Materials Investigation Kits

**Materials Kit – Solids**

This materials kit consists of 14 materials in the form of rectangular blocks, intended to familiarise students with the appearance, 'feel', texture, harness and density of a range of common substances.

EIS0114B Set of 14 Blocks \$107.95

**Metal Strip Set**

Ideal for experiments to demonstrate magnetic properties and classifications of metals. The set includes soft & hard aluminium, Strips measure 50 x 25mm.

CT50147 \$39.95

**Metal Disc Set**

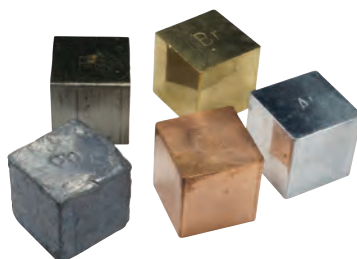

Ideal for experiments to demonstrate magnetic properties and classifications of metals. Includes discs of brass, copper, bronze, nickel, silver, mild steel, stainless steel, zinc and aluminium. Measures 2.5cm in diameter.

SHW51034 8pc \$16.95

**Cubes For Density Investigation**

Explore the difference in density between different materials. This cubes measure 2 x 2 x 2cm a. This is a set of 6 cubes, consisting of one of each: brass, lead, zinc, copper, aluminium, and iron.

EIS0108H Set of 6 \$34.95

**Five Material Cube Set**

This set includes aluminium, copper, brass, iron and lead and are 25mm³ in size.

SERLB1210-001 25mm \$29.95

**Density Cubes – 2.5cm³**

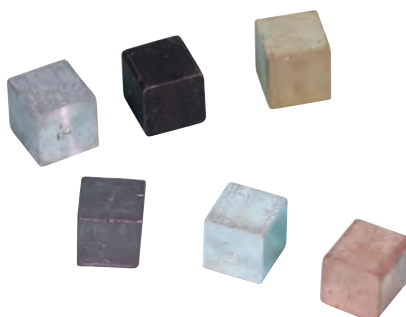

This set includes aluminium, copper, nylon, PVC, steel, acrylic, pine, brass, oak and poplar.

SER1055047 Set of 10 \$41.95

**Metal Cube Set - 20mm**

This set includes aluminium, steel, brass, copper and zinc.

SER1010026 Set of 7 \$45.95

**Metal Cube Set - 10mm**

This set includes aluminium, steel, brass, copper and zinc.

SER1010025 Set of 6 \$14.95

**Equal Mass Density Kit**

This set includes 7 cylinders of carbon, aluminium, brass, PVC, copper, polyethylene and steel.

SER1014083 Set of 9 \$43.95

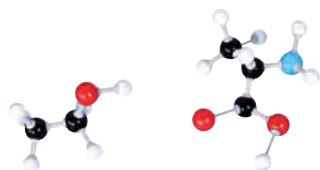

Molecular Models

**Atomic & Molecular Model – Large Set**

A great set for organic and inorganic molecular models. Kit includes: 8 Carbon, 15 Hydrogen, 4 Nitrogen, 6 Oxygen, 2 Sulphur, 1 Phosphorous, 6 Halogen, 8 metal (4 different types) and links

EIS00604

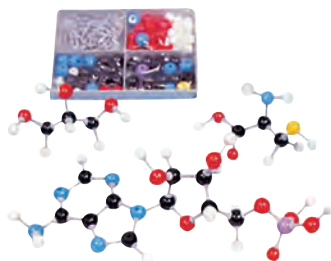

Set of 7 \$54.95

**MolecModels3D - 7 Amino Acids**

Set of 7 amino acids which includes alanine, aspartic acid, histidine, phenylalanine, methionine, serine and valine

SER1021309

Set of 7 \$53.95

**MolecModels3D – Biochemistry Student Set**

The set contains 82 atoms and 40 links.

SER1021010

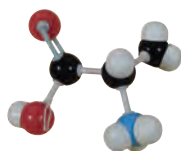

\$34.95

**MolecModels3D – Detergent**

The set contains 23 atom parts, 29 atom links and 24 Links. The set includes carbon, oxygen and hydrogen bonds.

SER1021049

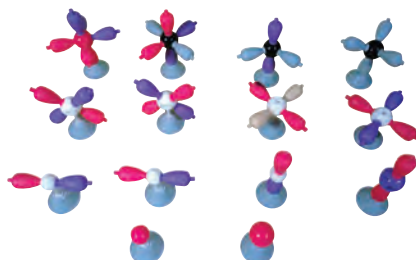

\$29.95

**MolecModels3D – Amino Acid Collection**

20 amino acid models per kit. Contents include atoms and links.

SER1021311

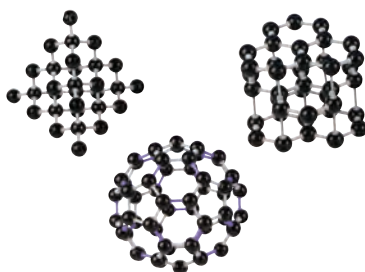

\$97.95

**MolecModels3D – Atomic Orbital Set**

Atomic Orbital

SER1021057

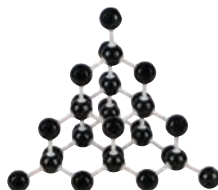

\$47.95

**MolecModels3D - Carbon Crystal Set**

This set is useful for teaching nanotubes which are cylinders of hexagonal carbon networks (tubes) that are modified Fullerenes derivatives and are formed either as a single wall molecule or multi walled molecules.

SER1021017

\$39.95

**MolecModels3D – Diamond Crystal**

The set includes 30 carbon atoms and 40 links.

SER1021015

\$34.95

**MolecModels3D – Biochemistry Teacher Set**

Contents include various atoms and links.

SER1021007

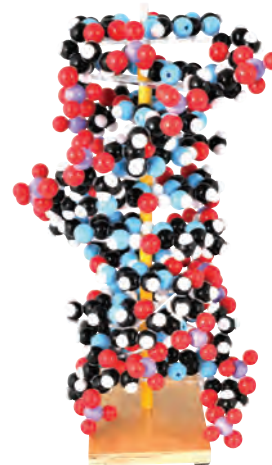

\$73.95

**MolecModels3D – Cholesterol (Biochemistry)**

This biochemistry set includes carbon and oxygen atoms. The set comes with linkages and instruction sheets.

SER1021308

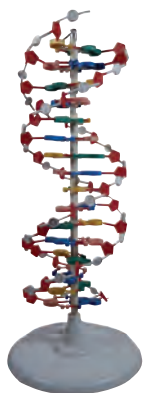

\$36.95

**MolecModels3D - 10 Layer DNA Set**

The set includes carbon, nitrogen, oxygen and hydrogen atoms along with links.

SER1021021

\$249.95

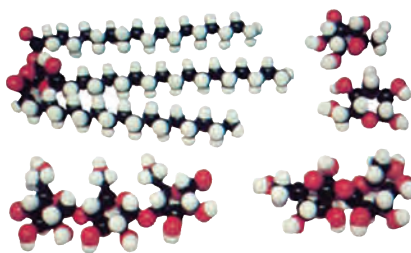

22 Layer Molecular DNA Model Set

This set includes colour coded bases (G,C,A And T), deoxyribose and phosphate groups, as well as a display stand.

SER1021368

\$120.95

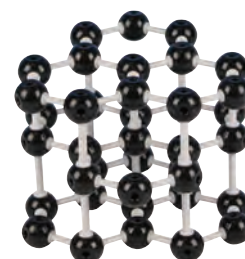

MolecModels3D - Tripalmitin

This set includes 173 atom parts, 175 links and a tool.

SER1021043

\$61.95

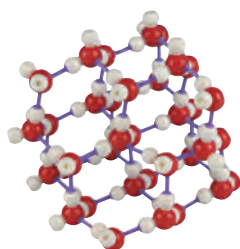

MolecModels3D - Graphite Crystal

This set includes 45 carbon atoms and 67 links. It comes with an instruction sheet.

SER1021016

\$32.95

MolecModels3D - Ice Crystal

This set includes 30 oxygen and 60 hydrogen atoms along with 100 links.

SER1021053

\$37.95

MolecModels3D - Nylon 6.6

This set includes carbon, nitrogen, oxygen and hydrogen bonds. The set contains 90 links and an instruction sheet.

SER1021048

\$32.95

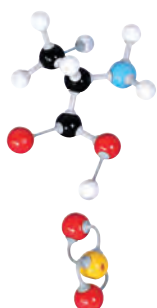

MolecModels3D – Organic Introduction Set

This set includes hydrogen, carbon, oxygen, chlorine, nitrogen and sulphur atoms. The set comes with 62 links and an instruction sheet.

SER1021001

\$38.95

MolecModels3D – Organic Stereo Chemistry Set

This set includes carbon, oxygen, nitrogen, chlorine, bromine, iodine and general metal atoms. The set contains 102 links and an instruction sheet.

SER1021000

\$37.95

MolecModels3D – Organic Student Set

This set includes hydrogen, carbon, oxygen, nitrogen, sulphur, phosphorous and general metal atoms. The set contains 64 links, link remover tool and an instruction sheet.

SER1021008

\$36.95

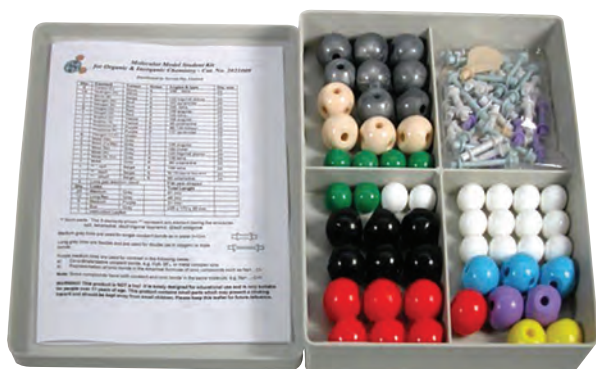

MolecModels3D – Organic Teacher Set

The set includes hydrogen, carbon, oxygen, chlorine, nitrogen, sulphur, phosphorous and metal atoms. The set contains 140 links, link remover tool and an instruction sheet.

SER1021003

\$39.95

Molecular Models

**MolecModels3D – Organic/Inorganic Student Set**

The set includes hydrogen, boron, oxygen, carbon, chlorine, nitrogen, sulphur, phosphorous and general metal atoms. The set contains 37 links, link remover tool and an instruction sheet.

SER1021009

\$39.95

**MolecModels3D – Polypropylene**

The set includes carbon and hydrogen bonds. The set contains 25 links, link remover tool and an instruction sheet.

SER1021045

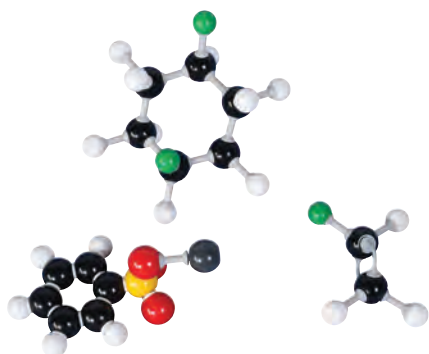

\$24.95

**MolecModels3D – Polyvinyl Chloride**

The set includes carbon and hydrogen bonds. The set contains 35 links, link remover tool and an instruction sheet.

SER1021044

\$20.95

**MolecModels3D – Organic/Inorganic Teacher Set**

The set includes hydrogen, carbon, oxygen, chlorine, nitrogen, sulphur, phosphorous and general metal atoms. The set contains 86 links and an instruction sheet.

SER1021004

\$48.95

**MolecModels3D – Polystyrene Kit**

The set includes carbon and hydrogen bonds. The set contains 35 links, link remover tool and an instruction sheet.

SER1021046

\$36.95

**MolecModels3D – Saturated Fat (Stearic Acid)**

The set includes carbon, oxygen and hydrogen bonds. The set contains 100 links, link remover tool and an instruction sheet.

SER1021306

\$23.95

**MolecModels3D – Shapes Of Molecules**

The set includes hydrogen, chlorine, fluorine, boron, chlorine, oxygen, nitrogen, carbon, phosphorous, sulphur and general metal atoms.

SER1021058

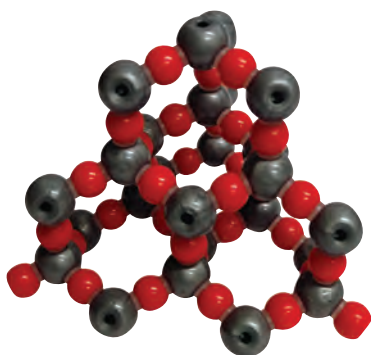

\$38.95

**MolecModels3D – Silicon Carbide**

The set includes carbon, general metal atoms and 50 links. The set also comes with an instruction sheet.

SER1021302

\$38.95

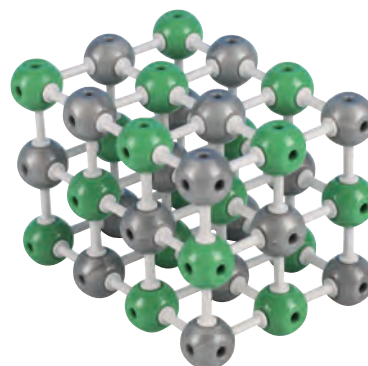

MolecModels3D – Silicon Dioxide

The set includes oxygen, general metal atoms and 100 links. The set also comes with link remover tool and an instruction sheet.

SER1021303

\$33.95

MolecModels3D – Sodium Chloride

The set includes chlorine, general metal atoms and links. The set also comes with link remover tool and an instruction sheet.

SER1021012

\$34.95

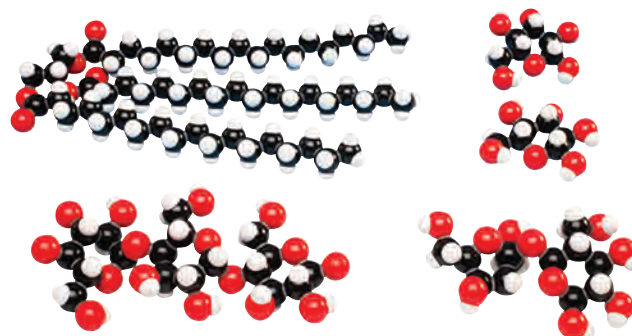

MolecModels3D – Stereochemistry Student Set

The set includes carbon, nitrogen, bromine, chlorine, iodine, oxygen and general metal atoms. The set contains links, link remover tool and an instruction sheet.

SER1021051

\$35.95

MolecModels3D - Sucrose

The set includes carbon, oxygen and hydrogen bonds. The set contains links, link remover tool and an instruction sheet.

SER1021035

\$27.95

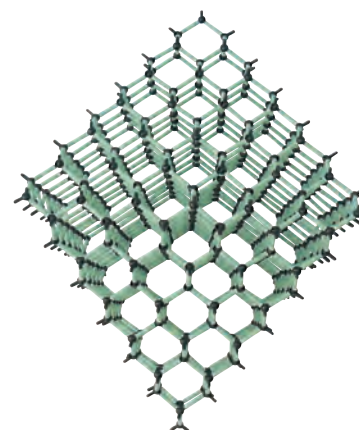

MolecModels3D – Unsaturated Fat (Oleic Acid)

The set includes carbon, oxygen and hydrogen bonds. The set contains 52 links, link remover tool and an instruction sheet.

SER1021307

\$23.95

MolecModels3D – Sucrose Kit

The set contains 450 atoms and an instruction sheet and work card to discuss the nature of the bonding, crystal structure, growth and physical properties.

SER1001023

\$97.95

Molecular Models

Molecular Minit Model – Organic/Inorganic

The set contains 240 atoms, 220 bonds and a booklet. Learn about molecular shape, stereochemistry, isomerism and bonding in organic and inorganic molecules and complex ions.

SER1001053

\$49.95

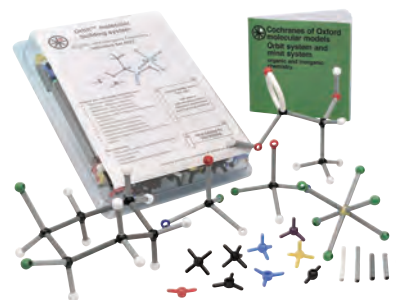

Molecular Model Orbit Atom Centre Hydrogen PK/100

Students will enjoy constructing their own models with this orbit-atom pack.

SER1001071

\$17.95

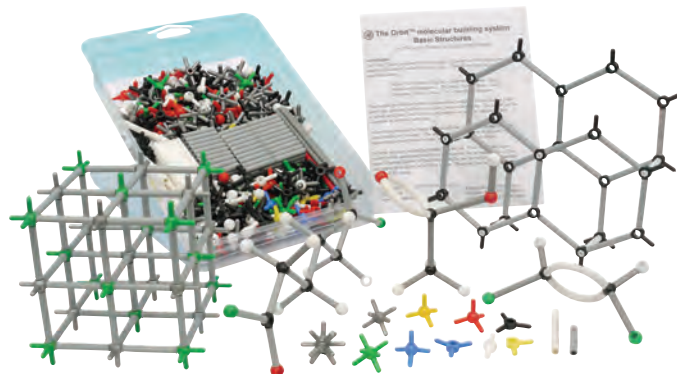

Molecular Orbit Organic/Inorganic Individual Set

This advanced set is suitable to learn about molecular shape, stereochemistry, isomerism and bonding in organic and inorganic molecules and complex ions. The set contains 240 atoms, 200 bonds and a booklet.

SER1001047

\$65.95

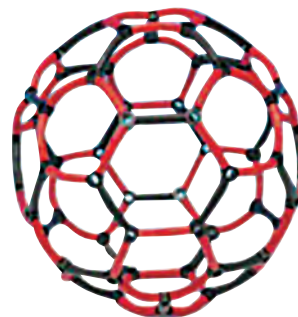

Orbit – Basic Structures Individual Set

The set contains 290 atoms, 190 bonds and a booklet. Learn about the structures of organic molecules, inorganic materials, crystals and metals.

SER1001046

\$69.95

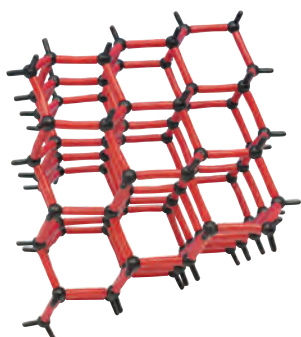

Orbit ColourWave Model – Carbon 60 Fullerene

This kit shows the highly symmetrical structure of Carbon 60. It is composed of 12 pentagons and 20 hexagons with alternating double and single bonds illustrated by different colour tubes in the model.

SER1001231

\$19.95

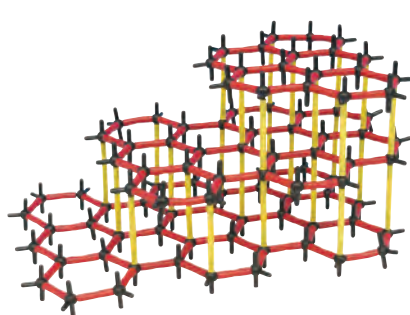

Orbit ColourWave Model – Diamond Kit

This is a robust model containing sufficient atoms to see the relationships between structure and physical properties.

SER1001229

\$29.95

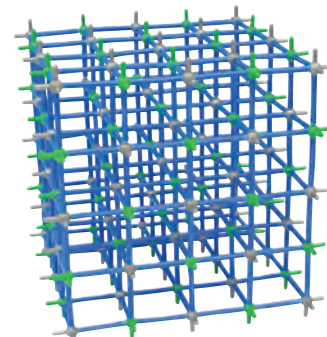

Orbit ColourWave Model – Graphite Kit

This is an easy-to-build, low-cost kit containing sufficient atoms to see the relationships between structure and physical properties.

SER1001230

\$29.95

Orbit ColourWave Model – Sodium Chloride Kit

This kit contains 125 sodium & chloride atoms. Students learn as they follow the building instructions and model description.

How can I experiment with Atoms Book

These hands-on books gives students many opportunities to experiment with atoms. Size: 20.3 x 22.8cm, each book has 32 pages. Ages 7+ years

RP0080 Set of 5 \$19.95

We carry a wide range of laboratory chemicals and chemical products, including reagents, dry chemicals, solvents, laboratory solutions and specialised chemicals. We are proud to partner with Chem-Supply PTY

Ltd, and Australian owned manufacturer and supplier of specialty chemical products.

If you don't see what you're looking for online or in our range below don't hesitate to contact us for custom orders.

Order and Shipment of Dangerous Goods

We take safety seriously. In order to comply with state laws around Dangerous Goods documentation, when an order is placed for a dangerous good in certain classifications an End User Declaration (EUD) form must be completed, prior to shipping of the goods. The form is stored in our system for your specific order and is also passed on to local authorities to ensure items purchased are being used in a controlled environment. We are not able to ship orders until we have received signed documentation.

Forces and Motion Mechanism Value Pack

This kit consists of 2 'Motion and Mechanisms' sets and 2 'Forces and Simple Machines' sets. Use this kit to teach children all about force, levers, inclined planes, axles, simple machines and mechanical machine design.

GG1234-VP

Set of 4 \$399.95

STEM Force & Motion Activity Set

Discover the science of forces and motion through scientific exploration with colourful, engaging tools and hands-on activities.

LER2822

\$62.95

Save
\$8⁹⁰

STEM Activity Kit

Introduce and explore magnets and simple machines. Also kids will have hours of fun exploring the concept of sinking and floating.

LER2827K

Set of 3 \$188.85 \$179.95

Gyro Robots

This kit allows children to build 6 different experimental models which includes Gyro Robot, a Gyro Compass, a Gyrorector, a Segway, a Rope Walker, a Flight Simulator and also a Balance Game.

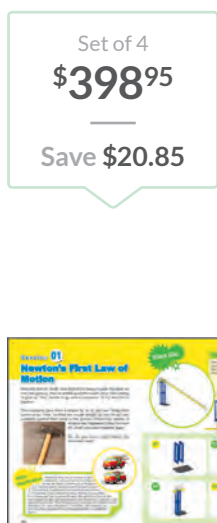

GG7396

\$44.95

Learning Lab – Motion & Mechanism

Using Gigo's Learning Lab construction blocks as a foundation, kids can learn the designs of complex transport machines, and understand the movement and the function of different types of mechanical structures, including: gear racks, cams, and worm gears. It helps kids to develop the foundations of mechanical machine design. The set includes 20 lesson plans, including 16 models and 4 creative works, a student workbook, and 3D Smart Manual to view the model on your tablet in 3D. Each lesson plan consists of an introduction with theory, building instructions, the experiment, improvements and evaluation.

Forces & Motion

Cube for Density Investigation – 2cm

Each cube measures 2cm and comes without hook. They can be purchased individually or as a set of 6. Supplied with instruction manual.

EIS0108H

Set of 6 \$34.95

Economy Collision Balls

This economy model demonstrates elastic collision well. Teach your students about kinetic energy and elastic collision. Size: 13.5 x 11.5 x 14cm.

EIS0349ECB

\$89.95

Track & Ramp & Hall's Cars Kit

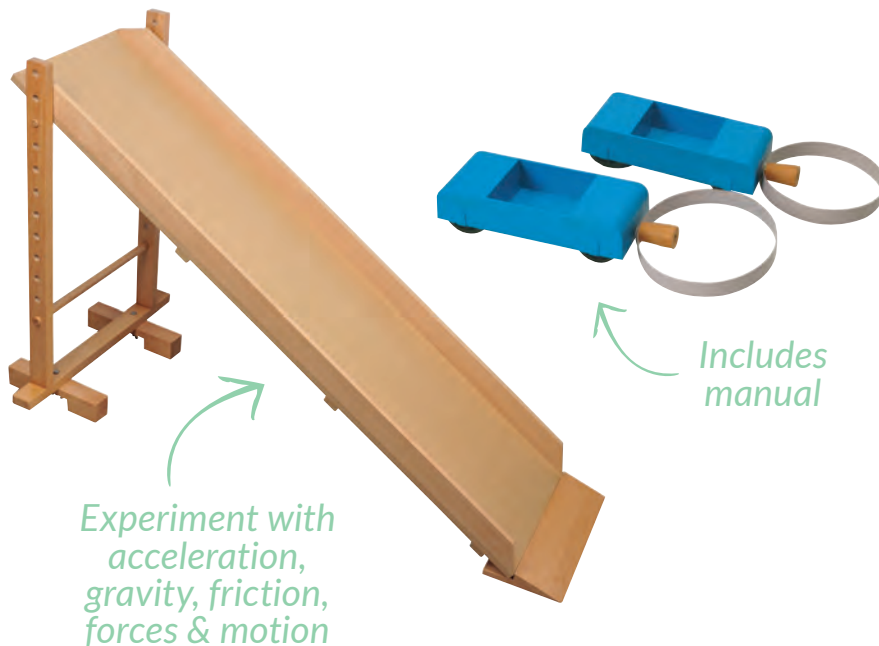

This kit allows you to test multiple variables (i.e. angle of the ramp and weight applied to the Hall's Car) at once! The kit includes 2 track & ramps (EIS0355DYTR) and 2 sets of Hall's Cars – Set of 2 (EIS0351A)

Experiment with
acceleration,
gravity, friction,
forces & motion

Includes
manual

Dynamic Track, Stand & Ramp

Find out how fast an object rolls off the ramp and experiment with different weights of the objects and height of the ramp. The track is 1.2m long x 30cm wide. The stand measures 65cm high. With run-off ramp to bridge the gap between track and floor when required.

EIS0355DYTR

\$119.95

Hall's Cars Experiment

This Hall's Car Pair is the most important lab essential for dynamics experiments. This car is used in conjunction with the inclined plane or ramp, pulley and weights to study the relationship between work and energy. The car has low friction wheels on oil free sleeve bearings which never need adjustment. The durable plastic moulded body has a deep well for weights and low profile.

EIS0351A

Set of 2 \$40.95

TTS7018K
\$952⁹⁵

Save \$48.75

Slope Kit with Two Double-Sided Boards

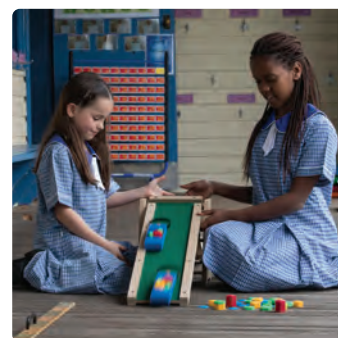

This multiple surface ramp kit is a great classroom resource for science investigations on forces, motion and friction. The two double-sided ramps feature four different surfaces: plain wood, foam, carpet underlay and sandpaper. The stand enables the ramp to be adjusted to five different heights enabling pupils to change the angle of the slope. Robust and sturdy, the stand will not tip over and its compact design makes the ramp kit easy to store. Ramp sizes approx 70 x 18cm. Accessories not included.

TTS7018-K

Slope, Hall's Cars & Weights Kit ~~\$221.85~~ **\$210.95**

TTS7018K

Slope & Ramp Kit 4 surfaces –Set of 6 **\$952.95**

Small Springs

Springs 2.2 x 1.5cm, for demonstrating Hooke's Law, resolution of forces, kinetic energy measurement, etc. Will recover from stretch to approximately 40cm.

DC51006

Set of 100 \$61.95

Springs

Diameter: Between 1 and 3cm approx. Flexible length between 10-20cm. With hooks on both side.

EIS0115A

Set of 6 Assorted sizes \$13.95

Dynamic Trolley Pair – Plastic

These carts have a single piece body. Mounted on a set of 3 low-friction nylon wheels providing a straight distance over long distances. Enables placing of additional masses. Lockable spring-loaded plunger.

EIS0351PL-N8

Pair \$89.95

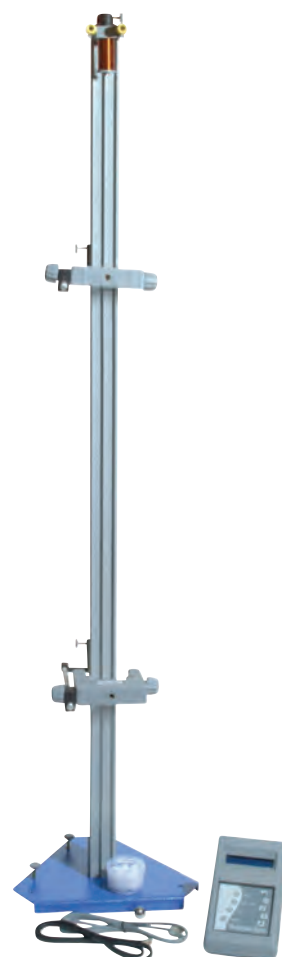

Magdeburg Hemisphere – Plastic

Magdeburg Hemisphere features a convenient valve for easy operation and release.

EIS0171A

\$21.95

Free Fall Model Advanced Gravity Experiments

This apparatus is designed for studying acceleration by gravity. It allows the small drag from air resistance on the steel to be measured.

EIS001FF

\$164.95

Projectile Launcher with Operating Instructions

This projectile launcher provides accurate and repeatable trajectories and distances due to fine tune launch mechanism and minimal ball spin.

EIS0343

\$99.95

Force Table – Economy 3-legged – No Weights

This lightweight and accurate table is complete with four pulleys and four weight hangers.

EIS0347F

\$199.95

Simple Machines

Includes 20
lesson plans

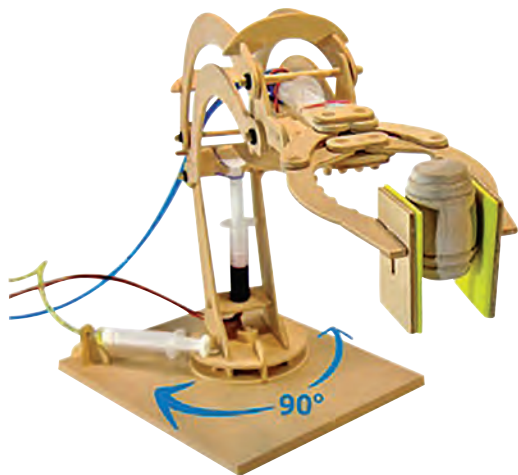

Forces & Simple Machines

Using Gigo's construction blocks, kids can build models of cranes and scales within the courses while they learn about the principles behind the movement of force, levers, inclined planes, axles and some other simple machines. The set includes 20 lesson plans, including 16 models and 4 creative works, a student workbook, and 3D Smart Manual to view the model on your tablet in 3D. Each lesson plan consists of an introduction with theory, building instructions, the experiment, improvements and evaluation.

Hydraulic Robotic Arm

This model uses a battery of independent hydraulic circuits to provide absolute control over the arm pincers: grip, lift, twist, lower and release. This set teaches the basics of hydraulics and robotics.

SN6710

\$49.95

Hydraulic 4-in-1 Mini Machines

This set includes the four main hydraulic mini machines: the cherry picker, and excavator as well as the platform lifter and scissor lift. The cherry picker teaches the principles of linkages and includes a small platform for figurines that remains flat at any height. The excavator teaches the principles of levers and hydraulic power. The mechanism includes two hydraulic cylinders and can be adjusted to provide either digging or scooping actions.

SN6706

\$59.95

*Build over 15 machines
at the same time*

Hydraulic Classroom Pack

This large hydraulic classroom pack ensures that you only need scissors, glue and cardboard to get the class inventing with parts for 30 students in pairs to build over 15 machines with an average of 4 pistons per machine.

SN6717

\$299.95

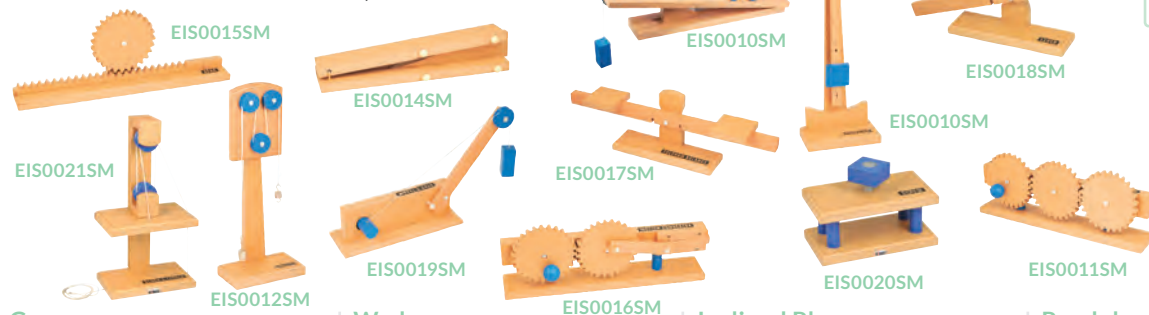

Wooden Simple Machines Class Set

These wooden simple machines are a great resource to show your students how simple machines can provide mechanical advantage and change the magnitude and direction of a force. Each model has a sturdy construction, perfect for classroom use. The models come with detailed instructions and activities.

EIS0019K

Set of 12 \$374.95

~~\$394.40~~**\$374⁹⁵**

Save \$19.45

Gear

This model can demonstrate how gears can turn rotational motion into translational motion. The base is 40 x 6cm and the model is 15.2cm tall.

EIS0015SM

\$40.95

Wedge

This model can be used to demonstrate how a wedge can increase mechanical advantage. Size: 35 x 9.5cm base with adjustable height.

EIS0014SM

\$27.95

Inclined Plane

With a shallow indent for adding additional mass if needed. With rubber wheels and grooves in the track of the inclined plane. Size: 42 x 8.2cm with an adjustable height.

EIS0010SM

\$28.95

Pendulum

Study the relation between length of the pendulum and period of the bob. Size: base 8.9 x 16.5cm, 39.5cm with 30cm adjustable pendulum.

EIS0013SM

\$27.95

Lever

Study levers and mechanical advantage both qualitatively and quantitatively. Size: base 22 x 7cm, the lever arm is 19cm.

EIS0018SM

\$19.95

Block & Tackle

This model shows how the use of multiple pulleys can increase the mechanical advantage. Size: 17 x 12 x 22cm.

EIS0021SM

\$34.95

Pulley

This model shows mechanical advantage created by pulleys. Size: base 16.5 x 8.9cm and 41cm tall.

EIS0012S

\$27.95

Wheel & Axle

This model can show how a crane works, as well as several other uses for a wheel and axle. Size: base 24 x 9.5cm. Stands 11.5cm high.

EIS0019SM

\$26.95

Fulcrum Balance

Study how changing the distance from the fulcrum changes the mechanical advantage. Students can intuitively figure out the balance point for a given set of masses. Size: 22 x 5.5cm with a height of 13.3cm. The lever arm is 45cm long.

EIS0017SM

\$27.95

Motion Converter

Show your students how rotational motion can be converted into linear motion with this motion converter. The gears are 12cm in diameter and are mounted on a 38.5 x 6.8cm base. The model is 14.5cm tall.

EIS0016SM

\$40.95

Screw

With large block on the head of the screw to give additional leverage. Size: 20 x 10 x 11cm.

EIS0020SM

\$34.95

Gear Train

This apparatus can model how gears work at a basic level to make work easier. The base is 16.5 x 8.9cm, 41cm tall.

EIS0011SM

\$54.95

Block Play Simple Machines Kit

Students get hands-on experience with cause & effect as they raise and lower objects on an elevator, move blocks on a conveyor belt & more. Plus, they'll gain insight into how full-sized machines make big jobs easier. This kit includes one of each of the Conveyor Belt (LS0202), the Elevator (LS0203) and the Sky Crane (LS0204).

LS0200K

Set of 3 \$278.95

Block Play Simple Machines – Sky Crane

Students turn the crank to activate the pulley system and watch the platform move up and down. The sky crane measures 33cm tall. Accessories not included.

LS0204

\$89.95

Block Play Simple Machines – Elevator

Students see how simple machines make work easier with our real-working wooden replicas! The wooden platform moves up and down with a spin of the knob. The elevator measures 23cm tall. Accessories not included.

LS0203

\$99.95

Block Play Simple Machines – Conveyor Belt

Students move a wedge around to see if a change in angle makes work easier or more challenging! The conveyor belt measures 32cm long. Blocks not included.

Simple Machines

Simple Machines Discovery Set

Students can construct, examine and explain simple machines to develop a deeper understanding of how they make work easier. Contains enough pieces to build a lever, pulley, inclined plane, wheel and axle, and wedge—all at the same time. Modify machines with 4 included weights (two 5g and two 10 g) and 8 included rubber bands to explore effort, force, load, motion and distance. Set of 63 pieces includes Activity Guide.

LER2442

63 pieces \$85.95

STEM Simple Machines Activity Set

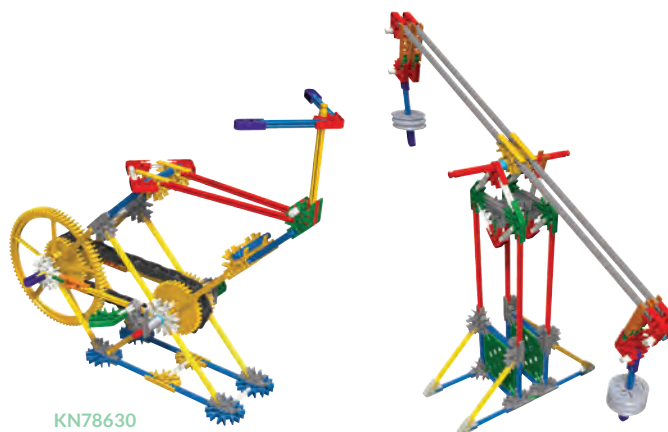

The STEM Simple Machines Activity Set includes a lever board, wedge, pulley with rope and hook, cart with 4 removable wheels, Archimedes screw, 4 barrel weights, as well as 10 double-sided activity cards to build early engineering and problem solving skills. The largest piece (the cart) measures 2.7cm in length x 8.9cm in width. Suitable for ages 3+ years.

LER2824

\$62.95

K'NEX Introduction to Simple Machines

STEM Education focuses on science, technology, engineering and mathematics concepts taught through problem-solving, discovery, exploratory learning and critical thinking. These K'NEX models offer hands-on learning opportunities that supports these learning outcomes. The inquiry-based lessons challenge students as they build, investigate, problem solve, discuss, and evaluate scientific and design principles in action. Each set comes with teacher's guide. Find more information about each individual set on our website.

Pulleys in Motion Class Set

This versatile classroom pulley set is designed to teach the mechanical principles of pulleys to a whole class. The set contains 18 single sheave pulleys, 12 double sheave pulleys, 12 triple sheave pulleys, 6 spring scales (500g, 50N), a roll of twine, 20 pulley chain links, and the 'Pulleys in Motion' teacher's guide. This 32-page resource introduces students to fundamental pulley concepts and has reproducible student activity sheets and assessment ideas. The focus of the Pulleys in Motion Class Set is to provide hands-on activities that are easily understood, and provide practical experience for the students.

QE37480

\$219.95

Pulleys Bulk Pack

25 each of 2, 3 and 4cm diameter pulleys with 32mm bores and 25 x 1cm diameter pulley with a 2mm bore for motor shafts.

\$316.95

The intended use of the products featured on this page are for educational purposes only. Adult supervision is required.
Seek immediate medical attention if magnets are swallowed or inhaled.

Classroom Attraction Kit Level 1

Supplement your science curriculum with comprehensive magnet kits. Investigate motion and stability, matter and its interactions and more.

DC50003

Set of 10 \$239.95

Jumbo Magnetic Marbles

The jumbo sized magnetic marbles measure approximately 3.4cm in diameter. Watch as they spin, attract and repel each other on a table ... a fun way to learn about magnetism! A set of 10 marbles. Ages 8+ years

LEL160

Set of 10 \$13.95

Compass Magnet & Bowl Set

This set comprises of colour coded plastic floating compass which contains a powerful magnet and a clear bowl marked with cardinal points of a compass.

CT50295

\$19.95

STEM Magnets Activity Set

STEM lessons are irresistible when you add the excitement of magnets! Learn all about the properties of magnetism in a fun, colourful way. Pieces include a horseshoe magnet, magnetic post, maze, 4 colour-coded ring magnets, 2 colour-coded bar magnets, 2 magnetic bugs and 2 snap-on cars to bring investigations to life. Also includes 10 double-sided activity cards (20 activities!) about attraction, repulsion and more. Comes with extensive teacher notes. Maze measures 28 x 21.5cm.

LER2833

20 activities \$62.95

Bumper Cars and Ring Magnets Set

Set comprises of two bumper cars and four ring magnets. The cars feature slots to accommodate the ring magnets. Students will learn all about the power of magnets as well as the force of magnetic attraction and repulsion. These cars will run away from or towards each other depending on how the magnets are arranged. Magnets are colour-coded and marked with North/South Poles for clarity. Car size: 10 x 5 x 6cm. Rings size: 3.6cm (dia) x 0.8cm. Spare rings available (CT50186).

CT50183

\$19.95

Ferrite Magnets Set

Ferrite magnets exhibit a high degree of coercive strength, making them more resistant to demagnetisation. Large surface area that is magnetic in dependable ferrite material. Each magnet measures 5 x 1.9 x 0.6cm.

SHW51021

Set of 10 \$16.95

Ferrite Ring Magnets

Quality ferrite magnets with holes, allowing them to be threaded on string or dowel for further investigation.

SHW51027

2.4cm dia. - Set of 10 \$12.95

Floating Ring Magnet Set

Students can master the amazing floating magnet trick. They can achieve this by simply stacking the rings with like poles facing each other so they repel.

NK51054

\$10.95

The intended use of the products featured on this page are for educational purposes only. Adult supervision is required.
Seek immediate medical attention if magnets are swallowed or inhaled.

Magnetism

Learn about the repelling or attracting force of magnets

Magnetic Match Rings

A fun way to learn about magnetism, develop visual matching skills and improve hand/eye co-ordination. Each ring is magnetic. When the rings are stacked they either attract the next ring (snap together), or repel the next ring (push apart or cause it to float). The set consists of 40 challenge cards, 10 Magnetic Rings (3 Blue, 3 Red, 2 Yellow, and 2 green). Each ring is 3.4cm in diameter. Ages 5+ years

LEL0351

\$27.95

Giant Horseshoe Magnet

High quality, durable monster magnet measures 23cm in height and lifts up to 1.8kgs. Convenient handle allows little hands to grip the magnet comfortably.

FD00001

\$13.95

Iron Filing Tube

Giant magnetic tube containing a double wall with iron filings between the two layers. Shows a three dimensional view of the magnetic field around the magnet supplied. Magnet is removable, filings are safely encased. 13 x 9cm.

CT50066

\$42.95

Giant Pole Marbles

A set of 4 ultra powerful colour-coded giant pole marbles which are also clearly marked N and S for easy identification (3cm in diameter). Useful for all kinds of magnetic fun and being colour-coded means that children will see them only attracted to opposing poles. Being large, makes for easy handling. 3cm (diameter).

TFC51084

Set of 4 \$17.95

Magnetic Marbles in Tub

These plastic cased Magnetic Marbles come in 10 different colours and resemble regular plastic balls. Each Magnetic Marble is 15mm in diameter.

CT50291

Set of 100 \$50.95

NK1001

Set of 20 \$11.95

Horseshoe Magnets Set

High quality and durable chrome steel horseshoe magnets with keepers. Includes plastic wallet. One of each size; 7.5, 10 and 12.5cm.

CT50102

Set of 3 \$59.95

Set of 10
Save
\$155

Iron Filings in Case

An affordable way to demonstrate magnetic attraction! This durable plastic case is firmly sealed to prevent mess or loss of the iron filings. Measures 9.5 x 6.7 x 1.2cm.

LEL0220

\$4.95

LEL0220K

Set of 10 \$47.95

The intended use of the products featured on this page are for educational purposes only. Adult supervision is required.

Magnetism

Magnetic Wands

These magnetic wands are perfect for the study of magnets and their effects on different materials.

LEL333

Set of 7 \$29.95

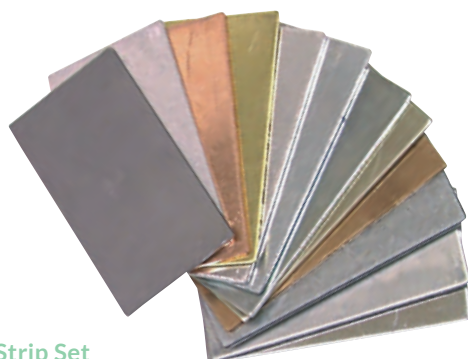

Metal Disc Set

Ideal for experiments to demonstrate magnetic properties and classifications of metals. Includes discs of brass, copper, bronze, nickel silver, mild steel, stainless steel, zinc and aluminium. Discs are stamped for identification. 2.5cm(dia). Set of 16 (EIS0798B) contains 8 stamped and 8 blank discs.

SHW51034

Set of 8 \$16.95

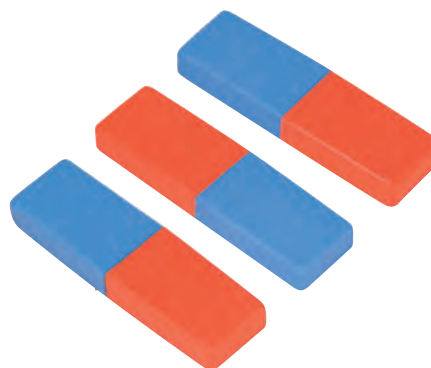

Metal Strip Set

Set includes strips of soft aluminium, hard aluminium, magnetic stainless steel, non-magnetic stainless steel, zinc, zinc plate, nickel silver, bronze, galvanised steel, mild steel, copper and brass, stamped with letter to identify metal. Ideal for experiments to demonstrate magnetic properties and classifications of metals. Strips measure 50 x 25mm.

CT50147

Set of 12 \$39.95

Plastic Cased Bar Magnets

Red and blue plastic covered bar magnets. These magnets are attractive as well as an easy way to teach magnetic attraction and repulsion. Ages 8+ years

EIS7850

Set of 10 \$40.95

Plastic Ring Magnets

These plastic Ring Magnets come with a central hole and crossbar, for use in experimentation. Inside, they house powerful ceramic magnets and are marked with North/South Poles. Rings size: 3.6cm (dia) x 0.8cm. Can be used with Bumper Cars (CT50183).

CT50186

Pack of 4 \$10.95

Round Iron Filing Discs

Filings encased in a plastic bubble, used to observe the effects of invisible magnetic fields. Supplied in a set of 10 discs. Each disc measures 8.5cm in diameter.

CT50351

Set of 10 \$39.95

Super Magnets

Design allows students to safely experience first hand the force of neodymium which is currently the world's strongest permanent magnet.

**Powerful Induction Coil (Ruhmkorf) - 80mm Spark**

This very high voltage power source can be used in a variety of physics experiments.

SER1052383

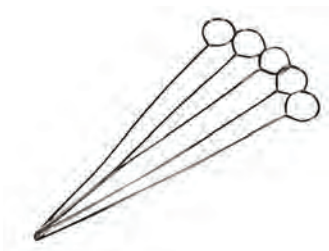

\$499.95

**Millikan's Apparatus with Built-in Power Supply**

This apparatus with inbuilt power supplies permits the atomising of a latex solution into small spheres and the rubber hose induces a static charge upon them.

SERAP2131-001

\$699.95

Nichrome Wire Inoculating Loop

This is made of nichrome wire with 4mm diameter loop.

SER1099004

\$7.95

Resistance Coil in Clear Case - 10 Ohm

This is a classic item designed for use in resistance measuring bridges.

SEREM2706-001

\$24.95

Resistance Coils

Resistance coils for studying flow of electricity.

EIS1143A

1 ohm resistance \$7.95

EIS1143C

5 ohm resistance \$7.95

Fixed Resistor Set - 10 to 1000ohms

This set can be used to construct simple circuits.

SER1011025

\$44.95

Power Supply - 2-12V 5.5A AC DC

This is a compact general purpose power supply to provide switched AC and DC voltages at 2, 4, 6, 8, 10 and 12V. AC and DC at about 5 to 6A.

SERLB2633-001

\$179.95

Power Supply - 2-12V 10A AC - DC

This is a compact, general purpose power supply to provide switched AC and DC voltages at 2, 4, 6, 8, 10 and 12V. AC and DC at about 8 to 10A.

SERLB2631-001

\$259.95

Peltier Effect Thermocouple

Thermo-Generator, 2x 4mm sockets permit application of DC to run the cell and the heating and the cooling is very obvious. Ice can form on the cold side.

SERHL4052-001

\$99.95

Power Supply - 1 Ampere

A compact regulated power supply offering 1.5, 3, 4.5, 6, 9, 12 volts at currents up to 1 Amp.

EIS1323A

\$114.95

Resistance Coil in Clear Case

This plastic spring clip is ideal for holding components between 1.9 to 2.5cm of diameter in position.

SER101106

1 ohm \$16.95

Light and sound are produced by a range of sources and can be sensed (ACSSU020)

- Recognising senses are used to learn about the world around us: our eyes to detect light, our ears to detect sound, and touch to feel vibrations
- Recognising that objects can be seen when light from sources is available to illuminate them
- Comparing sounds made by musical instruments using characteristics such as loudness, pitch and actions used to make the sound

Kits, Books & Charts

Physical Science Kit Year 2

Push and Pull! Have fun investigating these forces with our Year 2 kit. Contents may vary.

- Bags - Plastic Reseal
- Ball - Table Tennis
- Ball - Tennis
- Balloons
- Beakers
- Cellophane
- Corks
- Grattells Clip-on Lid
- Grattells Extra Deep Tray
- Inflatable Globe
- Marbles

- Paper Towels - Roll
- Popsticks
- Rubber Bands
- Self-Adhesive Notes
- Spray Bottle

TFC57008

\$184.95

A push or a pull affects how an object moves or changes shape (ACSSU033)

- Exploring ways that objects move on land, through water and in the air
- Exploring how different strengths of pushes and pulls affect the movement of objects
- Identifying toys from different cultures that use the forces of push or pull
- Considering the effects of objects being pulled towards the Earth

Bonus Book

- Gloves Disposable
- Grattells Clip-on Lid
- Grattells Jumbo Tray
- Inflatable Globe
- Marbles
- Masking Tape
- Cotton Reels
- Detergent Liquid
- Modelling Clay
- Paper Clips
- Polystyrene Ball
- Self-Adhesive Notes
- Streamers
- Tubing - Clear PVC
- Dominoes

TFC57016

\$264.95

Forces can be exerted by one object on another through direct contact or from a distance (ACSSU076)

- Observing qualitatively how speed is affected by the size of a force
- Exploring how non-contact forces are similar to contact forces in terms of objects pushing and pulling another object
- Comparing and contrasting the effect of friction on different surfaces, such as tyres and shoes on a range of surfaces
- Investigating the effect of forces on the behaviour of an object through actions such as throwing, dropping, bouncing and rolling

Bonus Book

TFC57020

\$318.95

Light from a source forms shadows and can be absorbed, reflected and refracted (ACSSU080)

- Drawing simple labelled ray diagrams to show the paths of light from a source to our eyes
- Comparing shadows from point and extended light sources such as torches and fluorescent tubes
- Classifying materials as transparent, opaque or translucent based on whether light passes through them or is absorbed
- Recognising that the colour of an object depends on the properties of the object and the colour of the light source
- Exploring the use of mirrors to demonstrate the reflection of light
- Recognising the refraction of light at the surfaces of different transparent materials, such as when light travels from air to water or air to glass

| - Battery - D | - Corrugated Plastic Sheets | - Grannells Jumbo Trays | - Self-Adhesive Notes | - Wire Copper |
| - Battery Holder 2 x AA | - Cotton Twine | - Hessian | - Skewers | - Wire Stripper |
| - Blu Tack | - Cups | - Light Bulbs Collection | - Split Pins | |
| - Bulb Holders | - Cutting Knife | - Magnifying Glass | - Stopwatch | |
| - Bulbs - 1.5v | - Dessert Spoon | - Manilla Folders | - Switch | |
| | - Digital Multimeter | - Marker Permanent | - Thermometer Immersion | |

TFC57024

\$939.95

Electrical circuits provide a means of transferring and transforming electricity (ACSSU097)

- Recognising the need for a complete circuit to allow the flow of electricity
- Investigating different electrical conductors and insulators
- Exploring the features of electrical devices such as switches and light globes

Energy from a variety of sources can be used to generate electricity (ACSSU219)

- Investigating how moving air and water can turn turbines to generate electricity
- Investigating the use of solar panels
- Considering whether an energy source is sustainable

Checker Plus pH Tester

The Checker Plus now offers automatic calibration to one or two points, automatic buffer recognition, calibrated buffer tags, stability indicator, low battery indicator, and selectable automatic shut off. The Checker Plus still maintains the iconic pentagon design with a probe that measures 103 mm in length and tapers to a 8 mm diameter making it ideal for test tubes and vials.

SER1164073

\$119.95

**Digital Light Meter**

A handy digital light meter for photography, lab work, architectural, engineering and construction applications. It includes an integrated stand and will measure incident light in 3 ranges: 0.01 to 200, 200 to 2,000, 2,000 to 20,000 And 20,000 to 50,000 lux. The photo detector is wired on A curly cord which extends to 1 meter, Allowing the user to take light measurements at the optimum position.

SER1024007

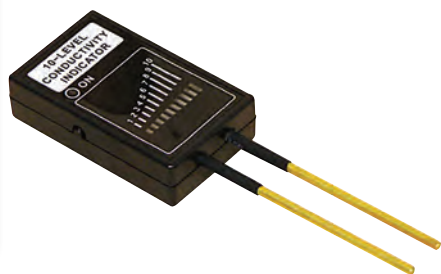

\$69.95

**Basic Conductivity Meter**

Visually compare conductivity between different solutions using this conductivity meter. The green LED is numbered from 1-10 and will light up as the probes are dipped into solutions of salts or acids.

SER1055024

\$44.95

**Salinity Refractometer with ATC - 28%**

This salinity refractometer has the ability to measure the concentration of NaCl (salt) in water and food preparations up to 28%. Designed for testing the concentration of water and brine. Featuring a triple scale, measuring in parts per thousand. Equipped with automatic compensation for field use.

SER1148003

\$120.95

Anemometer with Tripod

Provides wind speed, wind chill, temperature, barometric, and altitude information for any outdoor activity. The main display can be toggled between wind speed or altitude, with the sub-display showing either temperature/wind chill, or barometric pressure and temperature. The feature-packed device is small enough to fit in your pocket and can be used hands-free with the included mini tripod.

SER1068001

\$99.95

**Anemometer**

This Anemometer has the ability to measure wind speed and chill. Measurements are provided in Km/h, mph, ft/min, m/s and knots. Featuring the Beaufort wind scale bar graph, wind chill, Temperature, an LCD backlight, Auto power off, Neck band and instructions.

SER1052522

Soil Testing

Backpack Lab Soil Quality Testing Kit

A complete, portable learning experience. We introduced a kit specifically assembled for the educator and Environmental Science student. Using the popular Agricultural Combination Test Kit as its foundation, the Soil Quality Education Test Kit is designed to provide a complete lesson plan for teachers.

SER1164053 \$1,199.95

Ganong Potometer

This Ganong Potometer demonstrates transpiration rates of water absorption by a plant shoot under various external conditions.

SER1010326 \$49.95

Agricultural Soil Test Kit

With this soil test kit you have the ability to test the soil for pH, nitrogen, phosphorus and potassium. Kit includes, 2 x 120mL extraction solution, 70mL pH indicator, 75 powder packets (25 each for N, P and K), 3 x 1mL pipettes, 5 x test tubes, test tube stand, spoon, brush, 4 x colour cards, graduated card and handbook. Measures 235 x 176 x 117 mm.

SER1164037 25 test \$169.95

Soil pH & NPK Tablet Test Kit

This simple kit provides testing for pH, Nitrogen, Phosphorus & Potassium. Each container contains tablets to carry out 8 tests. (32 Total).

SER1009117 32 test \$39.95

Soil Moisture Meter – 300mm Stem

This soil tester measures soil conductivity and temperature.

SER1028025 300mm Stem \$13.95

Soil Moisture, Light & pH Meter – 300mm Stem

With this soil meter you have the ability to test pH and moisture to ensure suitable growing conditions.

SER1009113 300mm Stem \$21.95

Soil, Fertility, pH & NPK Meter

This soil meter gives an accurate indication of whether the soil being measured is fertile or not without the need for batteries. The pH portion of the tester utilises the chemical reaction known as Oxidation-Reduction to measure pH within the range of 1 through 9. Fertility is in the range of "Too Little", "Ideal" and "Too Much".

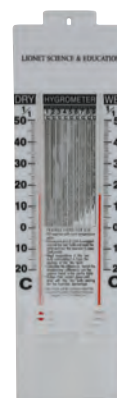

SER1052954 \$17.95

Student Microprocessor Controlled Colorimeter

Microprocessor controlled colorimeter, designed for student use. Colorimeters are used to measure the transmittance and absorbance of light passing through a liquid sample.

SERCH1003-001 \$499.95

Hanging Wet & Dry Bulb Hygrometer

Measure the amount of water vapour and humidity in the air with this hygrometer.

SER1028010 \$9.95

Pen Meters

High quality meters, from a reliable brand, at an affordable price. These Pen Meters are perfect for any lab or classroom. Including salinity meters, conductivity meters, pH meters and more!

Voltmeters & Multimeters

Voltmeters

A Voltmeter is an instrument used for measuring the electrical potential difference between two points in an electrical circuit. Our wide range of Voltmeters includes both analogue and digital devices. In our range you will find single, double and triple range Voltmeters. MTA has all the essential Voltmeters for your classroom.

SER1040035	Digital Voltmeter 0-19.99V Range	\$69.95
SER1040007	Single Range Voltmeter AC 0-20V	\$34.95

TeacherGeek is dedicated to inspiring and empowering the innovators of tomorrow. The TeacherGeek build system allows you to create almost anything mechanical. Make it your way incorporating found/recycling bin materials. Experiment and play, then revise and re-engineer. The TeacherGeek system allows for true engineering and innovation. The range consists of a combination of ready-to-go activity packs, or combine a wide variety of loose components to create your own STEAM model. TeacherGeek engages the hands and minds of students and teachers alike with a broad range of exciting and inspiring STEAM education activities and concepts. Students create unique solutions through scientific and engineering methods that are process, performance, and goal-driven. The components allow for designs which test accurately and consistently, so engineering can be driven by scientific research and method.

Includes over 15,000 components, complete with a pallet of replacement supplies!

Makerspace Trolley – STEAM Activity Cart incl Resources

Roll it into your classroom, lab, or library for the ultimate Maker/STEM/STEAM solution. With over 40+ STEM projects and almost every TeacherGeek component ever manufactured, this cart can easily support hundreds of kids. Each cart includes a pallet of replacement supplies (way more supplies than you see in the cart, over 15,000 components in total!) and sturdy tools to create almost any project. The sign is dry erase. Suitable for grades K-12. Students will learn science and engineering concepts through experimentation, grow their understanding and evolve projects through the design & engineering process. The TeacherGeek Maker Cart provides ample opportunities for amazing true STEM projects.

TeacherGeek - Rubber Band Racer - Advanced

Design and engineer a vehicle that is propelled by the energy stored in rubber bands. Make it go for distance, or stop with precision. Design it to go fast, or cross a difficult terrain. Rubber band racers can be easily redesigned/reconfigured, so every day you can have a different challenge. Learn by experiencing potential and kinetic energy, simple machines, friction, elasticity and ratios. Learn how friction can help, and hurt your racer.

SER1822-96
SER1822-95

Pack of 10 \$219.95
Each \$26.95

TeacherGeek - Wind Lift Activity

Experience the power of wind. Design and build a wind lift that can capture it. Wind lifts use energy from the wind to raise a bucket. Engineer it to lift a heavy load or raise the bucket with speed. Wind lifts make learning about wind power, energy, mechanical advantage, torque, work, and other scientific concepts fun and understandable.

SER1823-15
SER1823-14

Pack of 10 \$89.95
Each \$13.95

TeacherGeek - Wiggle Bot

Wiggle-Bots are motorized contraptions that are designed and built entirely by students. Watch eyes widen as wires are connected and Wiggle-Bots start to move. See how understanding and design evolves through experimentation and tinkering. Appreciate the challenge of going beyond step by step instructions and creating something completely new and innovative.

The Wiggle Bot includes a battery holder, motor with leads, gears, dowels, and motor mount. The Wiggle Bot Super includes the same resources, plus an additional hole plate, steal wire, connector strips, and screws and nuts.

Standard - Each \$23.95

TeacherGeek - Hydraulic Claw

Design and build a hydraulic claw that works like the ones in the arcade. Move the upper cylinder and watch your claw open and close below. We have documents to get you started, but the final claw design is up to you. Can you design a claw to pick up specific objects (worms, marshmallows, balls)?

SER1824-60
SER1824-59

Pack of 10 \$139.95
Each \$17.95

TeacherGeek - Electric Air Racer

Send this racer flying with an electric motor and propeller. Design it for speed by designing the frame and propeller blades. This activity requires materials from the recycling bin to create the propeller blades. Learn about electricity, blade angle, and propeller design, apply the scientific method and innovate (design, build and evolve your own unique design).

SER1824-66
SER1824-76

Pack of 10 \$129.95
Each \$17.95

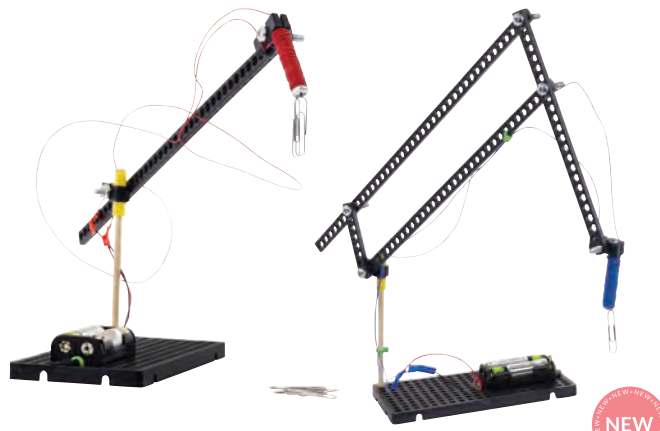

TeacherGeek – Land Sail Car

Design and engineer a vehicle that is propelled by the wind. This activity is perfect for early elementary groups. It allows students to quickly and easily experiment with sail shape, angle, and placement. Engineer a Sail Car that can go the greatest distance, travel the fastest, or carry the most weight. Learn about forces and motion by completing the optional Sail Car labs.

SER1824-67
SER1824-77

Pack of 10 \$99.95
Each \$16.95

TeacherGeek – Electromagnetic Crane

Design and build a crane that can best sort magnetic materials for recycling. Start by making and experimenting with an electromagnet, then create a crane to move it. Test the crane using the scientific method. Evolve the crane through the engineering design process.

SER1824-61
SER1824-71

Pack of 10 \$119.95
Each \$17.95

TeacherGeek – Advanced Ping Pong Projectile Launcher

Build your own Projectile Launcher with TeacherGeek – send ping pong balls flying, marking the trajectory and distance of your shots and targets. Redesign your launcher with greater accuracy and precision through the optional labs and graphing sheets, then compete in exciting design challenges.

SER1823-05
SER1823-04

Pack of 10 \$169.95
Each \$21.95

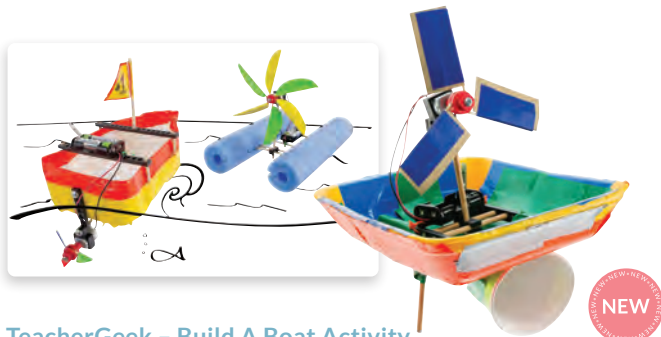

TeacherGeek – “Catch The Bug” The Ultimate Electronics Activity

The bug is a truly fantastic and meaningful electronics learning activity. Finished bugs run around the floor with their own personality. Bugs teach basic electronics through a physical interactive experience; an experience that yields deep and long lasting understanding.

SER1822-87
SER1822-86

Pack of 10 \$199.95
Each \$29.95

TeacherGeek – Build A Boat Activity

Use common materials to explore buoyancy and power! Design a working electric motor boat with this activity. Find your hull in the recycling bin (milk jug, foam tray, pool noodles, etc.). Add the motor, propeller and other components. Set it in the water and watch it go.

SER1822-99
SER1822-98

Pack of 10 \$149.95
Each \$19.95

TeacherGeek – Wind Pump Activity

The Wind Pump harnesses the energy created from wind to pump water. The wind-driven turbine powers a geared transmission that operates a hydraulic pump. This will move water from one level up to another. You will apply many scientific concepts such as calculating work, fluid mechanics, simple machines and aerodynamics. A stand is necessary and not included.

SER1823-19
SER1823-18

Pack of 10 \$399.95
Each \$53.95

At 3DuxDesign, we realise innovation is not only about maths and science but also art, design, the environment and people. We encourage students to imaginatively and practically think through solutions to real world problems by building structures and environments. A combination of connectors and geometric cardboard forms let students build anything they can imagine. The connectors are engineered to fit most cardboard so almost any shipping box can be transformed into building material. Suitable for students from the age of 4 and up.

3Dux - The Educational GOBOX including Cardboard

This specialty kit for educators comes with 400 assorted connectors, over 500 geometric cardboard forms, a full set of architectural rulers and the perfect storage case. Give your students' creativity a jumpstart and introduce your them to geometry and 3D spatial thinking. Add your own recycled cardboard for endless options.

DX002

\$299.95

Environmentally friendly construction sets

Why 3DuxDesign?

- Promoting STEAM education and real-world problem solving by offering an engaging product that blends science, maths, technology, engineering, art and creativity
- By incorporating sustainable and repurposed materials, 3DuxDesigns is an environmentally friendly construction set
- Perfect for schools, makerspaces, after-school STEM/STEAM programs and inventor clubs
- Includes a wide variety of freely accessible lesson plans and open-ended design challenges
- Use the high-quality 3DuxDesign geometric cardboard pieces, or use any of your spare cardboard boxes

3Dux - The GOBOX PRO - LED Lights

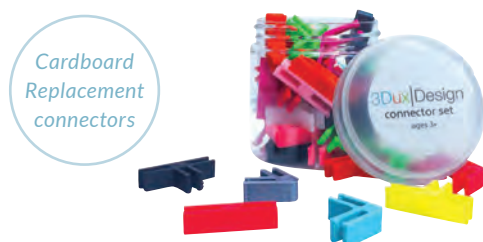

The Gobox Pro is the perfect product to engage students ages 6+ in learning about architecture, engineering and electricity. The lesson plan walks students through building and electrifying their very own models. Then reuse materials to light up all of your cardboard creations.

This kit includes:

- 400 assorted connectors
- Over 500 geometric cardboard shapes
- A full set of architectural rulers
- 10 LED lighting sets (each with 4 coloured LED bulbs, 2 alligator clips, 1 foot conductive tape, 1 battery holder, 1 toy dog)
- The perfect storage case

The Cool Tool

Wood Working

The Cool Tool Education

The Cool Tool offers a range of modular, innovative machines for model making, design and engineering, and prototyping. The woodworking machines are an ideal resource for STEAM projects and are great for makerspaces. From the fully operating workshop 'Playmat' suitable for students aged 4 and up, all the way to perfectly aligned 'Metal Line' for precision artworks, the Cool Tool offers machinery for early primary to end of high schools.

Playmat – 4in1 Woodworking Workshop

The Playmat – 4in1 Woodworking Workshop encourage creativity and technical understanding. The Playmat kit contains all the necessary parts for building up to 4 different, real working machines which can easily be assembled due to the well-designed component pieces and easy connection system. A special child-proof adaptor is included, to make this set suitable for ages 4 and up.

TCT9012

\$199.95

Includes

- Machine bed (280mm)
- Tailstock
- Drive Unit
- Drill, Drilling & Sanding Table
- Sanding Disk
- Tool Res
- 12V Safety adaptor
- Screw Driver
- Gouge
- Detailed instructions plans & suggestion
- Wood for turning and sawing to start instantly.

The child-friendly design makes Playmat suitable for students from the age of 4 and up!

Build 4 real working woodworking machines:

- Drill-press
- Wood lathe
- Jigsaw
- Sanding machine

Unimat 1 Elementary Kit – Woodworking

Unimat 1 is ideal to introduce students into the world of machine tools and woodworking. The machines have the same features as big industrial machines, the only differences are their size and the 12V drive. The Unimat 1 is fully modular and easy to set up. Included in the kit are the components for a jigsaw, variations of woodturning machines, a handheld and stationary sander and a handheld drilling machine.

This kit includes all the parts needed to build these machines:

- Wood turning lathe
- Jig saw
- Sanding machine
- Hand drill or sander

TCT1601

\$599.95

Assorted Wooden Dowels incl Centerhole

A set of 24 wooden dowels to use with you're the Cool Tool machinery. The pieces are made of Lime wood and include 17 pieces of 2cm in diameter and 7 pieces of 3cm in diameter. With centre hole.

TCT3120

\$29.95

Unimat ML – Design & Technology Kit

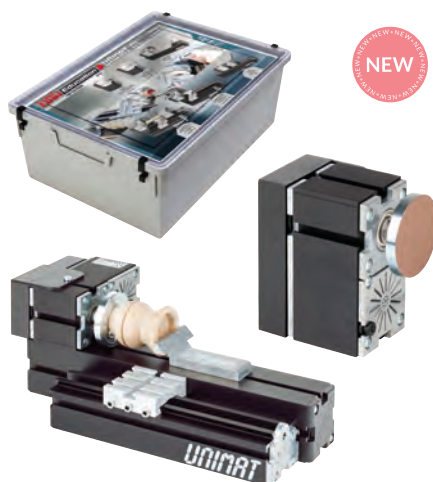

The Metal Line design is ideal for intensive usage in the classroom, and adds precision and perfect alignment. Included in the kit are the components for a jigsaw, for variations of wood turning machines (incl 3-jaw chuck), for a hand-held sander or a stationary sander and for a hand-held drilling machine. STEM activities support and strengthen the learning dispositions.

This kit includes all the parts needed to build these machines:

- Wood turning lathe
- Jig saw
- Sanding machine
- Hand drill or sander

TCT6015

\$999.95

Balsa Wood – Assorted Pieces

"A collection of varied sizes of balsa wood. This kit includes glue so students get started with their projects right away! Students can use these for construction in the classroom or art projects.

Pack Includes:

- 3 of 1.5 x 100 x 450mm
- 3 of 3.0 x 75 x 450mm
- 2 of 5.0 x 75 x 450mm
- 4 of 9.5 x 450mm Squares
- 1 Tube of Glue"

DC51629

\$20.95

Grove

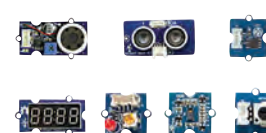

Grove is a modulated, ready-to-use tool set. It takes a building block approach to assembling electronics. Compared with the traditional, complicated learning method of using breadboards and various electronic components to assemble a project, Grove simplifies this learning process significantly. The Grove System consists of a base shield and a wide variety of input and output modules. Simply connect the grove modules via the base shield to a microprocessors such as micro:bit or Arduino for endless coding and science projects.

Powered	Programming Language/Software	Operating Systems	Age Group Years 7+
	(GRV6024 & GRV6130) (GRV0762)		

Why Grove?

- Uniform Interface, plug-and-play, no soldering required
- Perfect for prototyping, without the need for soldering or complex wiring
- Detailed documentation, electronics background is not required
- Various function modules including display, motion detect, communication, environment, and robot
- Grove is now compatible with most development platforms including Arduino, Raspberry Pi, micro:bit and more!

~~\$1,414.45~~
\$1,159⁹⁵
 Save \$254.50

Kit includes

- Grove Shield for Micro:bit
- Grove Rotary Angle Sensor
- Grove Speaker
- Grove Ultrasonic Ranger
- Grove Light Sensor v1.2
- Grove WS2812 Waterproof LED Strip - 30 LEDs 1 meter
- Grove Gesture
- Grove 4-Digit Display
- Grove Red LED
- Micro USB Cable - 48cm
- 12 Projects Manual
- Alligator Cable
- Grove Cable

Grove Inventor Kit for micro:bit

The Grove Inventor kit for micro:bit brings endless possibilities to your micro:bit. The Grove shield for micro:bit makes it easy to connect your micro:bit to all of the grove components, including sensors, displays and actuators. Please note: micro:bit is not included in GRV0762, but is included in GRV0762K and GRV0762-10K.

Boson

Boson is a set of modular electronic building blocks designed for young inventors and STEAM teachers, to provide a visual way to make math and science subjects fun in the classroom. The colour-coded modules make it easy to identify input and output modules. Boson can be used completely coding-free, or use it with the Expansion board for micro:bit to program the modules. With sensors, actuators, logic gates and more, there are infinite possibilities for endless learning.

Powered	Programming Language/Software	Operating Systems	Age Group
	code-free or with		Years 4+

Why Boson?

- Plug and play – Boson modules are connected through flexible cables, requiring no soldering
- Hook up to everything: Boson modules are magnetic. Stick them on a whiteboard or other magnetic objects, or screw them onto something with the mounting plates. LEGO compatible.
- Tutorials and lesson plans are available.
- Start with Boson free of coding, or upgrade to platforms such as micro:bit to make Boson programmable
- Digitalised scientific exploration – the Boson platform includes a series of industrial standard sensors, for entry level scientific experiments, unattended environmental monitoring or upload data to an IoT server

Boson Starter Kit for micro:bit

Build your own programmable project with micro:bit! The Starter Kit for micro:bit comes with 8 modules and 4 quick start project cards, plus a 12-project tutorial from beginner to advanced. The micro:bit expansion board is used to hook up the Boson modules to micro:bit.

DFR086 Starter Kit \$109.95
DFR086K Starter Kit & micro:bit \$129.95

Kit includes

- 1x micro:bit expansion board for Boson kit
- 1x Red Push Button
- 1x Red LED Light
- 1x Rotation sensor
- 1x Sound Sensor
- 1x Motion sensor
- 1x Mini Fan Module
- 1x Mini Servo
- 1x RGB LED strip
- 1x Micro USB Cable
- 1x 3-Pin Cable (Long)
- 1x 3-Pin Cable (Medium)
- 1x 3-Pin Cable (Short)
- 1x Quick Start Guide

Boson – Expansion Board for micro:bit

The expansion board for micro:bit allows you to hook up all your Boson modules to micro:bit. This makes your Boson modules programmable! micro:bit is not included and sold separately.

DFR521 \$19.95

Use Boson with micro:bit

50+ colour coded electronic modules for infinite possibilities

Tutorials & course materials for both learners & educators

Attachable to Lego blocks, Velcro pads, screws & whiteboards

Digitized scientific exploration

Start with coding free; upgradable to micro:bit & Arduino.

Plug & play design with unifying safe & secure connection

Boson Science Kit

The Boson Science Kit includes 8 scientific sensors that are most widely used in modern IoT applications, for physics, chemistry and biology. It includes activity cards to start your scientific exploration on 8 different topics. The plug and play monitor shows instant results and measurements.

DFR034 Set of 8 \$229.95

Boson

Boson – Enviromental Science Kit

This kit includes a range of Boson modules to experiment with science activities. Included in the kit (DFR011K) is one of each: expansion board for micro:bit, temperature sensor, pH sensor, light sensor, soil moisture sensor, humidity sensor, waterproof sensor, OLED module, red, green and blue LED module, cable pack (pack of 30) and a battery holder. The kit is also available with a micro:bit included (DFR011K-M).

DFR011K	Kit without micro:bit	\$299.95
DFR011K-M	Kit with micro:bit	\$309.95

Kit includes one of each:

DFR011	Temperature Sensor – Input	\$19.95
DFR039	pH Sensor – Input	\$99.95
DFR004	Light Sensor – Input	\$10.95
DFR038	Soil Moisture Sensor – Input	\$10.95
DFR041	Humidity Sensor – Input	\$26.95
DFR042	Waterproof Sensor – Input	\$16.50
DFR044	OLED Module – Output	\$55.95
DFR017-R	Red LED Module – Output	\$10.95
DFR017-G	Green LED Module – Output	\$10.95
DFR017-B	Blue LED Module – Output	\$10.95
DFR521	Expansion Board for Microbit	\$19.95
DFR525	Cable Pack	\$16.95
DFR529	3x AA Battery Holder	\$9.95

Boson – Essential Input & Output Modules Kit

This kit includes the most popular Boson modules, which can be used on their own or as an add-on set to your existing Boson range. The kit (DFR002K) includes one of each: expansion board for micro:bit, blue, red and yellow push buttons, self locking switch, buzzer, fan, voice recorder, motor, servo motor, multicolour string light, cable pack of 30 and a battery holder. Also available with a micro:bit included (DFR002K-M).

DFR002K	Kit without micro:bit	\$189.95
DFR002K-M	Kit with micro:bit	\$219.95

Kit includes one of each:

DFR002-B	Blue Push Button – Input	\$10.95
DFR002-R	Red Push Button – Input	\$10.95
DFR002-Y	Yellow Push Button – Input	\$10.95
DFR003	Self Locking Switch – Input	\$10.95
DFR020	Buzzer Module – Output	\$10.95
DFR021	Fan Module – Output	\$16.50
DFR022	Voice Recorder Module – Output	\$19.95
DFR024	Motor Module – Output	\$19.95
DFR025	Servo Module – Output	\$21.95
DFR019	Multicolour String Light – Output	\$26.95
DFR521	Expansion Board for Microbit	\$19.95
DFR525	Cable Pack	\$16.95
DFR529	3x AA Battery Holder	\$9.95

Boson – Science Modules Kit

Perform science and physics activities with this Boson kit. The kit (DFR001K) includes one of each: expansion board for micro:bit, rotation sensor, tilt sensor, touch sensor, sound sensor, infrared proximity sensor, conductivity sensor, motion sensor, heart rate monitor, ultrasonic sensor, bright LED light, cable pack of 30 and a battery holder. Also available with a micro:bit included (DFR001K-M).

DFR001K	Kit without micro:bit	\$239.95
DFR001K-M	Kit with micro:bit	\$249.95

Kit includes one of each:

DFR001	Rotation Sensor – Input	\$10.95
DFR005	Tilt Sensor – Input	\$10.95
DFR008	Touch Sensor – Input	\$10.95
DFR009	Sound Sensor – Input	\$10.95
DFR010	Infrared Proximity Sensor – Input	\$19.95
DFR012	Conductivity Sensor – Input	\$10.95
DFR013	Motion Sensor – Input	\$24.95
DFR043	Heart Rate Monitor Sensor – Input	\$43.95
DFR045	Ultrasonic Sensor – Input	\$59.95
DFR016	Bright Light LED – Output	\$10.95
DFR521	Expansion Board for Microbit	\$19.95
DFR525	Cable Pack	\$16.95
DFR529	3x AA Battery Holder	\$9.95

Makey Makey

Makey Makey is the ultimate STEAM invention kit that works through opening and closing circuits.

Turn everyday objects into touchpads and combine them with the Internet.

Connect the circuit board via alligator clips to anything and everything that conducts electricity to create a circuit. Connect the circuit board to your laptop or PC and let the connected conductive materials take over your computer!

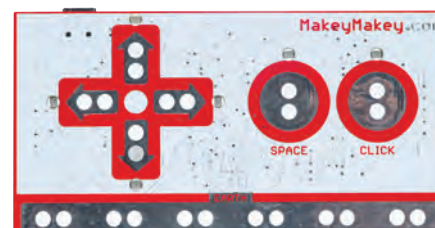

Connection

Age Group
**Years
3-8**

Why Makey Makey?

- No software or prior programming knowledge required. Just plug, clip, play, invent. Works with Mac and Windows
- Connect the world around you to your computer! Setup takes just seconds.
- 1000s of possibilities! Find endless lesson plan ideas, project ideas and inspiration online
- Works with any material that can conduct at least a tiny bit of electricity

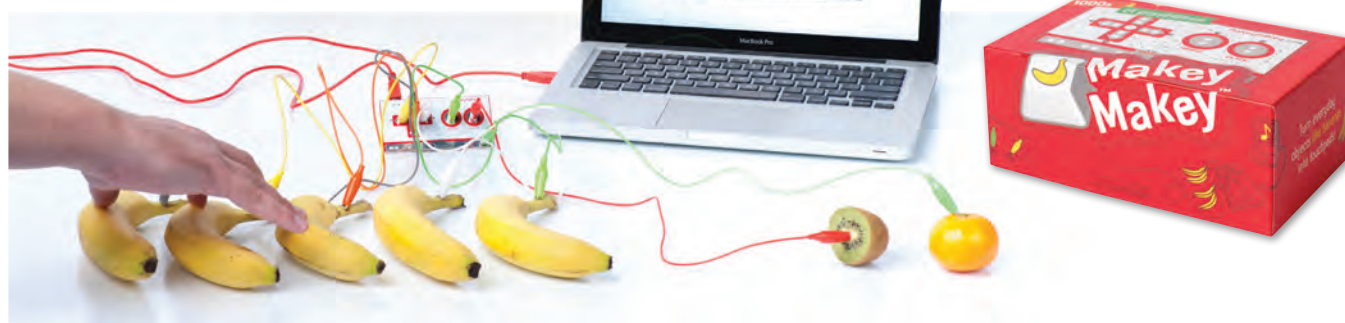

Makey Makey Classic

Each kit includes the Makey Makey Board, USB Cable, 7 Alligator Clips, 6 Connector Wires, Instructions with Visual Project Start Guide, Online Documentation, and 20 Colour Stickers. Connects via USB (Not compatible with iPads or tablets).

Makey Makey STEM Pack

– Classroom Invent Kit

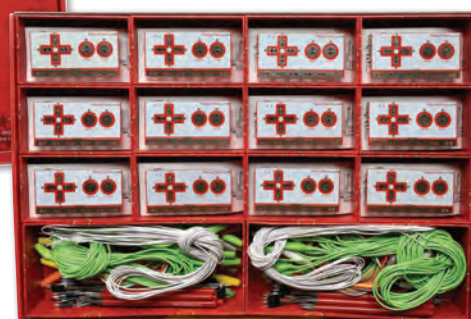

Perfect for classrooms, schools, districts, workshop teachers, and anyone else that wants all their Makey Makeys in a really nicely organised briefcase. The Makey Makey STEM Kit is a distillation of 12 Makey Makeys, 12 booster packs and some extra parts for when you want to invent something even bigger. Contents:

- 12 Makey Makey Classics
- 12 Alligator Clips
- 12 Connector Wires
- 72 Extra Alligator Clips
- 144 Connector Wires (for the back)
- 12 Makey Makey-Optimised Conductive 6B Pencils

Arduino Education

Arduino Education

Arduino Education is focused on developing the next generation of STEAM systems and supporting the needs of educators and students throughout the educational journey. Arduino Edu has developed classroom kits suitable for end of primary and high schools, with learning paths for individual and collaborative educational approaches. Whether you are new to electronics and want to introduce physical computing and computational thinking to your classroom, or a university professor skilled in electronics, Arduino has a suitable kit for you.

Powered	Connection	Programming Language/Software	Operating Systems	Age Group
 		Code-free (ARD0014) or  (ARD0076 & ARD0101)	     	Years 6-12

Why Arduino Education?

- Arduino Education is on a mission to make technology accessible to everyone, and into the hands of every student and educator.
- Arduino Education is focused on creating the next generation of STEAM programs – integrating Science, Technology, Engineering, Arts and Maths – while supporting the needs of teachers and students throughout the educational journey.
- Arduino Education offers solutions for the classroom, kits, bundles, and boards with learning paths for individual and collaborative educational approaches.
- Learners explore Arduino Education in a hands-on, constructive way as they work through the kits and explore the creative capabilities of each board.

Arduino Edu – Starter Kit – Classroom Pack

The Arduino Starter Kit Classroom Pack is a bundled solution, containing six of the popular Arduino Starter Kits. Suitable for least twelve students for middle school onwards. Each kit contains an Arduino Uno Rev 3 board, a collection of sensors and actuators, and a guide book which will help students and teachers to take their first steps into the world of electronics, with interactive and sensing objects. Please refer to our website for a full list of components included in each kit.

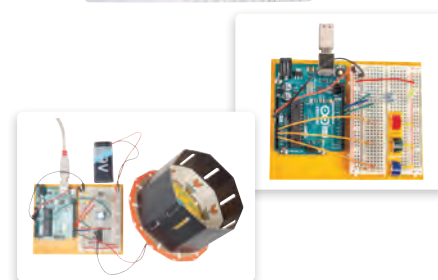

ARD0076

\$849.95

Key Features:

- Learn the fundamentals of programming and electronics
- Introduction to sensors and actuators
- Understanding digital and analogue signals
- Critical thinking, collaborative learning and problem solving

NEW

Arduino Edu – CTC 101

This modular STEAM program consists of a toolbox with over 25 cross-curricular projects and experiments, an online platform, and guided educators support.

The 5 themed modules introduce students to programming and coding, serial and wireless communication, robotics, power systems, motors, actuators, analogue and digital systems, and advanced sensors. It covers technology, maths and physics, but educators are also encouraged to apply art, woodwork, sewing, civics, language arts, etc.

ARD0101

\$3,299.95

Key Features:

- Includes all components needed for a class of 30 students
- Receive access to the online platform for 2 consecutive years, including training, webinars and online community
- Learn about the fundamentals of programming and electronics

NEW

Arduino Edu – Science Kit Physics Lab

This kit is developed for scientific exploration for students in years 6-8. Developed in partnership with Google, it is an Arduino-based physics lab, fully compatible with Google Science Journal available on Android. The kit features a range of sensors to measure light, temperature, motion, magnetic fields and full access to online course content for teachers and students.

ARD0014

\$299.95

Key Features:

- Experiment with electromagnetism and thermodynamics, kinetics and kinematics, forces, motion, magnetism, and conductivity
- Includes exclusive access to online educational materials
- Includes Arduino MKR WiFi 1010 and a wide range of sensors

NEW

Circuit Scribe

Let your creativity merge with science as you build exciting circuits using our Circuit Scribe Kit's conductive ink pen, magnetic modules, and plain old printer paper. By placing the paper over a steel sheet, included in every kit, your paper becomes the base for blinking lights, beeping buzzers, and whirling motors. Everything you need to create dynamic and fun paper circuits. Find the exact contents of each kit on our website.

Powered

Age Group
Years
3+

Why Circuit Scribe?

- Draw circuits instantly with a conductive ink pen that dries instantly
- Build simple circuits or complicated devices from basic switches to your own pen on paper machines
- Educator friendly kits teach circuitry concepts from current flow to digital logic
- Use your skills to make anything from interactive art to interactive paper devices while having fun

Circuit Scribe Ultimate Kit – 16 Modules & 10 Connecting Cables

Everything you need to create dynamic and fun paper circuits. The kit features 10 magnetic connection cables that let you hook up your paper circuits to programmable platforms like Arduino (not included). The kit includes everything from our Maker Kit plus extra LEDs, two DPDT switches, and a motor (see our website for full list). With the Ultimate Kit, you can make complex, robust circuits.

\$179.95

Squishy Circuits

Squishy Circuits uses conductive and insulating play dough to teach the basics of electrical circuits, a perfect blend of play and learning! Our play dough kits, projects, and recipes teach problem solving and engineering concepts and inspire creativity and independent thinking.

Powered

Age Group
Years
K-5

Why Squishy Circuits?

- Squishy Circuits are a design tool that allows everyone, from young students through to adults, to create circuits and explore electronics using play dough
- A perfect combination of science, technology, art and design
- Squishy Circuits makes learning about electricity and circuits accessible, and adding on to or expanding your sets can be done with easily available components

Squishy Circuit Standard Kit

The standard kit includes everything you need to get started with some more advanced Squishy Circuits projects that use LEDs, buzzers, and insulating dough! Contents:

- 1 x Battery Holder
- 1 x Piezoelectric Buzzer
- 25 x LEDs (5 each of Red, Green, White, Yellow, Blue)
- 1 x 3.5oz Container of Insulating Dough
- 3 x 3.5oz Containers of Conductive Dough (in Red, Green, and Blue)

EL9350

\$69.95

Squishy Circuit Standard Kit

The deluxe kit is our most complete Squishy Circuits kit. It comes with more items than the standard kit and comes with pre-made doughs so you can start circuit building right away! This kit also includes a deluxe battery holder, which has a knob that allows your lights to blink and buzzers to beep at different speeds. Contents:

- 1 x Deluxe Battery Holder
- 1 x Piezoelectric Buzzer
- 1 x Motor with Fan
- 1 x Mechanical Buzzer
- 1 x Switch
- 40 x LEDs (5 each of Red, Green, White, Yellow, Blue, Purple, Orange, and Colour Changing)
- 1 x Set of Dough Sculpting Tools
- 1 x Rolling Pin
- 1 x 7-Ounce Container of White Insulating Dough
- 7 x 7-Ounce Containers of Conductive Dough (in Red, Blue, and Green, Yellow, Orange, Purple, and Black)

Smart Q Sensors

Data Logger Smart Q Sensors

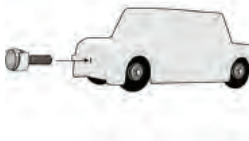

Award winning SmartQ technology offering uncompromised levels of accuracy and reliability. With over 50 sensors to choose from, there's a sensor available for almost all scientific experiments.

SER3201	Accelerometer (High G)	The sensor has two measurement axis, the x axis (along the length of the sensor) and the y axis (across the width of the sensor). A resultant range combines the readings of both axis to create a change of force sensor. The high g sensor measures forces in the range of $\pm 40g$ or $0 - 500 \text{ ms}^{-2}$. Ideal for measuring the forces in collisions between Data Harvest dynamics carts. Teaching applications: Force changes in collisions, Showing equal and opposite forces in collisions	\$199.95
SER3200	Accelerometer (Low G)	The sensor has two measurement axis, the x axis (along the length of the sensor) and the y axis (across the width of the sensor). A resultant range combines the readings of both axis to create a change of force sensor. The low g sensor measures forces in the range of $\pm 10.0 g$ or $\pm 100.0 \text{ ms}^{-2}$. Ideal for measuring the forces in collisions between Data Harvest dynamics carts. Teaching applications: Force changes in collisions, Showing equal and opposite forces in collisions	\$199.95
SER3297PK	Anemometer Pack	This pack contains an Anemometer and Count Tachometer adaptor. The Anemometer is constructed using a high-quality ball bearing, stainless steel hardware, UV stable plastic, and durable anodized aluminium hemispherical cups that are weight matched. The Anemometer uses a double contact reed switch, so counts twice for each complete rotation. Teaching applications: Weather, Air Speed	\$299.95
SER3190PK	Breathing Rate Belt & Pressure	The SmartQ $\pm 10\text{kPa}$ Differential Gas Pressure sensor (3139) and Breathing Rate belt (3190) in this pack are used together to measure the expansion and contraction of a person's chest while they breathe. The Breathing Rate belt is wrapped around a person's chest region. Fitted inside the Belt is an inflatable air bladder, which is moulded to two rubber tubes. One of these tubes finishes with a hand pump bulb that is used to inflate the air bladder. The other tube is attached to the Gas Pressure Sensor which monitors the change in pressure during breathing.	\$229.95
SER3152	Carbon Dioxide Sensor (CO ₂)	Measure and record the carbon dioxide changes in the environment. The sensor is designed and optimised to measure carbon dioxide levels found in the air around photosynthesising plants and small, respiring animals. The unique disc shape lets the sensor become the lid for respiration chambers or placed on a desk without the need for clamps and stands.	\$499.95
SER3268	Charge Sensor	Used to measure the amount of charge on a source when the charge available is very small as in many electrostatic experiments. It can replace a traditional gold leaf electroscope by showing not only the polarity of the charge but also performing measurements. It can also measure the potential difference between two points.	\$229.95

SER3135	Conductivity Adaptor	The Smart Q Conductivity adaptor enables a Conductivity electrode to be connected to an EasySense data logging unit. The EasySense data logging unit will detect when the Conductivity adapter is connected and which of the ranges it is set to. The Smart Q Conductivity Sensor is used to measure the conductivity of a solution. The Conductivity electrode is a simple epoxy-bodied carbon (graphite plate) type selected for its durability in field use. It is ideal for measuring salinity and changes in conductivity of a water sample. It can be used by chemists for investigating the difference between ionic and molecular compounds in an aqueous solution.	\$99.95	
SER3136	Conductivity Electrode	The Conductivity electrode is manufactured from epoxy and has graphite plate electrodes. This construction offers good durability in field use. It is ideal for measuring salinity and changes in conductivity of a water sample. The sensor cannot identify the specific ions that are present, but it can be used to determine the total concentration of ions in a sample. Teaching applications: Ionic studies, Titrations, Polar non polar solutions, Diffusion across membranes.	\$99.95	
SER3260	Crocodile Clips (Pair)	A Crocodile clip lead is normally used attached to a home-made or commercial push to make switch. They can be used singly or in pairs to provide timing and event monitoring.	\$29.95	
SER3166	Current - 100mA	Use in conjunction with voltage sensors to investigate Ohm's law, power and circuits. This high range sensor is very good for measuring start up current in incandescent, filament lamps and for studying fuses. For smaller currents use the 100 mA or 1A sensors.	\$99.95	
SER3167	Current - 10A	Use in conjunction with voltage sensors to investigate Ohm's law, power and circuits. This high range sensor is very good for measuring start up current in incandescent, filament lamps and for studying fuses. For smaller currents use the 100 mA or 1A sensors.	\$99.95	
SER3165	Current +-1A	Use in conjunction with voltage sensors to investigate Ohm's law, power and circuits. This high range sensor is very good for measuring start up current in incandescent, filament lamps and for studying fuses. For smaller currents use the 100 mA or 1A sensors.	\$99.95	
SER3160	Differential Voltage, +- 20V	This Voltage sensor measures the potential difference across any component for both DC and low voltage AC circuits. The 4 mm plugs attach to most of the standard available electronic kits. This sensor can be used anywhere within a circuit.	\$79.95	
SER3161	Differential Voltage, 0-10V	This Voltage sensor measures the potential difference across any component for both DC and low voltage AC circuits. The 4 mm plugs attach to most of the standard available electronic kits. This sensor can be used anywhere within a circuit.	\$79.95	
SER3160-12	Differential Voltage, 12V	This Voltage sensor measures the potential difference across any component for both DC and low voltage AC circuits. The 4 mm plugs attach to most of the standard available electronic kits. This sensor can be used anywhere within a circuit.	\$79.95	

Smart Q Sensors

SER3162	Differential Voltage, 1V	This Voltage sensor measures the potential difference across any component for both DC and low voltage AC circuits. The 4 mm plugs attach to most of the standard available electronic kits. This sensor can be used anywhere within a circuit.	\$79.95	
SER3266	Drop and Bubble Counter	This sensor offers exceptional value as it performs a dual role. In Chemistry its primary role is as a drop counter measuring accurately the volume of titrant added during a titration. However, this sensor can be used to monitor bubbles produced during gas production from either a chemical reaction or a biological process.	\$199.95	
SER3800	Dynamics System	This self-assembled, matt black anodized 1.2 m aluminium incline track and support pillar comes with a low friction cart with its interrupt card and various brackets to form a high quality modular dynamics track. This self-assembled, matt black anodized 1.2 m aluminium incline track and support pillar comes with a low friction cart with its interrupt card and various brackets to form a high quality modular dynamics track. SmartQ sensors are aligned easily to give reliable, repeatable accurate results. Designed for use with SmartQ Light Gates, Motion sensor, Rotary Motion sensor, Spoked Pulley, Force Sensor, Laser module and Light Level sensor.	\$399.95	
SER3801	Dynamics System Extension Pack	This self-assembled, matt black anodized 1.2 m aluminium incline track and support pillar comes with a low friction cart with its interrupt card and various brackets to form a high quality modular dynamics track. This self-assembled, matt black anodized 1.2 m aluminium incline track and support pillar comes with a low friction cart with its interrupt card and various brackets to form a high quality modular dynamics track. SmartQ sensors are aligned easily to give reliable, repeatable accurate results. Designed for use with SmartQ Light Gates, Motion sensor, Rotary Motion sensor, Spoked Pulley, Force Sensor, Laser module and Light Level sensor.	\$199.95	
SER3821	Dynamics System, Cart Only	This self-assembled, matt black anodized 1.2 m aluminium incline track and support pillar comes with a low friction cart with its interrupt card and various brackets to form a high quality modular dynamics track. This self-assembled, matt black anodized 1.2 m aluminium incline track and support pillar comes with a low friction cart with its interrupt card and various brackets to form a high quality modular dynamics track. SmartQ sensors are aligned easily to give reliable, repeatable accurate results. Designed for use with SmartQ Light Gates, Motion sensor, Rotary Motion sensor, Spoked Pulley, Force Sensor, Laser module and Light Level sensor.	\$59.95	

SER3802	Dynamics System, Track Only	This self-assembled, matt black anodized 1.2 m aluminium incline track and support pillar comes with a low friction cart with its interrupt card and various brackets to form a high quality modular dynamics track. This self-assembled, matt black anodized 1.2 m aluminium incline track and support pillar comes with a low friction cart with its interrupt card and various brackets to form a high quality modular dynamics track. SmartQ sensors are aligned easily to give reliable, repeatable accurate results. Designed for use with SmartQ Light Gates, Motion sensor, Rotary Motion sensor, Spoked Pulley, Force Sensor, Laser module and Light Level sensor.	\$229.95
SER3279	E.C.G	The ECG sensor measures the electrical energy generated during a heartbeat. To record the classic PQRST wave, the sensor's three electrodes can be attached to the skin of the user's forearms using disposable ECG patches.	\$249.95
SER3286	ECG Patches	The sensor is supported with a comprehensive user guide (available from the Resources tab). Each sensor is supplied with a pack of 100 disposable ECG electrode patches.	\$39.95
SER3143	Force Sensor	This sensor features safety stops and a solid aluminium housing, making it a useful device for measuring push and pull (bi-directional) forces in a broad $\pm 50N$ range.	\$199.95
SER3142	Gas Pressure – Absolute 700kPa	Measures the absolute pressure of the system it is connected to. Range of 0 – 700kPa making it ideal for Boyle's law. Single port absolute pressure.	\$149.95
SER3210	Gas Pressure – Absolute, Barometer, Altimeter	Measures the absolute pressure of the system it is connected to. Range of 0 – 700kPa making it ideal for Boyle's law. Single port absolute pressure.	\$159.95
SER3138	Gas Pressure Accessory Pack	Measures the absolute pressure of the system it is connected to. Range of 0 – 700kPa making it ideal for Boyle's law. Single port absolute pressure.	\$49.95
SER3139	Gas Pressure, Differential 10kPa	This sensor measures the differential pressure between its two ports. If one port is open to the atmosphere then the sensor measures pressure relative to the atmospheric pressure. With both ports open to the atmosphere, the reading is 0. Blowing into one port will produce a positive value, whereas blowing into the other port will produce a negative value.	\$149.95
SER3141	Gas Pressure, Differential 200kPa	This sensor measures the differential pressure between its two ports. If one port is open to the atmosphere then the sensor measures pressure relative to the atmospheric pressure. With both ports open to the atmosphere, the reading is 0. Blowing into one port will produce a positive value, whereas blowing into the other port will produce a negative value.	\$149.95
SER3265	Geiger Müller	The Geiger Muller sensor is used to monitor Alpha, Beta and Gamma radiation.	\$729.95
SER3147	Heart Rate and Pulse Waveform	Continuously monitor the heart rate at rest and after exercise. Simple finger clip design uses infrared to monitor blood volume in fingers and calculate heart rate.	\$149.95

Smart Q Sensors

SER3147SPP	Heart Rate, Pulse Ear, Spare Part	Continuously monitor the heart rate at rest and after exercise. Simple finger clip design uses infrared to monitor blood volume in fingers and calculate heart rate.	\$19.95	
SER3145	Humidity	This sensor measures water vapour content relative to the ambient temperature.	\$149.95	
SER3278	Infrared	All warm objects emit infrared radiation. This sensor, therefore, can be used to detect the location of any warm item or living organism. When set to its most sensitive mode, the sensor can detect very low IR emissions, such as the heat trail left on a bench top after you move your hand away.	\$249.95	
SER3107	K-Type Thermocouple	The wide temperature range of this sensor enables it to be used in a variety of experiments e.g. melting points and flame profiles.	\$59.95	
SER3285	Laser Module	This solid-state Laser module draws power from an EasySense logger to produce a red light of 645 to 665 nm wavelength	\$149.95	
SER3250	Light Gate (Each)	The Light Gate has an infrared transmitter and receiver that will detect an object passing through the 'gate'. They can be used singly or in pairs for time, speed, velocity, acceleration and event monitoring. Designed to work seamlessly with the Data Harvest Dynamics system and timing part of the EasySense software. Ideal for all your dynamics / mechanics / kinematics work.	\$99.95	
SER1113210A	Light Gate Spare Rod	The Light Gate has an infrared transmitter and receiver that will detect an object passing through the 'gate'. They can be used singly or in pairs for time, speed, velocity, acceleration and event monitoring. Designed to work seamlessly with the Data Harvest Dynamics system and timing part of the EasySense software. Ideal for all your dynamics / mechanics / kinematics work.	\$4.95	
SER3124	Light Level, Multi Range	A light sensor that is balanced to the human eye spectral response. 5 ranges to cover 0 - 100,000 lx and a transmission range for home made colorimeters. One of the essential sensors for data logging.	\$129.95	
SER3172	Magnetic Field 100mT	Explore the nature and strengths of magnetic fields of solenoids and permanent magnets with this robust sensor which houses two switchable Hall effect transducers to measure accurately both Radial and Axial magnetic fields.	\$149.95	
SER3170	Magnetic Field 10mT	Explore the nature and strengths of magnetic fields of solenoids and permanent magnets with this robust sensor which houses two switchable Hall effect transducers to measure accurately both Radial and Axial magnetic fields.	\$149.95	
SER3270	Motion Sensor	The Motion sensor can capture the motion of running students, falling basketballs and carts on inclined planes. Featur-ing an industry leading sample rate of 50Hz, this sensor works well with the Dynamics System or Dynamics Track.	\$249.95	
SER3130	Oxygen Adaptor	This adaptor is used in conjunction with the Oxygen Electrode to form the dual range Oxygen sensor, capable of measur-ing oxygen levels in air, or dissolved oxygen levels in water.	\$119.95	

SER3125	pH Adaptor	This adaptor is used in combination with a pH electrode to form the immensely popular pH sensor. The Smart Q pH sensor has both a pre-set calibration range (so the sensor is ready for immediate use in Chemistry or Biology) and a user calibration range.	\$119.95	
SER1113206	pH Electrode	Electrode for the Data Harvest pH sensor.	\$88.95	
SER3274	Polar Heart Rate Belt, Large	Wireless connectivity between the sensor and the data logger make this an ideal sensor to monitor heart rate during exercise. This sensor consists of a belt that is worn around the ribcage against the skin, and a receiver that is connected to the logger. The transmitter can be up to 80 cm from the receiver.	\$19.95	
SER3273	Polar Heart Rate Belt, Small, for 1113290	Wireless connectivity between the sensor and the data logger make this an ideal sensor to monitor heart rate during exercise. This sensor consists of a belt that is worn around the ribcage against the skin, and a receiver that is connected to the logger. The transmitter can be up to 80 cm from the receiver.	\$19.95	
SER3148	Polar Heart Rate Exercise Sensor	Wireless connectivity between the sensor and the data logger make this an ideal sensor to monitor heart rate during exercise. This sensor consists of a belt that is worn around the ribcage against the skin, and a receiver that is connected to the logger. The transmitter can be up to 80 cm from the receiver.	\$199.95	
SER3261	Push Button Reaction Switch	Fitted with a red LED, a pair of these switches can be used to test students' reaction times. One switch can also be used for manual marking of events during data logging activities.	\$39.95	
SER3298	Rain Gauge	This is a 'tipping bucket' type rain gauge. As rain falls the water runs down through the collecting funnel into a self-emptying spoon which tips and empties each time the equivalent of 1 mm of rain has fallen. Total rainfall is measured by counting how many times the bucket tips.	\$119.95	
SER3298PK	Rain Gauge Pack	This is a 'tipping bucket' type rain gauge. As rain falls the water runs down through the collecting funnel into a self-emptying spoon which tips and empties each time the equivalent of 1 mm of rain has fallen. Total rainfall is measured by counting how many times the bucket tips.	\$229.95	
SER3159	RF Electrosmog Sensor	The RF Electrosmog sensor is a broad bandwidth RF detector. It can detect RF over the frequency range 50 MHz to 3 GHz.	\$129.95	
SER3280	Rotary Motion	This 8 range sensor is a must for every Physics department. It is highly accurate and capable of measuring a variety of motions including: Linear displacement by using any of the pulley ranges or the linear rack attachment (from the Rotary Motion Accessory Pack. Linear displacement by using any of the pulley ranges or the linear rack attachment (from the Rotary Motion Accessory Pack. Angular velocity using either the revolutions or radians per second range.	\$329.95	
SER3288	Rotary Motion Accessory Pack	See the Rotary Motion Accessory Pack which contains a linear rack attachment, pendulum rod with 2 masses and an angular motion disc set.	\$149.95	

Smart Q Sensors

SER3473	Solar Photovoltaic Set	A solar panel (photovoltaic cell) has special components that transfer the sun's radiation directly into electricity. This set includes the solar panel, a motor box, a buzzer box and a LED box so you can explore power-ing these components using the electricity generated by the photovoltaic cell	\$149.95	
SER3472	Solar Water Heater Set	The solar water heater will absorb energy from the sun and rapidly use it to heat water. This easy to use set includes a solar water heater and digital thermometer in a plastic case. It can be used outdoors in the sun or indoors with a desk lamp. This set can be used as it is or you can add a data logger and Temperature sensor to monitor how long it takes for the water to get hot, and what happens when it's cloudy. A Light level sensor will record changes in sun conditions so this can be compared with the rise in temperature.	\$149.95	
SER3175	Sound Level	Dual range sensor that accurately measures both sound pressure level in decibels (dBA) or waveform (mV).	\$119.95	
SER3267	Spirometer	A spirometer that is portable, small, compact and needs no special gases or water. The hand held unit measures air flow by pressure difference. A utility in the Easysense software converts flow data to volume data. You can measure lung capacities, flow volume loops and lung ventilation efficiency	\$249.95	
SER3269	Spirometer Filters	A spirometer that is portable, small, compact and needs no special gases or water. The hand held unit measures air flow by pressure difference. A utility in the Easysense software converts flow data to volume data. You can measure lung capacities, flow volume loops and lung ventilation efficiency.	\$59.95	
SER3264	Spirometer Nose Clips	A spirometer that is portable, small, compact and needs no special gases or water. The hand held unit measures air flow by pressure difference. A utility in the Easysense software converts flow data to volume data. You can measure lung capacities, flow volume loops and lung ventilation efficiency.	\$29.95	
SER3177	Spoked Pulley	This precision 10 segment, low friction pulley produces excellent results in a Physics lab. It can be attached to a Light Gate, Rotary Motion Sensor or used with the Dynamics System.	\$26.95	
SER3176PK	Stethoscope Sensor Pack	The Stethoscope sensor allows you to record the heart sounds and the echoes of the beat in the circulation. With the addition of an ECG sensor and a Heart wave sensor a full physiology of the heart cycle can be recorded and analysed.	\$109.95	
SER3296	Tachometer Adaptor	Counts pulses and presents the data as either a number of events or a rate value. 11 ranges to select. The adaptor has two inputs, one for SmartQ digital sensors (light gates, push switches), and the other for simple switches (user created) terminating in a 3.5mm jack plug.	\$99.95	
SER3100	Temperature (Stainless)	This general-purpose temperature probe is the most commonly used sensor in the range. It can accurately measure the temperature of air, water, soil and weak acidic solutions, making it indispensable in all Science Departments.	\$69.95	

SER3101	Temperature Fast	A different type of thermometer, with low thermal mass and quick response times. Ideal for recording temperatures from low grade heat sources. The quick response times let you monitor changes in temperature over short times. This is not water, acid or alkali resistant, if this is required use the standard temperature sensor.	\$69.95
SER3105	Temperature High (K-Type)	The wide temperature range of this sensor enables it to be used in a variety of experiments e.g. melting points and flame profiles.	\$159.95
SER3255	Timing Mats (Pair)	Timing mats are pressure sensitive switches designed to be activated as you step on and off the mat. These are the smaller of the two sizes of mats that are available.	\$79.95
SER3277	Ultraviolet Sensor	A multi-range sensor sensitive to UVA and the harmful UVB band of the spectrum. Six measurement ranges covering 0 -500W/m2.	\$199.95
SER3471	Wind Energy Set	The Wind Turbine Kit is a great way to explain the function and benefits of using wind power to generate electricity	\$399.95
SER3173	Wire Coil and Magnet	A 500 turn wire coil with built-in interface suppressor. When used in an electromagnetic induction investigation, the best results will be obtained by using either the $\pm 100\text{mA}$ Current or $\pm 1\text{V}$ Voltage sensors.	\$99.95
SER3131	Data Logger Smart Q Sensor- Oxygen Electrode	This electrode is used in combination with the Oxygen Adaptor to form the dual range Oxygen sensor, capable of measuring oxygen levels in air, or dissolved oxygen levels in water.	\$229.95
SER3190	Datalogger Smart Q Sensor – Breathing Rate Belt	This belt is used with the SmartQ 10kPa Differential Gas Pressure sensor (SER3139) to measure the expansion of the chest whilst a person breathes.	\$79.95
SER3275	Datalogger Smart Q Sensor – Colorimeter	This instrument can be used for investigations which result in a change in colour or opacity e.g. Beer's law, enzyme kinetics and chemical rate of reaction experiments.	\$229.95
SER3903	Datalogger Smart Q Sensor – Finger Tip Pulse	This sensor is designed to fit on the tip of a finger.	\$99.95
SER3841	Datalogger Smart Q Sensor – Friction Ramp Switches	The switches are magnetic proximity switches which fit into the two holes in the timing ramp.	\$49.95
SER1113032	Datalogger Smart Q Sensor – Handheld Dynamo 6V	This instrument is perfectly suited to experiments that explain the mechanism of power generation in an easy and fun way.	\$99.95
SER3803	Datalogger Smart Q Sensor – Interrupt Cards	This set allows students to explore momentum, kinetic energy, acceleration, distance and speed.	\$49.95
SER6172	Datalogger Smart Q Sensor – Oxygen Maintenance Kit	Maintenance kit for the oxygen electrode consisting of three spare membranes and 50 ml of electrolyte.	\$129.95
SER3179	Datalogger Smart Q Sensor – Speed Of Sound Pack	The Speed Of Sound Sensors can either be used to listen to heart beats or to measure speed of sound through air and other materials. This pack contains 2 stethoscope sensors.	\$229.95

Smart Q Sensors & Vu Sensors & Accessories

SER3271	Datalogger Smart Q Sensor- Drop Bub Counter Replacements	Two 3 way Stopcocks and five plastic tips – replacement parts for the Drop & Bubble Counter.	\$29.95	  
SER3907	Datalogger Smart Q Sensor- Fingertp Pulse Oximeter	The pulse oximeter can be used to measure human haemoglobin saturation and heart rate through a fingertip.	\$129.95	
SER3272	Datalogger Smart Q Sensor- Heart Rate Receiver-Polar T31	This is the T31 transmitter part of the transmitter belt for the Polar Heart rate sensor.	\$109.95	

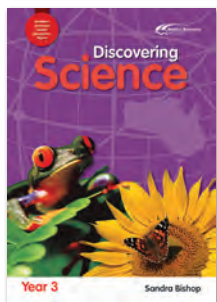

Vu Sensors & Accessories

SER2305PK5	5 x Vu+ Pack Usb & Bluetooth + Charging Tray	This convenient 5 pack solution also includes integral USB charging system and a smart Grattells storage tray.	\$1,299.95	
SER2305PK	Data Logger Vu Sensor – Vu+ Pack, USB & Bluebooth	The low cost primary data logging solution. Now with Bluetooth connectivity to iPad & Android tablets. With a large easy to read display that shows data as numbers, pictograms, blocks and bars. Vu+ is a new generation logger and software package that grows with the children, it never gets left behind and offers exceptional value for money.	\$229.95	
SER2327	Data Logger Vu Sensor – Heart Rate Sensor	Pupils of all ages are keenly interested in how physical and mental stress affects their heart rate. The sensing clip (pleth) can be attached to a finger or ear lobe to measure either blood flow (pulse waveform) or heart rate (beats per minute)	\$59.95	
SER100200	Data Logger Vu Sensor – Power House	With this power house you can explore alternative energy and sustainable living. Build the house and then conduct the 100 activities centred in and around the house. A 64 page booklet describes the activities and gives background science to understand the work. Connect the included solar panels to the Vu logger Voltage sensor (supplied) and see how much electricity is made.	\$269.95	
SER2320	Data Logger Vu Sensor – Temperature	This general-purpose Temperature sensor is the most commonly used sensor in the range. It can accurately measure the temperature of air, water, soil and weak acidic solutions	\$19.95	
SER2330PK	Data Logger Vu Sensor- Timing Gates (Pair)	A pack of 2 Vu Light gates which are digital switch-type sensors. A single Light gate can be used to measure time and speed at A or use a pair of Light gates to measure time and speed from A to B	\$99.95	
SER2325	Data Logger Vu Sensor – Voltage	This Voltage sensor measures the voltage across any component for DC low voltage circuits from 0 to 3 V.	\$19.95	
SER2332PK	Data Logger Vu Sensor – Vu Timing Mats	These large mats are activated by stepping onto them; one mat is used to start the timer, the other to stop the timer. Size: 720mm x 390mm	\$99.95	
SER2341	Data Logger Vu Sensor – Friction Ramp Switches	This Switch kit has been designed for use with the Vu Timing Ramp. The switches connect to the timing inputs (A and B) on the Vu or Vu+ data logger.	\$44.95	

Discovering Science Book Series

The Discovering Science Teacher book series is fully aligned to the Australian Curriculum and covers each of the three interrelated science strands - Science Understanding, Science as a Human Endeavour and Science Inquiry Skills and also the related sub-strands. It includes subject planners, week-by-week lesson plans and assessment record sheets for the teachers, as well as worksheets, resource and self-evaluation sheets for the students. Each lesson plan includes content descriptions, required resources, skills, a step-by-step activities section, extension activities and assessment ideas.

HB8790K	Set of 7 books	\$265.95
HB8738	Foundation	\$39.95
HB8745	Year 1	\$39.95
HB8752	Year 2	\$39.95
HB8769	Year 3	\$39.95
HB8776	Year 4	\$39.95

Complete Curriculum Kits

Schools wishing to purchase the complete range of Engaging with Science Kits can do so easily. Choose from either the Complete Kit including quality Grannell frames or simply purchase the standalone kits.

Complete Curriculum Kits

TFC57038	Complete Curriculum Kits (24 kits – 2 Frames)	\$8,999.95
TFC57037	Complete Curriculum Kits (24 kits – No Frames)	\$8,999.95

Buy the complete kit and frames and have a wonderful Science resource to be used for many years.

Physical Kit - Foundation to Year 6

Help students develop an understanding of the concept of motion and energy. These kits assist in understanding that forces affect the behaviour of objects and that energy can be transferred to and from a particular object.

TFC57000PK

6 Kits \$2,549.95

SIMAX GLASS

Kavalier/Simax have been the leading European producer of borosilicate glass for 180 years! They offer a very wide variety of products which span the areas of domestic, industrial, laboratory and technical glass, pipes and industrial apparatus. Most of Kavalier's products are being distributed under the brands Simax and Kavalier.

The diversity and technical complexity of Kavalier's goods requires continuous innovation, which helps them maintain their position as a world leader of production processes and solutions that keep pace with market trends internationally. Kavalier prides itself on a tradition of quality, meeting or exceeding the requirements of the System of Quality Management based on ISO 9001. A progressive and economically stable company, Kavalier is the largest producer of borosilicate glass in the world, with a melting capacity of over 220 tons of glass per day! Modern Teaching Aids is proud to be their distributor.

Beakers

High quality borosilicate beakers designed to withstand high temperatures and the harshest chemicals. High quality low form beakers at an affordable price, made in Europe from borosilicate for extreme durability in your laboratory. Designed to withstand high temperatures and the harshest chemicals.

- Leading European manufacturer, with over 175 years of experience manufacturing borosilicate glass
- Borosilicate for the harshest lab environments
- Dish washer and chemical safe graduations

SER5003101	Low Form - 5ml	Each	\$5.95	10 or more - \$5.25

Glass Beads

Use as boiling stones and as packing for distillation columns. The beads are resistant to attacks from the majority of hot and cold liquids.

SER1007039 8mm Diameter – 500g \$7.95

Bell Jar with Knob

This jar is ideal to maintain a low pressure environment and for easy access to items.

SER1052434 200 x 300ml \$79.95

Bell Jar with Stopper

This bell jar is designed to contain a vacuum as well as to cover and protect items in the laboratory.

SER1052492 150 x 250mm \$49.95

Reagent Bottles

Leading European manufacturer, with over 175 years of experience manufacturing borosilicate glass.

– Used in chemistry, pharmacy, health, biology and food applications

– Used in more than 90 countries worldwide

Diji Burettas

This innovative 3 in 1 product, serves the functions of volumetric pipette, graduated pipette and burette. The burette provides accuracy of ISO A grade pipette and are easy for students to use.

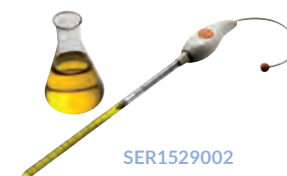

SER1529003	Burette - 5ml	Each	\$69.95
SER1529004	Burette - 10ml	Each	\$69.95
SER1529005	Burette - 25ml	Each	\$69.95

Diji Standards

This novel product replaces pipette/ bulb pair by providing high level of accuracy whilst making it easy to use. It can also be used as a portable burette. The device provides exceptional control and a suction device is not required to handle liquid.

SER1529002	Standard - 10ml	Each	\$53.95
SER1529001	Standard - 25ml	Each	\$53.95

Duracell All-In-One Battery Charger

A simple, safe and reliable solution for your daily power needs. Suitable for electronic and medical devices. These batteries are long lasting and dependable.

ACC1625	\$39.95
---------	---------

Warning: Button Batteries are attractive to young children as they are bright, shiny and easy to swallow. If a battery is swallowed, they can present a serious hazard and medical attention should be immediately sought. Please keep these button batteries away from and inaccessible to children and students.

Eclipse Lithium Button Battery 3V

Eclipse Lithium Button Battery 3V ideal for use in small electronics such as hand held or portable devices. A super long lasting battery as it has low self discharge and will hold its charge for a long period when not in use.

EL2522	\$1.95
--------	--------

Duracell Coppertop Batteries

Duracell Coppertop Batteries are trusted quality with long lasting power. These Coppertop AA batteries provide reliable power for your everyday devices like motorised toys, flashlights, portable games consoles, remote controls. Great for keeping your stores for future use. Duralock Power Preserve technology keeps them charged for up to 10 years in storage. Trusted everywhere.

Lab Essentials

Primary Science Jumbo Eyedroppers

3+ yrs

These Jumbo Eyedroppers teach young scientists fine motor skills. The stand provides convenience and storage. A great resource to get the young students interested in science!

LER2779

Set of 6 \$32.95

Super-Safe Eye Droppers

A durable shatterproof dropper made of clear plastic with a rubber bulb. Pack of 12 each measuring 8.5cm long. Ages 5+ years

LS446

Pack of 12 \$19.95

Easy Grip Tweezers

5+ yrs

These extra large (15cm) tweezers have a comfortable grip and are excellent for small hands. Supplied in assorted colours. A guide with suggested activities is included.

LER1963

Pack of 12 \$26.95

Set of 10
\$25⁹⁵

Save \$3.55

Tweezers

Tweezers with bent head. Tweezers are 12.5cm long.

EIS5030

Each \$2.95

EIS5030-10

Set of 10 ~~\$29.50~~ \$25.95

Pack of 10

Plastic Tweezers

Plastic Tweezers used for picking up objects too small for human hands.. Easy to grasp and close. Use in the biology, science classroom or for general exploration. Made of flexible, hard-wearing plastic.

NK50805

Pack of 10 \$7.95

Cork Borers - 6 Sizes

These cork borers come in six different sizes which includes 3.8, 5.3, 7.0, 8.5, 10.0 and 11.5mm.

SER1010157

\$34.95

Cork Borers Sharpener

This is used to sharpen your cork borer to ensure a clean and precise cut with each use.

SER1010158

\$23.95

Carbon Rod - 150 x 6mm

Can be used for experiments with homemade batteries.

SER1010418

\$14.95

Griffin Type Glass Cutter

Great for any type of tube cutting, perfect for when making up pastures apparatus or similar.

SER1014152

\$20.30

Charcoal Carbon Blocks

These carbon blocks can be used for experiments with homemade batteries.

SER1010165

100 x 25mm \$15.95

Bench Drill/Cork Borer

This prevents jagged holes in wood (Speed too slow) and protects against overheated plastic (Speed too fast). Drilling PCBs, steel, brass or any metal is a breeze. Great for Hobby Craft Work. Specs: 3 speed. 8000, 11000 & 16000rpm. Max speed travel 25mm Weight 5.3kg. This is a must for every Technology Room.

SER1052969

\$169.95

Chromatography Paper – 20x20cm

Use the chromatography paper to separate chemicals and substances.

SER1099500

Pack of 100 \$69.95

Super Spring – 60mm Diameter

The clear tubes are freestanding, which means that students can go "hands-free" while investigating all things bright, noisy, aromatic or just plain cool.

CUS0304

Pack of 100 \$11.95

Measuring Containers

Set of 18 measuring containers with wide mouths for easy measuring. The set contains 10 x 100ml, 5 x 200ml, 2 x 500ml and 1 x 1 litre containers.

DM1033

18 pieces \$46.95

Calorimeter Joules Heater-Stirrer-Insulation

This calorimeter can be used as is to measure the specific heat of different liquids. It can also be used with the included heating element to determine the electrical equivalent.

SER1010089

\$29.95

Oscilloscope – Dual Trace Digital – 20Mhz

Use the oscilloscope to display, process and analyse the waveform and bandwidth of electronic signals.

SER1149001

\$749.95

Turbidity Tube – 60.5cm

Measure turbidity in streams where a secchi disk cannot be used.

SER1103018

\$29.95

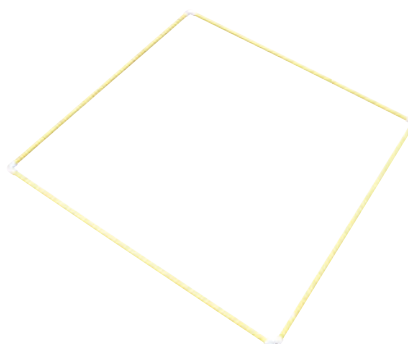

Sunpaper Kit – UV Reacting Paper

Sunpaper UV reacting paper goes through a chemical reaction when exposed to light, leaving a permanent image on the paper.

TH891

\$39.95

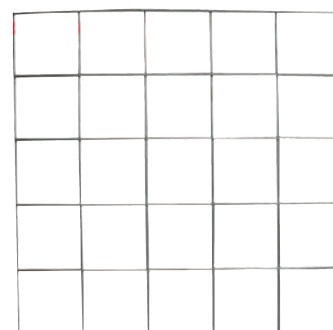

Collapsible Quadrat Grid – 1m²

The quadrat is a highly portable sampling tool.

SER1011147

\$39.95

Quadrat Grid – 50x50cm with 10cm Squares

This quadrat is for taking population survey on flat terrain.

SER1011118

\$25.95

Lab Essentials

Buchner Funnel

These buchner funnels are used for filtration with the assistance of atmospheric pressure.

Scout Touch Balance – 220g x 0.001g

Setting new standards in laboratory and industrial weighing; the next generation of Scout balances. The OHAUS Scout features an easy-to-navigate colour touchscreen display and a slim design which allows stackable storage. Geared for superior performance with fast stabilisation time and high resolution weighing results, making this the perfect balance for your classroom or laboratory. Capacity: 0.001 – 220.000g, pan size: 93mm.

SERSTX223

220 x 0.001g \$899.95

Scout Education Balance – 120g x 0.001g

Designed for education applications, with a large backlit LCD backed by education software. It is built to endure demanding classroom conditions with superior overload protection. Featuring faster stabilisation time, increased capacity and a stackable design that makes this balance perfect for your classroom or laboratory. Capacity: 120g, pan size: 93mm.

SERSKX123

120 x 0.001g \$598.95

Scout Education Balance – 420g x 0.1g

The SCOUT SKX 421 is built to endure demanding classroom applications with superior overload protection. Features including faster stabilisation time, increased capacity, multiple connectivity options and stackable design make Scout the best weighing experience for The next generation classroom. Capacity: 420 x 0.1g, pan size: 120mm.

SERSKX421

420 x 0.1g \$379.95

Scout Education Balance – 420g x 0.01g

The next generation of portable balances for your classroom. Integrated superior overload protection system rated at 10x capacity protects the balance in demanding classroom environments. Featuring faster stabilisation time, increased capacity, multiple connectivity options and a stackable design. Capacity: 420 x 0.01g, pan size: 120mm.

Analytical Balance with Draft Shield – 220g x 0.0001g

Fast stabilisation and reliable operation are enhanced by the AutoCal option to ensure solid weighing performance and accurate, repeatable results for standard laboratory applications. This balance has the ability to complete weighing, parts counting, percent weighing, checkweighing, animal/dynamic weighing, totalisation/statistics, formulation and density determination, making it an essential item in any laboratory. Capacity: 220g x 0.0001g, pan size: 90mm.

SERAX224 220 x 0.0001g \$2,499.95

Analytical Balance with Draft Shield – 320g x 0.0001g

Fast stabilisation and reliable operation are enhanced by the AutoCal option to ensure solid weighing performance and accurate, repeatable results for standard laboratory applications. The two piece, top-mounted draft shield doors reduce the footprint of the doors in the rear of the balance when open, and open wide on both sides in order to provide ample room to place samples. Capacity: 320g x 0.0001g, pan size: 90mm.

SERAX324 320 x 0.0001g \$2,799.95

Digital Balance

This digital balance has a capacity of 2000 x 0.01gm. High precision, sensor strain, round transparent draughtshield, high contrast large backlit LCD, built-in corner spirit level, calibration weights supplied, 2 year warranty, battery and mains.

SER1052982 2000 x 0.01g \$299.95

Traveller – 150g x 0.01g

Unique Portable Balance with Integrated Draftshield. The unique draftshield on the Traveller is what sets this portable balance apart. The weigh-thru design protects the load cell from disruption from the elements to ensure weighing accuracy. Capacity: 150g x 0.01g, pan size: 120mm.

SERTA152 150 x 0.01g \$369.95

Traveller – 3000g x 0.1g

The unique draftshield on the Traveller is what sets this portable balance apart. The weigh-thru design protects the load cell from disruption from the elements to ensure weighing accuracy. The balances can be neatly stacked and locked into place on top of each other, providing a simple way to safely store the balances. Capacity: 3000g x 0.1g, pan size 120x135mm.

SERTA3001 3000 x 0.1g \$449.95

Explorer Semi-Micro – 51g/120g

The Explorer Semi-Micro Balance is built for sophisticated, professional weighing. Ingenious construction designed to enhance usability, intuitive software provides an extremely modern user experience, intelligent performance for applications requiring extreme accuracy. Capacity: 51 g; 120 g. Readability: 0.01 mg; 0.1 mg.

SEREX125D 0.01mg; 0.1mg \$5,499.95

Explorer Semi-Micro – 120g

The different applications of this balance include weighing, percent weighing, parts counting, check weighing, dynamic/animal weighing, filling, totalisation, formulation, differential weighing, density determination, peak hold, pipette adjustment. It is built for sophisticated, professional weighing. Capacity: 120 g. Readability: 0.01 mg.

SEREX125 0.01mg; \$6,499.95

Explorer Semi-Micro – 120g/220g

The Explorer Semi-Micro Balance is built for sophisticated, professional weighing. Applications include, weighing, percent weighing, parts counting, check weighing, dynamic/animal weighing, filling, totalisation, formulation, differential weighing, density determination, peak hold, pipette adjustment. Capacity: 120g; 220g. Readability: 0.01mg; 0.1mg.

Microscopes

Digital Microscope – USB 5MP with Software

A USB microscope with a simple but incredibly useful stand that allows students to make fine adjustments to the vertical height of the microscope and swivel the scope arm around a 360 degree range. This permits a greater level of viewing accuracy and stability. On either side of the stand there are two metal holders to lock your object in place and a printed ruler to help you get an approximate feel for the length of objects. The optics built into this microscope are excellent. The sharpness of texture on magnified objects is incredible to look at. You will spend hours searching for things to magnify. It comes with a great piece of software for capturing 5MP (2592x1944) res JPGs, BMPs, TIFFs or PNGs and 1280x960 pixel AVI files. Compatible with WinXP/ Vista/7/8, Mac 10.6-10.8. Magnification ratio: 10x, 300x (at 5MP res). Find full specifications on our website.

- Sturdy all-metal construction
- Includes a vinyl dust cover, five prepared glass slides and instruction manual
- 28cm(H) x 15cm(L) x 10cm(W)

Wireless USB Digital Microscope

This extraordinary wireless hand-held digital microscope/camera is easy to use; just connect it to your computer or even your smartphone, simply using the 10m covered WiFi, and start taking videos or photos. Alternatively, you can simply use the USB to connect to your computer and use it as a normal web-cam. You can even mount it on a standard tripod (not included)!

FD079

\$114.95

Beginner Microscope

The perfect microscope for primary grades.

EIS0002D

\$234.95

Features

- Mechanical tube Length: 160mm
- 45° Inclined head
- 360° Rotatable
- Eyepieces: WF 10x
- Achromatic Objectives: 4x, 10x, 40x
- Coarse and fine focus.

Monocular Microscope

This versatile, high performance microscope comes with wide field eye pieces and provides a sharp image.

EIS007MM

\$279.95

Features

- Mechanical tube Length: 160mm
- 45° Inclined Head
- Rotatable 360°
- Eyepieces WF 10x
- Objectives Achromatic 4x, 10x and 40x
- Coaxial coarse and fine focus adjustment
- Stage Abbe 1.25 NA condenser with iris diaphragm
- LED illumination
- Square area 11 x 11.5cm.

Study Scope

Designed for viewing solid or three-dimensional objects rather than traditional glass slides, this scope makes it possible for students to view virtually anything magnified 20X. (This scope does NOT let you view slides.) The binocular head allows comfortable viewing with both eyes (no more squinting) and the built-in light illuminates all specimens for premium viewing every time. Real glass optics provide high-quality images and battery power makes it portable for outdoor use. Perfect for collectors and hobbyists, it allows users to explore the infinite diversity in nature, making it an ideal – and fun – educational adventure for young and old alike. Requires 2 AA batteries (not included).

DC50702

\$129.95

Features

- Binocular eye tubes
- Built-in light source
- Real optical glass lenses
- 20X magnification
- Portable battery power
- Vinyl dust cover

Microscopes

Monocular Junior Microscope – 4/10/40x

This great monocular microscope is able to be used to view slides or to view solid objects such as leaves, rocks, etc. Forward facing nose piece with 4x 10x 40x achromatic full glass objectives.

SER1122032

4/10/40x \$229.95

Monocular Senior Digital Microscope – 4/10/40/100x

High quality monocular microscope with built-in digital camera for whole class viewing on your smart board or monitor. 4/10/40/100x (oil immersion) objectives.

SER1122029

4/10/40/100x \$699.95

Monocular Senior Digital Microscope – 4/10/40x

High quality monocular microscope with built-in digital camera for whole class viewing on your smart board or monitor. This model has a modern triangular base design that aids in stability, LED lighting, fine and course focusing with mechanical stage, iris diaphragm, 10x eyepieces and 1.25 abbe condenser. Featuring 4/10/40/100x (oil immersion) objectives, coarse and graduated fine focus adjustment.

SER1122028

4/10/40 \$624.95

Monocular Senior Microscope – 4/10/40/100x

This model has a modern triangular base design that aids in stability, LED lighting, fine and course focusing with mechanical stage, iris diaphragm, 10x eyepieces and 1.25 abbe condenser. Featuring 4/10/40/100x (oil immersion) objectives, coarse and graduated fine focus adjustment.

SER1122019

4/10/40/100x \$389.95

Monocular Senior Microscope – 4/10/40/100x

This microscope features, iris diaphragm and condenser, mechanical stage, built-in LED light, 10x wide field eyepiece and pointer, objectives: 4 10 40 100x, fine and coarse adjustment and slip clutch protection.

SER1122007

4/10/40/100x \$429.95

Monocular Senior LED Microscope – 4/10/40

This high quality senior microscope uses the same optics as the larger cousins above, but uses simpler stage controls and a iris diaphragm. Featuring, objectives 4/10/40x, coarse and fine focus.

SER1122018A

4/10/40 \$389.95

Monocular Junior Microscope – Large

This high quality junior microscope uses the same optics as the larger cousins above, but uses simpler stage controls and a disc type diaphragm. objectives 4/10/40x. Size 210x170x370mm.

SER1122018

4/10/40x \$299.95

Monocular Junior External Light Microscope

This quality junior microscope uses great optics for general educational use. This model is able to have a total magnification of 400x and uses a simple disc type diaphragm. The microscope does not have its own light source and must be used with an external source.

SER1052655 4/10/40x \$124.95

Monocular Senior Microscope

Featuring 4/10/40/100x (oil immersion) objectives, coarse and graduated fine focus adjustment. This model has a modern triangular base design that aids in stability, LED lighting, fine and course focusing with mechanical stage, iris diaphragm, 10x eyepieces and 1.25 abbe condenser.

SER1122014
4/10/40/100x \$319.95

Monocular Junior Microscope LED

High quality junior microscope that is able to carry out all functions required of, for younger students to learn the basics of microscopy. Features: disc diaphragm, high quality lens, 4/10/40x, 400x max/power, LED Light Source, fine and course focus.

SER1052630 4/10/40x \$229.95

Binocular Senior Digital Microscope

High quality binocular microscope with built-in digital camera for whole class viewing on your smart board or monitor. This model has a modern triangular base design that aids in stability, LED lighting, fine and course focusing with mechanical stage, iris diaphragm, 10x eyepieces and 1.25 abbe condenser.

SER1122025 4/10/40/100x \$999.95

Binocular Senior Microscope

High quality binocular microscope without the built-in digital camera of its bigger brother. This model has a modern triangular base design that aids in stability, LED lighting, fine and course focusing with mechanical stage, iris diaphragm, 10x eyepieces and 1.25 abbe condenser.

SER1122020 4/10/40x \$499.95
SER1122021 4/10/40/100x \$629.95

Stereoscopic Dual Light Microscope

This stereoscope features a light source, inclined body LED illumination with variable light control, dual LED light variable sources, 10x eyepiece wide field and objectives rotate 2x and 4x, highest magnification 20 and 40X.

SER1122008 20x & 40x \$399.95

Stereoscopic Microscope

This stereoscope features 10x wide field eyepieces, 10x objective, total magnification 20x but no internal light source.

SER1122012 20x \$289.95

Stereoscopic Microscope - Battery Powered

This stereoscope features 20x magnification, 10x eyepiece, 2x objective, sturdy plastic body, and excellent glass optics.

SER1115990 20x \$149.95

Microscopes

Stereoscopic Dual Light Microscope – 20x

This stereoscope features 20x magnification, dual lighting, inclined body, 10x wide field eyepieces, 2x objective, 20x magnification.

SER1122064

20x \$349.95

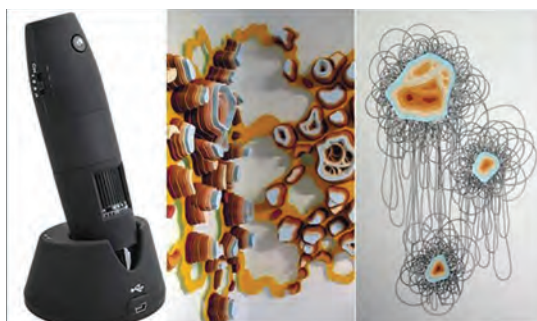

Stereoscopic Dual Light Microscope – 80x

Another in our series of stereoscopic microscopes, supplying a sharp image with high resolution. 80x magnification and light source, inclined body LED illumination with variable light control, LED light variable sources, 10x wide field eyepieces.

SER1122901

80x \$899.95

Handheld Digital Microscope with Stand

This model has a modern triangular base design that aids in stability, LED lighting, fine and coarse focusing with mechanical stage, iris diaphragm, 10x eyepieces and 1.25 abbe condenser. Featuring 4/10/40/100x (oil immersion) objectives, coarse and graduated fine focus adjustment.

SER5006005

200x \$98.95

Handheld Digital Microscope with Polariser

The Anyview USB Microscope with polarizer is a handheld colour digital microscope with high quality 2.0 megapixel image sensor. It is small, easy to operate and portable fun for professional application.

SER5006006

200x \$165.95

Handheld Microtome with Razor

A simple, cheap way to make slides for your class or to teach students the basics of histology and how slides are made and why. This device is used for cutting thin, uniform sections of a specimen for microscopic examination.

Trusted Specialist Science Education Brands

Based in the county of Bedfordshire in the United Kingdom, Data Harvest has been producing high quality educational science data logging products since 1985 and was the first company to bring data capture technology to the mainstream UK classroom.

IEC is known in Australia and around the world as a designer and manufacturer of a large range of educational equipment for the teaching of science, physics and chemistry. Using their heritage as scientific engineers, the quality and performance of IEC equipment is their first priority. IEC is proud to have 100% Australian heritage and ownership.

Established in Newark, New Jersey, in 1907 as a small scale repair business, Ohaus has become a trusted supplier of precise and reliable balances and scales.

Eisco Scientific started over 50 years ago as a small, family-owned manufacturing company serving the science education marketplace and now produces over 6,500 unique science education products from physics, chemistry and lab supplies to glassware.

Lab Essentials Class Kit

This Lab Essentials Class Kit is an ideal laboratory equipment essentials set. It includes a great range of high quality scientific resources to help start and equip your lab or replenish your existing science materials inventory. This great value set provides massive savings on a broad range of high quality science resources and includes the following lab glassware and equipment.

- 12 x Beaker - Borosilicate Glass 100ml - Glass
- 12 x Beaker - Borosilicate Glass 250ml - Glass
