3 Resistance Tunnel **18+ MONTHS**

Develop body awareness and motor planning. The vestibular system is important for children's balance and control of body postures. Let children crawl through the Resistance Tunnel to strengthen their arms and legs and receive proprioceptive input. The Resistance Tunnel is made of elastic fabric, so it wraps itself around children's bodies while they are crawling. There are also different textures inside the tunnel to stimulate children's senses. This training tool allows children to experience varying degrees of resistance and deep-touch input. It also reduces sensory and tactile defensiveness. Size: 180(L) x 39cm(W).
