Discovering Science Book Series

The Discovering Science Teacher book series is fully aligned to the Australian Curriculum and covers each of the three interrelated science strands - Science Understanding, Science as a Human Endeavour and Science Inquiry Skills and also the related sub-strands. It includes subject planners, week-by-week lesson plans and assessment record sheets for the teachers, as well as worksheets, resource and self-evaluation sheets for the students. Each lesson plan includes content descriptions, required resources, skills, a step-by-step activities section, extension activities and assessment ideas.

Science Kits for the Australian Curriculum

The MTA Engaging with Science Kits have been specifically designed to use in conjunction with many of the available commercial Science programs that follow the Australian Science Curriculum (ACARA). The kits contain many of the suggested resources needed to complete lots of the activities set out in programs such as Hawker Brownlow's, R.I.C. Publications's Hands-on Science and the Australian Academy of Science's Primary Connections. All kits come in their own large container with lid and can be stacked and shelved in optional racking. Please note: we do not supply the programs with the kits. We supply the materials that can assist with using these programs.

Living things, including plants and animals, depend on each other and the environment to survive (ACSSU073)

- Investigating how plants provide shelter for animals
- Investigating the roles of living things in a habitat, for instance producers, consumers or decomposers
- Observing and describing predator-prey relationships
- Predicting the effects when living things in feeding relationships are removed or die out in an area
- Recognising that interactions between living things may be competitive or mutually beneficial

Living things have life cycles (ACSSU072)

- Making and recording observations of living things as they develop through their life cycles
- Describing the stages of life cycles of different living things such as insects, birds, frogs and flowering plants
- Comparing life cycles of animals and plants
- Recognising that environmental factors can affect life cycles such as fire and seed germination

Aquaponics Flower Tower

The Aquaponics flower tower is perfect for growing herbs, vegetables and flowers inside or out. Just add fish and seeds! The planter holds 80 litres of water and has a clear cover so you can easily view and feed the fish. The flower tower comes with 16 convenient planter locations. The water flow regulator ensures an even flow of water down the internal slides of the tube to water the plants. The plants will filter the water for the fish, while the fish fertilise the water for the plants. A perfect ecosystem! The aquaponics flower tower needs to be assembled.

All connections are made using transparent wires to show the copper core. Bases are clear to show the path of electricity right to the component. Circuits are made using the superb 'Maglead' system where a tiny, yet powerful magnet at either end of the lead makes the electrical connection when placed near to the connector. Kit contains: six bases; $2 \times MES$ bulbs and holders, $1 \times festoon$ bulb, $1\,\mathrm{x}$ buzzer, $1\,\mathrm{x}$ push-to-make switch, and $1\,\mathrm{x}$ one motor, $10\,\mathrm{x}$ magleads, $2\,\mathrm{x}$ alligator clips, a length of resistance wire, 3 x battery connectors and teacher's notes. Requires 3 x C batteries (not included). Suitable for primary school use.

Chromatography Paper - 10 x 30cm

Paper chromatography is an analytic method technique to identify and separate mixtures. A liquid mixture travels through the chromatography paper, each compound at a different speed. This makes it possible to identify the compounds in the mixture. Size of paper chromatography sheets is 10cm x 30cm supplied in a quantity of 100 sheets.
