STEAM Learning intertwines **Science, Technology, Engineering, The Arts & Mathematics**, with key skills such as problem solving, strategic thinking and collaboration.

Digital & Design Technologies aims to develop the knowledge, understanding and skills to ensure that, individually and collaboratively, students: develop confidence as critical users of technologies and designers and producers of designed solutions, and; design, create, manage and evaluate sustainable and innovative digital solutions.

MTA's Digital Technologies & STEAM Learning range supports educators and teachers in embedding these future skills into their day-to-day programmes, from Early Childhood Education through to High School.

Icon Legend for Programming Platforms & Software

TTSB0358 & TTSB485

LVS120

The ultimate robotics kit to introduce coding with iPads and tablets from K to Year 6

Tablet Robotics Kit

This kit includes a wealth of resources to practise with coding and programming in combination with tablets. This kit includes:

- 12x Blue-Bots (TTSB485)
- 2x Docking stations for the Blue-Bots (TTSB0358)
- 10x Dash robots (DW001)
- 10x LEGO Education WeDo 2.0 Sets (incl. rechargeable battery) (LEG45300 + LEG45302),
- 2x 10-Port USB chargers to charge the Dashes as well as your tablets (LVS120),
- 1x Multi-Charger to charge the WeDo 2.0 sets (WLMC04)

Robotics & Makerspaces

The early years robotics kit for on-screen and off-screen coding

Makerspace Early Year Robotics Kit

This Makerspace kit for early years is ideal to let students practise with a variety of robotics platforms and get familiar with different ways of programmings. Each of the robots can be programmed without being able to read or write, making them the ideal resources for digital technologies in the early years.

This kit includes the following robotics platforms:

- 2x Dash Robot (DW001)
- 2x Bee-Bot (TTSB001)
- 2x Cubetto (CUB001)
- 2x Sammy the First Coding Robot (GG7442).

Includes over 15000 components, complete with a pallet of replacement supplies!

Makerspace Trolley - STEAM Activity Cart including Resources

Roll it into your classroom, lab, or library for the ultimate Maker/STEM/STEAM solution. With over 40+ STEM projects and almost every TeacherGeek component ever manufactured, this cart can easily support hundreds of students. Each cart includes a pallet of replacement supplies (way more supplies than you see in the cart, over 15,000 components in total!) and sturdy tools to create almost any project. The sign is dry erase. Suitable for grades K-12.

Students will learn science and engineering concepts through experimentation, grow their understanding and evolve projects through the design & engineering process. The TeacherGeek Maker Cart provides ample opportunities for amazing true STEM projects.

Light Box Table & Storage

An open ended furniture item that features a large light panel. This light table features lockable, swivel castors for easy mobility and large storage compartments. The light panel is made with environmentally friendly LED lights. The LED lights last for up to approx. 50,000 hours. This is a versatile and functional light table. The illustrated accessories are not included. Light compartment to remain locked at all times. To be used with supervision.

Extra Bright Light Cube

An extra bright light cube with double the amount of LEDs! This amazing light cube is portable, durable and rechargeable. The light cube can flash, strobe and change colour by using the included remote control. Use as a 3D light box, or to add a new sensory dimension to a room. The LED light source lasts approx. 20,000 hours. The light cube measures 40(W) x 40(D) x 40(H)cm, and includes a power source, remote control and a teaching guide. Charging time is 6 hours, and operating time is between 5 and 15 hours. Accessories not included. Warning: The remote control contains a coin/button battery. Hazardous if swallowed.

RE59601-1

Three-Sided Triangle Mirrored Activity Centre

The unit features a fantasy environment which becomes a place of creativity, experimentation and discovery. Made from white MDF with acrylic mirrors, the triangle centre is supported by a pine frame. Illustrated accessories not included.

TF58 \$799.95

Explore & Discover Light Panel

This amazing light panel features a bright LED surface. It is excellent for encouraging exploratory play. Children can explore line, texture, shape and colour. Light panels also provide an excellent surface for sensory play using sand and other tactile resources. They also are a great way to encourage play based learning in maths, science and literacy. This light panel features environmentally friendly LED lights that last for up to 50,000 hours. Measures 64(W) x 47(L)cm and has an illuminated area of 59(W) x 42(L)cm The panel is lightweight and durable, excellent for all classroom environments.

KD103 A3 \$169.95

Surfloor - Sensory Liquid Floor Tiles

A set of floor tiles which feature colourful liquids inside. A true sensory experience as children stand, press and jump on the tiles. Each square tile features a non-slip backing and measures 50(W) cm. Do not leave in direct sunlight.

Code & Go Robot Mouse STEM Activity Set

See page 75

Build your maze, and then use the coding cards to create a step-by-step path for Colby, the Robot Mouse. Program the sequence of steps, and then watch Colby race to find the cheese! This deluxe set is the perfect hands-on introduction to coding concepts. Colby measures 7.5cm approximately.

LER2831

\$109.95

See page 72

Cubetto - The Coding Robot

Cubetto will teach young students the basics of computer programming through adventure and hands-on play. Simply place the coding blocks on the control board to tell Cubetto where to go. Hit the blue button and Cubetto executes your first program. Each set includes: one Cubetto robot, one coding board, 16 coding blocks, 1x1m world map and story book. Cubetto requires 6AA batteries (not included).

CUB001

\$329.95

Coding Pixels Fun Game

This game is based on the principle of binary code. The binary code assigns a pattern of binary digits to each character. In this game children discover pixel art drawing. Each number in the squares of the task cards stands for a number of pixels which must be lead on the playing board. Doing so, a funny pixel image will appear!

RO9015

\$149.95

Coding Buddies Activity Set

Coding with your buddies is a step in the right direction! Enjoy non-digital coding activities that promote cooperative learning through interactive team play. Hopping, stepping and turning encourage gross motor skills and directional sense. Set includes 20 EVA foam mats, 20 coding cards, and the following die-cut pieces: 2 robots, 2 gears, 2 springs, 2 arrows and 2Xs. Guide includes coding overview and sample mazes. The mats measure 24 x 24cm.

LER2835

\$74.95

The most backed board game in Kickstarter history!

Robot Turtles - The Game for Little Programmers

Robot Turtles is the first board game for little programmers! The most backed board game in Kickstarter history sneakily teaches pre-schoolers the fundamentals of programming, from coding to functions, while making silly turtle noises! Before you know it, your little one will be writing computer games rather than just playing them! Includes: Game Board, 4 Robot Turtle Tiles, 4 Jewel Tiles, 36 Obstacle Tiles, 4 Bug Tiles, 4 Code Card Decks (44 Cards Each).

TN1900

KUBO Coding Core Set

This KUBO Coding Starter Set is the ideal starting point for introducing coding and computational thinking to students from four years. Teach functions, subroutines and loops in simple, logical steps. KUBO comes with comprehensive lesson plans and teacher guides to make it easy for teachers to deliver cross-curricular challenges in a hands-on, playful way.

KB1030 \$349.95

See page 34

OSMO Little Genius Starter Kit incl Mirror & Stand

Transform your tablet into an early learning tool. Designed for ages 3-5, the games in Osmo Little Genius Starter Kit take pre-schoolers on a hands-on adventure through the fundamentals of learning. In the end, they'll spark their imaginations, learn critical skills, and have a blast.

MG9010 \$149.95

See page 76

Intelino Smart Train

Great child's first train set! Intelligence and sophistication of an advanced robotic toy. The Intelino Smart Train entertains fans of all ages and teaches the basics of coding.

IWA8501 \$169.95

Zoomy 2.0 - Digital Microscope

Zoom in on the world around you! This freshly updated, all-in-one handheld digital microscope now in vibrant blue gives early scientific study a whole new perspective, and is easy for young children to use. Zoomy 2.0 magnifies up to 54x and allows students to closely analyse the structure of objects in greater detail than ever before. Use with a computer, projector, or interactive whiteboard. Uploads and connects via USB. Features 640 x 480 pixels, VGA CMOS sensor, 4 LED lights, and 2 head adapters. Compatible with PC and Mac. Measures 7.5cm in diameter.

LER4429-B \$109.95

Luna 2.0 - Document Camera

Contemporary new design and enhanced image quality meets reliable simplicity. Easy-to-use digital projection camera is also a web cam and photo/video camera. Great for students' multimedia projects across the curriculum or whole-class demonstrations of manipulatives in action, book pages, science models, and more. Connects via USB port to use with your computer or interactive whiteboard. Features 2.0 MP digital images, adjustable gooseneck, auto focus, 8 LED lights, and internal microphone. No batteries required. Compatible with PC and Mac. Measures 50cm high.

LER4427 \$299.95

Hue HD Camera & Visualiser

The HUE camera is a multi-purpose camera and can be used for stop motion animation, video recording, document imaging, visualiser and video chat. Easy to use and portable, this camera is popular with teachers throughout the world. The built-in microphone allows you to record your presentation or a student speaking about a topic. With its weighted base and flexible neck, the camera can also be used to magnify very small items such as insects, circuit boards and more to share them with the whole classroom.

HUE001 \$139.95

micro:bit

micro:bit

The micro:bit is a pocket-sized codable computer measuring only 4 x 5cm. Designed to be fun, engaging and educational, allowing students to learn the skills of the future, including coding and digital designing in an intuitive way. micro:bit can be coded via any web browser. Use micro:bit on its own, or combine it with a wide variety of compatible resources. The possibilities with micro:bit are truly endless.

Powered	Connection	Programming Language/Software	Operating Systems	Age Group Years 3-8
x2		JavaScript		

Why micro:bit?

- The micro:bit has a full website of coding language, lesson plans, tutorials and fun ideas
- micro:bit supports different levels of coders, from beginners to advanced
- The computer is only 5cm x 4cm and weighs only 8g
- micro:bit is completely programmable, meaning each of its 25 LEDs, buttons, inputs, outputs, accelerometer and magnetometer can be individually programmed
- Bluetooth Smart Technology means you can connect the micro:bit computer to the micro:bits, devices, phones, tablets, cameras and other everyday objects

micro:bit

The micro:bit is a small yet engaging platform for students of any coding experience, from beginner to advanced. The micro:bit Go ELE8764 includes just the micro:bit board on its own. The micro:bit Go ELE8765 includes the micro:bit board, 1x USB cable, battery holder and 2x AAA batteries. The micro:bit Bundle Pack (ELE8766) includes 10 sets of the micro:bit Go, making it perfect for classroom use.

ELE8764	micro:bit only	\$25.95
ELE8765	micro:bit Go	\$29.95
ELE8766	micro:bit Bundle Pack of 10	\$239.95

Battery Pack for micro:bit

This battery pack for micro:bit allows you to use your micro:bit without being connected to a power source via USB cable. Includes 1 battery holder, 2 batteries and a micro-USB cable.

GRV2047	\$11.95

SAM Labs

SAM Labs makes smart construction kits of clever little blocks and a fun app that give everyone the power of technology to build inventions. SAM Labs is a combination of hardware blocks and software blocks, and offers students the ability to build and program their own inventions while learning the key aspects of STEAM. Simply download the app, connect your hardware blocks with the SAM Space app, and make connections between the blocks in the app. It's that simple!

Powered 	Connection 	Programming Language/Software 	Operating Systems 	Age Group Years 2-8

Wireless Hardware Blocks

SAM Labs consists of wireless blocks with different functions (input such as sliders, buttons, temperature sensors, or output, such as a buzzer, DC Motor, or Servo motor), which are combined with each other and with over 40 software blocks, found in the SAM Space Education app.

Software Blocks

With the 40+ software blocks, you can customise the behaviour of the hardware blocks – for example change the colour of the light, or create a melody for a buzzer.

Why SAM Labs?

- Bring STEAM into the classroom with endless possibilities, combinations and inventions
- Wireless blocks means no wires, easy building and more freedom to create and invent
- Use the SAM Space app to add custom features to your projects, to control your computer with SAM blocks, or connect to other external platforms
- Get access to a wealth of DIY projects, games, gadgets, tutorials and much more
- LEGO compatible to extend your models

SAM Lab – Maker Kit

The SAM Lab Maker kit is the ultimate classroom solution to invent, create and be creative with STEAM, while learning about coding. Included:

- 17 rechargeable wireless SAM hardware blocks with additional accessories
- 40+ SAM software blocks
- SAM Space app tailored for educators
- Easy integration with LEGO®
- Curriculum-based STEAM projects on data capture, programming logic & so much more
- Hands-on educator support

SL001

\$859.95

SAM Lab – Learn to Code Kit

The SAM Labs Learn to Code kit combines the power of the wireless Sam blocks with the popular micro:bit. Use the micro:bit to control the blocks, or the other way around! This set is designed to cater for teachers of all levels of coding experience, increase student engagement, decrease teacher workload and build confidence. Program with Google Workbench! For teachers who already have micro:bits, we would suggest SL022. The kit SL022K includes 10 micro:bits for teachers new to micro:bit.

SL022 Kit without micro:bit \$1,999.95
 SL022K Kit with micro:bit \$2,239.95

Kit with micro:bit
\$2,239.95
 Save **\$19.50**

Suitable for up to 30 students in grades 4 to 8!

What's in the box?

- 10x micro:bit battery holder
- 10x micro:bit data cable
- 10x light sensor, buzzer and slider
- 1x charging station

Sam Labs

Choose the perfect SAM Labs STEAM Course Kit

Bring a world of coding and creating to the classroom. Bursting with a variety of hardware and software, our classroom-proof kits with curriculum aligned activities provide everything you need to unleash your students' creativity. SAM Labs offers an affordable and flexible solution to support coding education into your school, focused on scalability and integration into core classroom experiences.

STEAM Alpha Course Kit

- Supports 2-3 students at the time.

SL004

\$229.95

Key Features

- SAM Space Education App
- 4 SAM Blocks: 2x DC Motor, 1x light sensor, 1x RGB light
- 10 Accessories
- 25+ lesson plans aligned to the Australian curriculum

STEAM Team Course Kit

- Supports 9-10 students at the time
- For smaller classes, makerspaces and coding clubs
- Includes 3 identical sets of blocks, so 3 groups of students can do the same activity simultaneously
- 3 bonus blocks for more versatility
- Durable classroom-proof stackable storage box

SL005

\$649.95

Key Features

- SAM Space Education App
- 15 SAM Blocks (3 sets of: 2x DC Motor, 1x light sensor, 1x RGB light, plus 3 additional bonus block)
- 30 Accessories
- 25+ lesson plans aligned to the Australian curriculum

Bring STEAM learning to the classroom

STEAM Classroom Course Kit

- Supports 30 students at the time
- The complete solution for a full classroom with the lowest price-per-student ratio
- Includes 10 identical sets of blocks, so 10 groups of students can do the same activity simultaneously
- 7 bonus blocks for more versatility
- Durable classroom-proof stackable storage box

SL006

\$1,899.95

Key Features

- SAM Space Education App
- 47 SAM Blocks (10 sets of: 2x DC Motor, 1x light sensor, 1x RGB light, plus 7 additional bonus block)
- 100 Accessories
- 25+ lesson plans aligned to the Australian curriculum

SAMblockly

Program SAM Labs with SAMblockly! Web based, imperative block-based coding, compatible with Chromebook and Mac (using Chrome).

Combine SAM Labs modules with micro:bit

Integration with other platforms!

SAM Labs is now also integrated with micro:bit, Sphero and Parrot Drones via Workbench Education. Use your SAM Labs modules and the SAMblockly software to activate and control these devices!

Expand your SAM Labs Kits

SAM Labs – DC Motor

SAM Labs is a combination of hardware blocks and software blocks, which offers students the ability to build and program their own inventions while learning the key aspects of STEAM.

SL007 \$52.95

SAM Labs – Light Sensor

The SAM Labs Light Sensor is an intuitive block. The block is able to sense how much light is in a room and can be programmed easily through the app to respond to different light intensities.

SL008 \$36.95

SAM Labs – RGB Light

The RGB Light block can be easily controlled with any sensor. The light can show any colour, flash, dim, or stay on. Program your own traffic light or even an interactive lamp.

SL009 \$36.95

SAM Labs – Button

The SAM Labs Button block can be used to control any part of the sequence, use it to turn on your light, start your car or even make a tune on the buzzer.

SL010 \$36.95

SAM Labs – Slider

This Slider block can control other blocks in an extremely precise manner, slide the controller form left to right to control the intensity of your lights or turn your car left or right.

SL011 \$36.95

SAM Labs – Tilt Sensor

The Tilt sensor can be used to detect motion and send that information onto another block. You may program the tilt sensor to send a message when tilted to a light block to change colour or on and off.

SL012 \$36.95

SAM Labs – Buzzer

The Buzzer block can be easily manipulated by other sensors to create sound. Simply change between the 18 different sounds and notes to create a melody or alarm. Program the Buzzer to interact with other blocks.

SL014 \$44.95

SAM Labs – Heat Sensor

The Heat Sensor block can detect different temperatures and can be programmed to send different messages to other blocks depending on the temperature, for example, the Heat Sensor can be programmed to turn on your fan when the room feels hotter.

SL016 \$36.95

SAM Labs – Pressure Sensor

The Pressure Sensor will produce a value between 0 – 100 depending on how much pressure it registers. Program this block so that the harder you press the brighter the light or louder the noise is produced. Use this block to control the melody of your Buzzer.

SL017 \$36.95

SAM Labs – Proximity Sensor

This Proximity Sensor block can be used to sense how many people are in the room or how close you are to the block. Program this block to tell a robot to stop when it is too close, or to set off an alarm when someone has entered the room.

SL018 \$36.95

SAM Labs - Servo Motor

The Servo Motor can be used to rotate anything back and forth up to 90 degrees, the angle can be easily controlled in the app. Use this block to make your robot walk or move its arms.

SL019 \$36.95

SAM Labs - Charging Station

Charge up to 40 SAM Blocks in any configuration with the SAM Labs Charging Station, which can be placed on a flat surface or attached to a wall for easy storage.

SL020 \$129.95

Grove

Grove

Grove is a modulated, ready-to-use tool set. It takes a building block approach to assembling electronics. Compared with the traditional, complicated learning method of using breadboards and various electronic components to assemble a project, Grove simplifies this learning process significantly. The Grove System consists of a base shield and a wide variety of input and output modules. Simply connect the grove modules via the base shield to a microprocessors such as micro:bit or Arduino for endless coding and science projects.

Powered	Programming Language/Software	Operating Systems	Age Group Years 7+
x2	(GRV6024 & GRV6130) (GRV0762)		

Why Grove?

- Uniform Interface, plug-and-play, no soldering required
- Perfect for prototyping, without the need for soldering or complex wiring
- Detailed documentation, electronics background is not required
- Various function modules including display, motion detect, communication, environment, and robot
- Grove is now compatible with most development platforms including Arduino, Raspberry Pi, micro:bit and more!

10 Inventor Kits & 10 micro:bit
\$1,159⁹⁵
 Save \$254.50

Grove Inventor Kit for micro:bit

The Grove Inventor kit for micro:bit brings endless possibilities to your micro:bit. The Grove shield for micro:bit makes it easy to connect your micro:bit to all of the grove components, including sensors, displays and actuators. Please note: micro: bit is not included in GRV0762, but is included in GRV0762K and GRV0762-10K.

GRV0762	Inventor Kit	\$109.95
GRV0762K	Inventor Kit & micro:bit	\$116.95
GRV0762-10K	10 Inventor Kits & 10 micro:bits	\$1,159.95

Kit includes

- Grove Shield for Micro:bit
- Grove Rotary Angle Sensor
- Grove Speaker
- Grove Ultrasonic Ranger
- Grove Light Sensor v1.2
- Grove WS2812 Waterproof LED Strip - 30 LEDs 1 meter
- Grove Gesture
- Grove 4-Digit Display
- Grove Red LED
- Micro USB Cable - 48cm
- 12 Projects Manual
- Alligator Cable
- Grove Cable

Grove - Starter Kit for Arduino

This Grove - Starter Kit for Arduino is a perfect starter kit for Arduino beginners. It includes a Base Shield which has many Grove connectors on board, twelve Grove modules that covers most functions needed by a beginner and a very helpful user manual that can help you get started quickly. Please note: this kit does not include Arduino, which is required to use the kit.

GRV6024 \$79.95

Kit includes	- Buzzer	- Temperature Sensor	- DIP LED Blue-Blue
- Base Shield	- Sound Sensor	- LED	- DIP LED Green-Green
- LCD RGB Backlight	- Touch Sensor	- Light Sensor	- DIP LED Red-Red
- Smart Relay	- Rotary Angle Sensor	- Button	- Mini Servo

Grove Smart Plant Care Kit For Arduino

To keep the indoor plants alive and robust is not an easy task. Plants are like people, they need nutritious soil, right temperature, adequate sunshine and water. Many electronics beginners who are getting started with Arduino and love planting would start their first project of making a plant growing system. Here we provide one-stop solution to build up your own plant care system. Please note: this kit does not include Arduino, which is required to use the kit.

GRV6130 \$119.95

Kit includes	- Moisture Sensor	- OLED Display 0.96"	- Relay
- Base shield	- Sunlight Sensor	- Encoder	- Water Flow Sensor
- Temperature & Humidity Sensor	- Button	- Button	- 12V Water Pump

Grove - Essential Modules Add-On Kit

The Grove Essential Modules Add-On kit includes the most commonly input and output sensors and modules to add to any project. Also included is a base shield for micro:bit and cables in two lengths. The kit requires a micro:bit. Available with or without micro:bit. For more information about the individual modules, please refer to our website.

GRV1123K Kit without micro:bit \$69.95
GRV1123K-M Kit with micro:bit \$98.95

Kit includes

- GRV1132 Grove Light Sensor v1.2 \$5.95
- GRV1123 Grove Button \$3.95
- GRV1435 Grove Red LED \$3.95
- GRV1720 Grove Buzzer \$3.95
- GRV1439 Grove White LED \$3.95
- GRV1223 Grove Sound Sensor \$9.95
- GRV1237 Grove Touch Sensor \$7.95
- GRV1363 Grove Shield for micro:bit v2.0 \$21.95
- GRV4310 Grove Blue LED \$3.95
- GRV9938 Grove Universal 4 Pin Buckled 50cm Cable (5 PCs Pack) \$7.95
- GRV9927 Grove Universal 4 Pin Buckled 20cm Cable (5 PCs pack) \$5.95

Grove - Environmental Science Modules Kit

The Grove Environmental Science Modules Kit is the perfect combination of modules to combine environmental science topics with coding with micro:bit. Analyse temperature, humidity, moisture levels, sound, water and more, and display the values on the 4-digit display included. The kit requires a micro:bit. Available with or without micro:bit. For more information about the individual modules, please refer to our website.

Boson

Boson

Boson is a set of modular electronic building blocks designed for young inventors and STEAM teachers, to provide a visual way to make math and science subjects fun in the classroom. The colour-coded modules make it easy to identify input and output modules. Boson can be used completely coding-free, or use it with the Expansion board for micro:bit to program the modules. With sensors, actuators, logic gates and more, there are infinite possibilities for endless learning.

Powered	Programming Language/Software	Operating Systems	Age Group Years 4+
x3	code-free or with		

Why Boson?

- Plug and play – Boson modules are connected through flexible cables, requiring no soldering
- Hook up to everything: Boson modules are magnetic. Stick them on a whiteboard or other magnetic objects, or screw them onto something with the mounting plates. LEGO compatible.
- Tutorials and lesson plans are available.
- Start with Boson free of coding, or upgrade to platforms such as micro:bit to make Boson programmable
- Digitalised scientific exploration – the Boson platform includes a series of industrial standard sensors, for entry level scientific experiments, unattended environmental monitoring or upload data to an IoT server

Boson Starter Kit for micro:bit

Build your own programmable project with micro:bit! The Starter Kit for micro:bit comes with 8 modules and 4 quick start project cards, plus a 12-project tutorial from beginner to advanced. The micro:bit expansion board is used to hook up the Boson modules to micro:bit.

DFR086 Starter Kit \$109.95
DFR086K Starter Kit & micro:bit \$129.95

Boson – Expansion Board for micro:bit

The expansion board for micro:bit allows you to hook up all your Boson modules to micro:bit. This makes your Boson modules programmable! micro:bit is not included and sold separately.

DFR521 \$19.95

Use Boson with micro:bit

50+ colour coded electronic modules for infinite possibilities

Tutorials & course materials for both learners & educators

Attachable to Lego blocks, Velcro pads, screws & whiteboards

Digitized scientific exploration

Start with coding free; upgradable to micro:bit & Arduino.

Plug & play design with unifying safe & secure connection

Boson Science Kit

The Boson Science Kit includes 8 scientific sensors that are most widely used in modern IoT applications, for physics, chemistry and biology. It includes activity cards to start your scientific exploration on 8 different topics. The plug and play monitor shows instant results and measurements.

DFR034 Set of 8 \$229.95

Boson – Enviromental Science Kit

This kit includes a range of Boson modules to experiment with science activities. Included in the kit (DFR011K) is one of each: expansion board for micro:bit, temperature sensor, pH sensor, light sensor, soil moisture sensor, humidity sensor, waterproof sensor, OLED module, red, green and blue LED module, cable pack (pack of 30) and a battery holder. The kit is also available with a micro:bit included (DFR011K-M).

DFR011K Kit without micro:bit \$299.95
DFR011K-M Kit with micro:bit \$309.95

Kit includes one of each:

- DFR011 Temperature Sensor - Input \$19.95
- DFR039 pH Sensor - Input \$99.95
- DFR004 Light Sensor - Input \$10.95
- DFR038 Soil Moisture Sensor - Input \$10.95
- DFR041 Humidity Sensor - Input \$26.95
- DFR042 Waterproof Sensor - Input \$16.50
- DFR044 OLED Module - Output \$55.95
- DFR017-R Red LED Module - Output \$10.95
- DFR017-G Green LED Module - Output \$10.95
- DFR017-B Blue LED Module - Output \$10.95
- DFR521 Expansion Board for Microbit \$19.95
- DFR525 Cable Pack \$16.95
- DFR529 3x AA Battery Holder \$9.95

Boson – Essential Input & Output Modules Kit

This kit includes the most popular Boson modules, which can be used on their own or as an add-on set to your existing Boson range. The kit (DFR002K) includes one of each: expansion board for micro:bit, blue, red and yellow push buttons, self locking switch, buzzer, fan, voice recorder, motor, servo motor, multicolour string light, cable pack of 30 and a battery holder. Also available with a micro:bit included (DFR002K-M).

DFR002K Kit without micro:bit \$189.95
DFR002K-M Kit with micro:bit \$214.95

Kit includes one of each:

- DFR002-B Blue Push Button - Input \$10.95
- DFR002-R Red Push Button - Input \$10.95
- DFR002-Y Yellow Push Button - Input \$10.95
- DFR003 Self Locking Switch - Input \$10.95
- DFR020 Buzzer Module - Output \$10.95
- DFR021 Fan Module - Output \$16.50
- DFR022 Voice Recorder Module - Output \$19.95
- DFR024 Motor Module - Output \$19.95
- DFR025 Servo Module - Output \$21.95
- DFR019 Multicolour String Light - Output \$26.95
- DFR521 Expansion Board for Microbit \$19.95
- DFR525 Cable Pack \$16.95
- DFR529 3x AA Battery Holder \$9.95

Boson – Science Modules Kit

Perform science and physics activities with this Boson kit. The kit (DFR001K) includes one of each: expansion board for micro:bit, rotation sensor, tilt sensor, touch sensor, sound sensor, infrared proximity sensor, conductivity sensor, motion sensor, heart rate monitor, ultrasonic sensor, bright LED light, cable pack of 30 and a battery holder. Also available with a micro:bit included (DFR001K-M).

DFR001K Kit without micro:bit \$239.95
DFR001K-M Kit with micro:bit \$249.95

Kit includes one of each:

- DFR001 Rotation Sensor - Input \$10.95
- DFR005 Tilt Sensor - Input \$10.95
- DFR008 Touch Sensor - Input \$10.95
- DFR009 Sound Sensor - Input \$10.95
- DFR010 Infrared Proximity Sensor - Input \$19.95
- DFR012 Conductivity Sensor - Input \$10.95
- DFR013 Motion Sensor - Input \$24.95
- DFR043 Heart Rate Monitor Sensor - Input \$43.95
- DFR045 Ultrasonic Sensor - Input \$59.95
- DFR016 Bright Light LED - Output \$10.95
- DFR521 Expansion Board for Microbit \$19.95
- DFR525 Cable Pack \$16.95
- DFR529 3x AA Battery Holder \$9.95

Kitronik & E-Textiles

Wearable E-Textiles Kit for micro:bit

This kit is a great way to get started with creating micro:bit controlled E-Textiles projects and designs. This kit includes five 5mm LED's, ten ultra-slim LED's, ten crocodile clips and 6 meters of conductive thread. Please note: this kit requires the use of micro:bit, not included and sold separately. Also required and not included: scissors, pliers and needles.

ELE1747 \$18.95

Conductive Thread - 23m

This conductive thread is thin, strong, smooth and completely made of stainless steel. Ideal for use with wearable E-Textiles. The thread will not oxidise and is safe to wash. Includes 23m thread on small bobbin.

ELE9161 \$14.95

STOP:bit - Traffic Light for micro:bit

Ideal for classroom coding projects, this STOP:bit is a purpose built and pre-assembled traffic light for projects with micro:bit. Using the micro:bit as your control box, you can create a simple and effective pedestrian crossing without any soldering or fiddly connections. Traffic light stand measures 12cm high. Please note: micro:bit is required and not included.

ELE1717 \$7.50

LAMP:bit - Street Light for micro:bit

The LAMP:bit is a clip-on board for micro:bit, replicating a street light. Includes a phototransistor to detect changes in light levels. The street light is 13.5cm high. Please note: micro:bit is required and not included.

ELE1718 \$8.95

ACCESS:bit - Access Barrier for micro:bit

The ACCESS:bit is a clip-on board for micro:bit, simulating an access barrier. It has been designed to have the ability to drive two servos with barriers and a buzzer for sound. When the micro:bit is connected, it can double-up as LED display to create warning lights. The 2x AAA battery cage acts as support stand. Please note: micro:bit is required and not included.

ELE1719 \$19.95

Traffic Control Kit including micro:bits

This kit allows you to create your own traffic control centre for your town. Set up traffic lights, street lights and access barriers and use micro:bit to control each of them individually. The kit includes 2 STOP:bits (ELE1717), 2 LAMP:bits (ELE1718), 2 ACCESS:bits (ELE1719) and 6 micro:bit Go's (ELE8765) to power and code each of the accessories.

Makey Makey

Makey Makey is the ultimate STEAM invention kit that works through opening and closing circuits. Turn everyday objects into touchpads and combine them with the Internet.

Connect the circuit board via alligator clips to anything and everything that conducts electricity to create a circuit. Connect the circuit board to your laptop or PC and let the connected conductive materials take over your computer!

Why Makey Makey?

- No software or prior programming knowledge required. Just plug, clip, play, invent. Works with Mac and Windows
- Connect the world around you to your computer! Setup takes just seconds.
- 1000s of possibilities! Find endless lesson plan ideas, project ideas and inspiration online
- Works with any material that can conduct at least a tiny bit of electricity

Makey Makey Classic

Each kit includes the Makey Makey Board, USB Cable, 7 Alligator Clips, 6 Connector Wires, Instructions with Visual Project Start Guide, Online Documentation, and 20 Colour Stickers. Connects via USB (Not compatible with iPads or tablets).

MKK001	Each	\$69.95
MKK001-5	Set of 5	\$339.95
MKK001-10	Set of 10	\$679.95

Turn bananas into piano keys with Makey Makey!

Makey Makey STEM Pack

- Classroom Invent Kit

Perfect for classrooms, schools, districts, workshop teachers, and anyone else that wants all their Makey Makes in a really nicely organised briefcase. The Makey Makey STEM Kit is a distillation of 12 Makey Makes, 12 booster packs and some extra parts for when you want to invent something even bigger. Contents:

- 12 Makey Makey Classics
- 12 Alligator Clips
- 12 Connector Wires
- 72 Extra Alligator Clips
- 144 Connector Wires (for the back)
- 12 Makey Makey-Optimised Conductive 6B Pencils

MKK003		\$1,199.95

Perfect for classrooms, workshops and Makerspaces!

littleBits

littleBits®

littleBits

Bring your STEAM projects to life and electrify lessons. littleBits is a hands-on learning system of electronic building blocks that allows students of all ages to create with technology. The snap-together Bits are easy to use and simple to understand, no prior experience required. The STEAM solutions are gender neutral, scalable across Grades 3-12, and suitable for cross-curricular instruction.

Powered	Programming Language/Software	Operating Systems	Age Group Years 3-8
	code-free or with 		

Why littleBits?

- Platform of easy to use electronic building blocks empowering everyone to create inventions, large and small
- Gender neutral product allowing kids to solve real-world problems
- Bit has a unique function, such as light, sound, sensors or motors, which can be combined with other Bits to form a system.
- No soldering or wiring required - easy to use straight out of the box.

littleBits Workshop Set

The Workshop Set is bigger and better than ever! It offers a great value with 160 Bits (8 sets of 20 Bits), and can support up to 32 inventors in your classroom, library, or makerspace. Get ideas from the educator's guide or create your own workshops! It's the perfect way to incorporate formal or unstructured STEM/STEAM learning into your program (and lots of fun!). For a complete list of modules included, please refer to our website.

LIB6713 \$2,729.95

Kit includes

- Supports up to 32 inventors problem-solving, tinkering, and flexing their maker muscles together.
- Ideal for educators, makerspaces, libraries, and after-school programs
- Access thousands of invention and lesson ideas online

littleBits Intro Kit

The Intro Inventor Kit from littleBits includes everything creative students need to turn their ideas into inventions! With a range of Bits that move, light up, and make noise, students gain STEAM skills by learning how technology is built. Over 12 activities in the free Inventor App guide them through building fun inventions. Product features include in-app instructions for over 12 activities, tech sensors, paper templates, mounting boards, LED light, motor, stickers, free Inventor App, and battery.

LIB823 \$199.95

littleBits CloudBit

The cloudBit is the easiest way to create internet-connected devices. No programming, soldering or wiring required.

LIB684 \$129.95

littleBits STEAM Student Set

Sets you up for 16+ hours of STEM/STEAM teaching with 8 engaging challenges, and additional companion lessons. The set comes with 19 bits, 45 accessories and a booklet. We walk you through every step with comprehensive lessons and guides. Students engage with electronics by completing 8 challenges that progress in difficulty, with 10 companion lessons for educators. With the inclusion of Art in STEM, students are empowered to think creatively and design and engineer solutions to real-world problems. Comes with a 120+ page teacher guide. Find the full specs on our website.

Bring STEAM learning to the classroom

LIB847

\$499.95

littleBits LED Matrix

The LED matrix is a colourful display that you can control using code or other Bits. Set it to SIGNAL mode to play with preset programs, or switch it to SERIAL mode to program your own graphics with the codeBit.

LIB028

\$109.95

littleBits STEAM Student Set Expansion Pack: Science

Create earthquake alarms or food chain models. With 12+ hours of instructional life and earth science content, 7 Bits and 22 accessories, this add-on kit allows you to offer science topics with the littleBits platform. Please note: the STEAM Kit (LIB847) is required for this add-on kit. Ideal for up to 3 students per kit and grades 3-5.

LIB6829

\$239.95

littleBits STEAM Student Set Expansion Pack: Maths

Learn and apply maths concepts to create inventions like a decodable Cipher machine or a lock-out safe. With 12+ hours of instructional maths content on littleBits classroom, 11 Bits and 4 accessories, this add-on kit brings maths topics to life. Please note: the STEAM Kit (LIB847) is required for this add-on kit. Ideal for up to 3 students per kit and grades 3-5.

LIB6831

\$239.95

littleBits Code Education Kit

An intro to coding in the classroom that engages students through an activity they love: making and playing games. The littleBits Code Kit combines electronic building blocks with approachable drag-and-drop block-based programming, providing a foundation of coding as a creative tool that can power real-world inventions. The kit includes 16 Bits, 30+ accessories, tons of resources and a computer-based Code Kit app, 100+ activities and 10 lessons.

LIB010

\$549.95

littleBits CodeBit

The codeBit allows you to program how your Bits work. Using the littleBits Code Kit app you can command this Bit to create unique sounds, movements, and animations. Wirelessly upload code from your computer to your codeBit with the dongle.

LIB153

\$129.95

Arduino Education

Arduino Education

Arduino Education is focused on developing the next generation of STEAM systems and supporting the needs of educators and students throughout the educational journey. Arduino Edu has developed classroom kits suitable for end of primary and high schools, with learning paths for individual and collaborative educational approaches. Whether you are new to electronics and want to introduce physical computing and computational thinking to your classroom, or a university professor skilled in electronics, Arduino has a suitable kit for you.

Powered	Connection	Programming Language/Software	Operating Systems	Age Group
 		Code-free (ARD0014) or  (ARD0076 & ARD0101)	     	Years 6-12

Why Arduino Education?

- Arduino Education is on a mission to make technology accessible to everyone, and into the hands of every student and educator.
- Arduino Education is focused on creating the next generation of STEAM programs – integrating Science, Technology, Engineering, Arts and Maths – while supporting the needs of teachers and students throughout the educational journey.
- Arduino Education offers solutions for the classroom, kits, bundles, and boards with learning paths for individual and collaborative educational approaches.
- Learners explore Arduino Education in a hands-on, constructive way as they work through the kits and explore the creative capabilities of each board.

Arduino Edu – Starter Kit – Classroom Pack

The Arduino Starter Kit Classroom Pack is a bundled solution, containing six of the popular Arduino Starter Kits. Suitable for least twelve students for middle school onwards. Each kit contains an Arduino Uno Rev 3 board, a collection of sensors and actuators, and a guide book which will help students and teachers to take their first steps into the world of electronics, with interactive and sensing objects. Please refer to our website for a full list of components included in each kit.

ARD0076

\$849.95

Key Features:

- Learn the fundamentals of programming and electronics
- Introduction to sensors and actuators
- Understanding digital and analogue signals
- Critical thinking, collaborative learning and problem solving

Arduino Edu – CTC 101

This modular STEAM program consists of a toolbox with over 25 cross-curricular projects and experiments, an online platform, and guided educators support.

The 5 themed modules introduce students to programming and coding, serial and wireless communication, robotics, power systems, motors, actuators, analogue and digital systems, and advanced sensors. It covers technology, maths and physics, but educators are also encouraged to apply art, woodwork, sewing, civics, language arts, etc.

ARD0101

\$3,299.95

Key Features:

- Includes all components needed for a class of 30 students
- Receive access to the online platform for 2 consecutive years, including training, webinars and online community
- Learn about the fundamentals of programming and electronics

Arduino Edu – Science Kit Physics Lab

This kit is developed for scientific exploration for students in years 6-8. Developed in partnership with Google, it is an Arduino-based physics lab, fully compatible with Google Science Journal available on Android. The kit features a range of sensors to measure light, temperature, motion, magnetic fields and full access to online course content for teachers and students.

ARD0014

\$299.95

Key Features:

- Experiment with electromagnetism and thermodynamics, kinetics and kinematics, forces, motion, magnetism, and conductivity
- Includes exclusive access to online educational materials
- Includes Arduino MKR WiFi 1010 and a wide range of sensors

Circuit Scribe

Let your creativity merge with science as you build exciting circuits using our Circuit Scribe Kit's conductive ink pen, magnetic modules, and plain old printer paper. By placing the paper over a steel sheet, included in every kit, your paper becomes the base for blinking lights, beeping buzzers, and whirling motors. Everything you need to create dynamic and fun paper circuits. Find the exact contents of each kit on our website.

Powered

Age Group

Years

3+

Why Circuit Scribe?

- Draw circuits instantly with a conductive ink pen that dries instantly
- Build simple circuits or complicated devices from basic switches to your own pen on paper machines
- Educator friendly kits teach circuitry concepts from current flow to digital logic
- Use your skills to make anything from interactive art to interactive paper devices while having fun

Circuit Scribe Ultimate Kit – 16 Modules & 10 Connecting Cables

Everything you need to create dynamic and fun paper circuits. The kit features 10 magnetic connection cables that let you hook up your paper circuits to programmable platforms like Arduino (not included). The kit includes everything from our Maker Kit plus extra LEDs, two DPDT switches, and a motor (see our website for full list). With the Ultimate Kit, you can make complex, robust circuits.

CSR003 Ultimate Kit \$179.95
 CSR005 Replacement Pens – Pack of 5 \$169.95

Squishy Circuits

Squishy Circuits uses conductive and insulating play dough to teach the basics of electrical circuits, a perfect blend of play and learning! Our play dough kits, projects, and recipes teach problem solving and engineering concepts and inspire creativity and independent thinking.

Powered

 x 4

Age Group

Years

K-5

Why Squishy Circuits?

- Squishy Circuits are a design tool that allows everyone, from young students through to adults, to create circuits and explore electronics using play dough
- A perfect combination of science, technology, art and design
- Squishy Circuits makes learning about electricity and circuits accessible, and adding on to or expanding your sets can be done with easily available components

Squishy Circuit Standard Kit

The standard kit includes everything you need to get started with some more advanced Squishy Circuits projects that use LEDs, buzzers, and insulating dough! Contents:

- 1 x Battery Holder
- 1 x Piezoelectric Buzzer
- 25 x LEDs (5 each of Red, Green, White, Yellow, Blue)
- 1 x 3.5oz Container of Insulating Dough
- 3 x 3.5oz Containers of Conductive Dough (in Red, Green, and Blue)

EL9350 \$69.95

Squishy Circuit Deluxe Kit

The deluxe kit is our most complete Squishy Circuits kit. It comes with more items than the standard kit and comes with pre-made doughs so you can start circuit building right away! This kit also includes a deluxe battery holder, which has a knob that allows your lights to blink and buzzers to beep at different speeds. Contents:

- | | |
|--|---|
| <ul style="list-style-type: none"> - 1 x Deluxe Battery Holder - 1 x Piezoelectric Buzzer - 1 x Motor with Fan - 1 x Mechanical Buzzer - 1 x Switch - 40 x LEDs (5 each of Red, Green, White, Yellow, Blue, Purple, Orange, and Colour Changing) | <ul style="list-style-type: none"> - 1 x Set of Dough Sculpting Tools - 1 x Rolling Pin - 1 x 7-Ounce Container of White Insulating Dough - 7 x 7-Ounce Containers of Conductive Dough (in Red, Blue, and Green, Yellow, Orange, Purple, and Black) |
|--|---|

EL9352 \$149.95

Osmo

Osmo Osmo is an award-winning game system that will change the way your child interacts with the iPad and iPhone by opening them up to hands-on play. Osmo fosters learning in key areas such as: creative problem solving, art, and STEM. Put your iPad in the Osmo base with the red reflector over the camera and now it can see what's in front of it! View students' progress at your myOsmo page.

Connection	Programming Language/Software	Operating Systems	Age Group
			Years K-6

Why Osmo?

- Osmo enables the iPad to merge the power of physical play with the digital advantages of real-time feedback
- Osmo encourages creative thinking and social interaction by expanding gameplay beyond the screen (using actual physical tools that convert to digital technology in the app)
- Education guides and support available

OSMO Little Genius Starter Kit incl Mirror & Stand

Transform your tablet into an early learning tool. Designed for ages 3-5, the games in Osmo Little Genius Starter Kit take pre-schoolers on a hands-on adventure through the fundamentals of learning. In the end, they'll spark their imaginations, learn critical skills, and have a blast. A holistic approach that sparks imagination and engages students in core subjects. Includes 4 Learning Games: ABCS, Squiggle Magic, Costume Party, & Stories.

OSMO Classroom Kit – Genius Edition

The Classroom Kit is the premium kit for educators to use Osmo in classrooms. Classroom Kit includes 4 stations, efficient tile storage cases, washable plastic tiles, upper and lowercase letters, modular stacking bins, and more! The set includes 4 bases, 4 sets of the Tangrams, Words and Numbers Games, and also can be used for the Masterpiece and Newton games.

- Teaches maths, art, spelling, critical thinking, creative problem solving and much more
- From phonics to photosynthesis, Osmo lesson plans can be easily integrated into any classroom
- Let provided lesson plans inspire your next exciting classroom, or customise own your lessons and Word albums in MyOsmo
- Inspires creativity, critical thinking, communication and collaboration
- Easy to install, introduce, oversee, and pack away without professional development training

MG300

\$679.95

OSMO Genius Kit Including Stand

The complete Osmo set that teaches maths, art, spelling, critical thinking, creative problem solving and much more. The OSO Genius Kit includes the Osmo iPad base, the Tangram game, the Numbers Game, the Words Game. The games Masterpiece and Newton can also be played as they don't require additional pieces.

- Learn spatial relational skills with Tangram's 500+ visual and spatial puzzles
- Practise spelling and critical thinking with Words
- Learn counting, addition, subtraction, multiplication and maths confidence with Numbers
- Newton teaches creative problem solving skills with creative engineering
- Masterpiece teaches drawing and creative confidence

MG9110

\$154.95

OSMO Creative Kit Including Stand

The Osmo Creative Kit combines creative tools, games and cutting edge technology to foster creativity and problem solving skills. The kit comes with Osmo base and mirror, and includes 3 games (Monster, Masterpiece and Newton), a creative board, Yoobi markers, fuzzy pouch and eraser cloth.

- Monster brings your drawings on the Creative Board to life in the Monster app.
- Masterpiece teaches drawing and creative confidence
- Newton teaches creative problem solving skills with creative engineering

Coding Steps Puzzle Tiles

Link the puzzle pieces together and follow the arrows! Practise with a sequence of instructions by moving in the direction of the arrows.

This will teach students the principles of programming. Use the puzzle pieces as an active game, or let your Bee-Bot or Blue-Bot follow the arrows. Each piece measures 15x15cm, set of 18 pieces. Please note, illustrated robots are not included.

LEGO® Education Coding Express

LEGO® Education Coding Express

Coding Express is a creative, intuitive and versatile solution that introduces pre-schoolers to early coding concepts that naturally sparks their curiosity, creativity and desire to explore and learn together. Based on the ever popular train theme, the highly versatile LEGO® DUPLO® solution allows children to make connections and intuitively explore early coding concepts, such as sequencing, looping and conditional coding, while developing problem-solving skills, critical thinking, collaboration, and social and emotional skills.

Powered	Connection	Programming Language/Software	Operating Systems	Age Group
				Years PS

Why LEGO® Education Coding Express?

- Screen-free introduction to coding, or use in combination with the app for extended play
- Introduces the basics of coding such as loops, sequencing, conditional coding, and cause and effect in a playful way
- Train design appeals to most students
- Action bricks with different behaviours bring the train to life
- Includes a child-directed app which combines physical play with digital intervention
- Reinforce language and literacy skills while improving problem-solving and critical thinking skills as well as collaboration
- Express ideas using digital elements
- Includes teacher guide with lesson plans

Set of 4
\$1,599⁹⁵
 Save \$111.85

LEGO Education Coding Express

Make your train pause, stop, change direction, sound the horn, and more! Taking the familiarity of a train and combining it with the new action bricks, early learners will learn through play about sequencing, looping, conditional coding, and cause and effect by placing the new action bricks within the train's track. Each action brick creates a specific action allowing for students to test and redesign ways to problem-solve and work together to get their train to its destination. The set includes 234 LEGO® DUPLO® pieces, and comes with a teacher guide including 8 online lessons: 4 lessons use the physical set, and the other 4 use the digital app.

LEG5025 Each Set \$427.95
 LEG5025-4 Set of 4 \$1,599.95

Coding Express Action Bricks

The five coloured action bricks will make the train come to life as students place them around the tracks to sound the horn, turn the lights on and off, pause and refuel, change direction and stop the train wherever they like.

Coding Express App

The free optional app combines physical play with digital intervention and is designed to enhance the learning experience. When you introduce the app, the four different themed activities change the way the action bricks behave, altering their effect on the train.

LEGO Education WeDo 2.0

WeDo 2.0 encourages students to put those aspects of scientific discovery to work by solving real STEAM problems. Using LEGO bricks, sensors and motors, students can use this solution to ignite their creativity, develop critical-thinking skills, explore career possibilities and simply get hands-on STEAM experience. This set helps make abstract engineering and science concepts concrete and improves students' collaboration, problem-solving and computational thinking skills.

Powered	Connection	Programming Language/Software	Operating Systems	Age Group
x2 add-on		SCRATCH Roberta TYNKER	iOS 	Years 2-4

Why LEGO Education WeDo 2.0?

- WeDo 2.0 engages students in science by making it real and relevant
- Curriculum aligned lesson plans included
- Introduces basic programming skills, critical thinking and problem-solving
- Students will investigate, model and design solutions to real-life problems
- Includes classroom-friendly software with teacher support and tutorials

LEGO Education WeDo 2.0 Core Set

The LEGO Education WeDo 2.0 Core Set is a hands-on solution that helps teach STEAM concepts in an engaging, discovery-based way. Designed with collaboration in mind, this set combines LEGO bricks with classroom-friendly software to introduce students to science, engineering and computational principles. Each set includes the programmable SmartHub, medium motor, motion sensor, tilt sensor and building elements.

LEGO® Education WeDo 2.0 Smarthub

The two-port Smarthub brings WeDo 2.0 sensors and motors to life. Using WeDo 2.0 Software and Bluetooth Low Energy (BLE), the Smarthub transmits data between a tablet or computer and the WeDo 2.0 Construction Set. Require two AA batteries or a Smarthub Rechargeable Battery.

LEG45301 \$109.95

LEGO Education WeDo 2.0 Smarthub Rechargeable Battery

Rechargeable lithium ion battery for the WeDo 2.0 Smarthub. Includes a built-in LED to indicate charge status.

LEG45302 \$109.95

LEGO Education WeDo 2.0 Medium Motor

Get things moving with the Medium Motor. Slotting between three modules, this medium-size, medium-power motor has 2x2 studs on top and a snap interface on the front to allow easy and optimized integration with TECHNIC and WeDo 2.0 constructions. It will be identified automatically by the WeDo 2.0 Software.

LEG45303 \$44.95

LEGO Education WeDo 2.0 Motion Sensor

Attach a Motion Sensor to the WeDo 2.0 Smarthub and detect objects within a range of 15cm, depending on the design of the object. No set-up is required. Simply connect the Motion Sensor and it will be identified automatically by the WeDo 2.0 Software.

LEG45304 \$44.95

LEGO Education WeDo 2.0 Tilt Sensor

Attach a Tilt Sensor to the WeDo 2.0 Smarthub and detect seven different types of orientation: Tilt This Way, Tilt That Way, Tilt Up, Tilt Down, No Tilt, Any Tilt and Shake. No set-up is required. Simply connect the Tilt Sensor and it will be identified automatically by the WeDo 2.0 Software.

LEG45305 \$44.95

LEGO® Education SPIKE™ Prime

LEGO® Education SPIKE™ Prime helps spark STEAM curiosity and confidence in year 5-8 students. This concept brings together colourful LEGO building elements, easy-to-use hardware, intuitive coding language based on Scratch and student-ready units to continuously engage your class regardless of their learning level. The endless creative design possibilities and easy-entry lessons of SPIKE Prime help students explore playful learning and build the STEAM skills they need to become the innovative minds of tomorrow.

Powered	Connection	Programming Language/Software	Operating Systems	Age Group Years 5-8

Why LEGO® Education SPIKE™ Prime?

- Includes 4 learning units for curriculum aligned STEAM content focusing on engineering and computer science, and integrating maths and science
- New and improved Technic and System bricks make building faster and easier than ever
- Develop efficient problem-solving and coding skills through decomposition of problems and algorithmic thinking
- Design projects that combine hardware and software components to collect and exchange data and work with variables, data arrays and cloud data
- Coding platform based on Scratch allows for both easy-entry projects as well as complex problem solving

LEGO® Education SPIKE™ Prime Set

The LEGO Education SPIKE Prime Set is the go-to STEAM learning tool for year 5-8 students. Combining colourful LEGO building elements, easy-to-use hardware, and an intuitive drag-and-drop coding language based on Scratch, SPIKE Prime continuously engages students through playful learning activities to think critically and solve complex problems, regardless of their learning level. The set includes the programmable hub, a large motor, 2 medium motors, distance, force and colour sensor and a variety of LEGO Technic and System elements, all packed in a sturdy box.

Add-on Set

LEGO Education SPIKE Prime Expansion Set

The LEGO Education SPIKE Prime Expansion set is an add-on set for the SPIKE Prime set (LEG45678) and includes 603 elements, including large wheels, banana gears, a colour sensor and a large motor. It features over 10 hours of targeted STEAM Learning that will inspire both students and teachers to build more advanced robots and prepare them for the challenging world of robotics competitions.

LEG45680

\$171.95

LEGO SPIKE Prime Technic Large Hub

Features 6 input/output ports for connecting sensors and motors, a customisable 5x5 light matrix, Bluetooth connectivity, speaker, 6-axis gyro, rechargeable lithium-ion battery and a micro USB port for connectivity with compatible computers and tablets.

LEG45601

\$404.95

LEGO SPIKE Prime Technic Large Angular Motor

The LEGO Technic Large Angular Motor is the ideal solution for high-power, high-torque applications, featuring an integrated rotation sensor and absolute positioning for true straight-line control.

LEG45602

\$59.95

LEGO SPIKE Prime Technic Medium Angular Motor

Build high-response robots with the LEGO Technic Medium Angular Motor featuring low-profile design, integrated rotation sensor with absolute positioning and 1-degree accuracy.

LEG45603

\$55.95

LEGO SPIKE Prime Technic Distance Sensor

Deliver high-accuracy results with the LEGO Technic Distance Sensor, featuring 1-200cm range, +/- 1cm accuracy and programmable LED 'eyes'.

LEG45604

\$58.95

LEGO SPIKE Prime Technic Colour Sensor

The LEGO Technic Colour Sensor distinguishes between 8 colours and measures reflected and ambient light from darkness to bright sunlight.

LEG45605

\$39.95

LEGO SPIKE Prime Technic Force Sensor

The LEGO Technic Force Sensor measures pressures of up to 10 Newtons (~1kg) for accurate, repeatable results. The sensor can also be used as a touch sensor when pressed, released or bumped.

LEG45606

\$35.95

LEGO SPIKE Prime Technic Large Hub Battery

A specifically designed rechargeable battery for powering the Technic Large Hub. It is charged inside the Hub via micro USB cable and can be removed from the Hub without the use of tools.

LEG45610

\$99.95

LEGO® MINDSTORMS® Education EV3

LEGO® MINDSTORMS® Education EV3 brings project-based learning to the world of computer science and STEM, enabling secondary students to improve critical-thinking, problem-solving, and collaboration skills. EV3 is a hands-on, cross-curricular STEM solution that combines LEGO Technic elements, classroom-friendly software and curriculum-aligned lessons to spark creative confidence and critical thinking. This solution tackles subjects like engineering, coding and physics with intuitive guides and smart bricks, and places real-life STEM topics right at pupils' fingertips.

Powered	Connection	Programming Language/Software	Operating Systems	Age Group Years 6-12
		 CoderZ		

Why LEGO® MINDSTORMS® Education EV3?

- High-quality hardware, open-ended and intuitive software makes this the most complete STEAM solution
- Includes curriculum aligned lesson plans, covering a wide range of subjects and topics
- Compatible with other coding platforms like Python, Scratch, MakeCode and more
- With lots of teacher support and guides, tutorials and assessment tools, EV3 is suitable for every level of coding experience
- Perfect for use in many robotics competitions

LEGO MINDSTORMS Education EV3 Core Set

This core set is optimised for classroom use and contains all you need to teach using the exciting LEGO MINDSTORMS set. It enables students to build, program and test their solutions based on real life robotics technology.

The system includes the Intelligent EV3 Brick, a compact and powerful programmable computer that makes it possible to control motors and collect sensor feedback using the intuitive icon-based programming and data logging software.

The set is delivered in a sturdy storage bin with a sorting tray, three servo motors, five sensors (gyro, ultrasonic, colour, and two touch), a rechargeable battery, connecting cables, and building instructions.

Teach STEM with a Mission to Mars using LEGO® MINDSTORMS® Education EV3 Space Challenges

This curriculum conforms to national curriculum standards and contains challenge and learning missions based around the theme of space. Three research projects, co-developed with space experts, providing rich opportunities for students to explore and create innovative solutions to current space exploration topics. The EV3 Space Challenge Set includes three learning mats, a challenge mat, dual lock tape and all of the LEGO elements required to build the challenge models*. The accompanying digital content provides student-ready materials, teacher notes and Building Instructions.

*Not included and sold separately.

LEGO® MINDSTORMS® EV3 Space Challenge Set

Accessories for LEGO® MINDSTORMS® Education EV3

Requires external power supply such as MIND004

EVShield with Arduino Uno Bundle

This combination pack contains an EVShield and Arduino Uno which allows you to easily connect and control your LEGO® components using the Arduino programming environment. Connect up to 4 EV3 or NXT motors, and 4 NXT or EV3 Sensors, and program for them through Arduino sketch. Attach up to 6 RC Servo motors to EVShield. It also provides ports for I2C devices. Please note: sensors not included.

MIND002

\$134.95

6-AA Battery Holder with EV3 Mount

6-AA Battery Holder with NXT/EV3 Mounts - This battery holder is designed to hold 6 AA batteries. It has NXT and EV3 compatible mounting.

MIND004

\$19.95

UI module for EVShield or Arduino

This 2.2 inch 320x240 TFT Colour Display attaches to the EVShield for easy user interaction. It has a 5 Position Navigation Switch and has been integrated with the EVShield library for easy programming. It also works with just Arduino (without the EVShield).

MIND003

\$54.95

EV3 Sensor Multiplexer for EV3 or NXT

Need more Sensors? Connect up to 3 LEGO sensors on a single port. Works with NXT or EV3. It does not work with third party sensors. Supported Sensors: EV3 Ultrasonic, Gyro, Infrared, Colour and Touch sensor.

MIND005

\$99.95

The LEGO® MINDSTORMS® EV3 Idea Book

The LEGO MINDSTORMS® EV3 Idea Book explores dozens of creative ways to build amazing mechanisms with EV3. Each model includes a list of the required parts, minimal text, and colourful photographs from multiple angles. You'll learn to build cars with real suspension, steerable crawlers, ball-shooters, grasping robotic arms, and other creative marvels. Each model demonstrates simple mechanical principles that you can use as building blocks for your own creations. 232 Pages.

PEN6003

\$59.95

IR Temperature Sensor for EV3 or NXT

Using this sensor, you will be able to measure ambient temperature and the temperature of any object the sensor is pointing to. This sensor is also needed to be able to compete in the Robocup Maze competition when using the LEGO MINDSTORMS EV3.

MIND001

\$108.95

Dash & Dot

Wonder Workshop's Dash & Dot inspire teachers and students in every classroom to be innovators by solving problems of the future. Dash & Dot help create in-depth experiences that balance fun and learning, promote collaboration and provide enduring value. With their ease of use, tons of lesson plans and activities available, a range of coding platforms and their exciting personalities, Dash & Dot offer a complete cross-curricular platform from K to 5!

Powered	Connection	Programming Language/Software	Operating Systems	Age Group
				Years K-5

Why Dash & Dot?

- Dash & Dot instantly appeal to every student with their cute personality. You will have trouble getting students to leave the classroom!
- Dash charges super quick, giving you more play time and less down time
- Dash & Dot are designed to introduce coding to students, with easy-to-use block based programming
- Dash & Dot improve team work, problem solving skills and patience, will covering cross-curricular topics with hundreds of projects
- In-depth curriculum available (challenge cards, 36+ free lessons and premium lessons included with the teacher guide and online subscription)
- Participate in the annual global Wonder League to compete against other students

Dash & Dot Educational Robots

Dash & Dot are robots with a personality! Program Dash to do anything from reacting to the sound of a clap to performing a victory dance to detecting and avoiding obstacles. Dash can detect objects in front and behind, can record custom sounds, moves in precise increments, and can move in angles. Push the boundaries of what is possible with Dot, a small but mighty robot. Dot is responsive and can interact with Dash with it's sophisticated technology. He expresses emotions with lights and sounds and detects when it's moved.

Wonder Workshop – Dash & Dot

Dash & Dot Wonder Pack & Curriculum Bundle

Everything that teachers need to try out Dash and Dot in their classroom. It comes with our award-winning Dash and Dot robots, accessories, and our curriculum. This exceptional value pack will spark creativity and encourage kids to use their imagination while helping them develop problem-solving skills.

DW0403K \$749.95

Includes:

- 1 Dash
- 1 Dot
- 1 Launcher
- 1 Xylophone
- 1 Building Brick Connector Set (4 connectors per set)
- 1 Accessory Pack: bunny ears, tow hook,
- bulldozer bar
- 1 Spiral-bound Curriculum Guide
- 1 Learn to Code Challenge Cards - Starter Pack
- 1 One-year subscription to our online Code to Learn Lesson Library

Dash STEAM Bundle

Inspire your students by bridging coding and robotics with the power of visual expression. This bundle combines six Dash robots, harnesses, dry erase markers, whiteboard mats, and project cards to imagine, code, and display original works of robot-drawn art in your classroom. This value bundle includes:

- 6 Dash robots
- 3 Marker harnesses
- 36 Dry erase markers (red, blue, green, orange, purple, black)
- 3 Whiteboard mats
- 3 Erasers
- 3 Sets of project cards

DW001-KIT7 **\$2,049.95**

Dash Robot & Sketch Pack Bundle

Get started with STEAM with this Dash & Sketch Pack bundle, and get creative with robots! This bundle includes:

- 1 Dash robots
- 1 Marker harnesses
- 6 Dry erase markers (red, blue, green, orange, purple, black)
- 1 Whiteboard mat
- 1 Eraser
- 1 Sets of project cards

Wonder Workshop – Dash & Dot

Gripper Building Kit for Dash & Cue

The Gripper Building Kit is an easy-to-construct set of functioning arms that expand your robots' capabilities. The gripper building kit can be used with both Dash and Cue from Wonder Workshop.

DW008

\$62.95

Puzzlets for Dash

The Puzzlets for Dash are colourful icon-based graphics and physical tiles, that make coding accessible to pre-readers as young as 4 years old! This is a great accessory for Dash, as students will be able to program without a tablet or computer.

DW012

\$149.95

Dash Ball Launcher – Accessory

This fun accessory transforms your Dash robot into a projectile-launching machine. Because it's powered by Dash, kids can learn how simple machines like a lever works in a fun way. Comes with 3 projectiles and 6 stacking targets that can attach to LEGO®-compatible bricks to build intricate targets. Dash is not included and is sold separately.

DW007

\$54.95

Xylophone Accessory for Dash

Everything you need to turn Dash into a Beethoven while you learn to program with music. Mallet accessory included. Dash is not included.

DW004

\$64.95

Building Bricks for Dash

Dash can use building brick connectors to play with your existing toys! They are compatible with Lego® bricks, Technics, Mindstorms kits and Hero Factory. Each pack comes with 4 connectors. Dash is not included.

DW005

\$32.95

Accessory Pack for Dash

Give Dash new abilities and looks by adding accessories! This package includes a bulldozer bar to clean up those toys (for Dash only), bunny ears, a bunny tail and a tow hook. Dash is not included.

DW003

\$69.95

Dash & Dot Learn To Code Curriculum Resources

Wonder Workshop's comprehensive curricular resources enable teachers to help students practice computational thinking and 21st-century skills with Dash & Dot, with plans, challenges and assessment projects. The Challenge Cards & Curriculum Guide (DW021) includes 72 challenges on double-sided cards sequences, loops, events, conditionals, functions, and variables. The Curriculum Guide helps implement the challenges in the best way possible. The guide also includes a one-year subscription to the online Code To Learn Library. The challenge cards (DW011) are also available individually, as is the Curriculum Guide (DW211). Please note that the curriculum guide is an add-on to the challenge cards. The guide also includes a one-year online subscription to the Code to Learn Library.

- DW011 Challenge Cards only \$67.95
- DW021 Challenge Cards & Curriculum Guide \$159.95
- DW211 Dash & Dot Curriculum Guide – Add On \$119.95

Wonder Workshop Class Connect

Wonder Workshop Class Connect, designed for award-winning Dash & Dot robots and kid-friendly Blockly programming app, gives teachers a tool to understand where students are succeeding and struggling in real time. Gather all of your students' progress in one place and discover the right standards-based resources for teaching every concept. Deploy all your students' devices and allow student to work from any device using cloud-based profiles. See exactly where students are with their progress with coding, allowing students to work at their own pace, creating differentiation. Combining an always-on progress dashboard and just-in-time resources for the instructor, Class Connect makes it easy for teachers to help students learn, even without experience. You will see exactly what code your students wrote and which concepts were involved.

- DW013 Teacher Success Pack \$499.95
- DW014 School Success Pack \$3,999.95

Teacher Success Pack

The Teacher Success Pack (DW013) is a 12-month subscription and includes:

- 1-teacher/30-students access to Class Connect
- 1-teacher access to the premium cross-curricular lesson library
- 1-teacher access to the Teach Wonder professional development course, "Intro to Coding and Robotics with Dash & Dot"
- 1 teacher access to exclusive quarterly webinars

School Success Pack

The School Success Pack (DW014) is a 12-month subscription and includes:

- 25-teachers/400-students access to Class Connect
- 25-teachers access to the premium cross-curricular lesson library
- 25-teachers access to the Teach Wonder professional development course, "Intro to Coding and Robotics with Dash & Dot"
- 25 teachers access to exclusive quarterly webinars

Dash & Dot K-5 Classroom Pack including Class Connect

Save \$35370

Perfect for a K-5 classroom of up to 24 students, the K-5 Classroom Pack provides a 3:1 student-to-robot ratio.

DW013K \$4,299.95

- 6 Dash robots
- 2 Dot robots
- 3 Sketch Kits
- 1 whiteboard sketch mat
- 3 marker refill kits
- 3 Gripper Building Kits
- 3 Launchers for Dash
- Xylophones for Dash
- 12 Building Brick Connectors
- 3 bulldozer bars
- 3 pairs of bunny ears
- 3 bunny tails
- 3 tow hooks
- 3 Learn to Code Challenge Card box sets
- 1 Learn to Code Curriculum Guide
- 1 Year subscription to Wonder Workshop Class Connect - Teacher Success Pack

Wonder Workshop - Cue

Cue Robot

Meet Cue! Cue is Wonder Workshop's most advanced robot to date. Cue is suitable for students in years 5-8 and introduces text-based coding in JavaScript, as well as block coding. Give Cue advanced capabilities by building powerful programs at the skill level that is right for you. With breakthrough Emotive AI systems, Cue delivers a level of personality, intelligence and interactive communication unlike any other robot on the market. Create dynamic graphical programs to make Cue react to sensor input with lifelike behaviours. Cue is the perfect classroom companion for more complex and advanced coding.

Powered 	Connection 	Programming Language/Software JavaScript	Operating Systems kindle fire	Age Group Years 5-8
-------------	----------------	---	----------------------------------	-------------------------------

Why Cue Robot?

- Designed for increased coding capabilities (graduating students from blocks to text based programming)
- Cue has its own personality, intelligence and interactive communication
- New features include breakthrough Emotive AI systems, additional memory, improved sensors, proximity sensors, encoders, gyro, accelerometer and microphones
- Next level coding and programming without the need to build or assemble the robot
- New set of accessories designed for high schools

Programmable LED & Buttons

Customise your experience with Cue

3 Microphones

Real-time voice triangulation

2 Powered Wheels

Quick navigation and distance tracking on nearly any surface

Real-time Bluetooth

Fast, easy connections to Apple iOS, Android and Kindle mobile devices

Proximity Sensors

Detects objects left, right and behind

Potentiometers

Supports head pan and tilt with accurate positioning

Dual Motors

Supports fast pan and tilt motion

Speaker

Plays back voice and audio

Processors & Sensor Fusion

Manages complex interactions and sensors (accelerometer, gyroscope, and wheel encoders)

Encoders

Quick navigation and distance tracking on nearly any surface

Proximity Sensor

Detects objects left, right and back

Cue Robot

Give Cue more advanced capabilities by building powerful programs at the skill level that's right for your students. Easily convert between block-based programming or text-based code. Create dynamic graphical programs to make Cue react to sensor input with lifelike behaviours. With Control mode, you can directly pilot Cue or engage any of the three Emotive AI modes as you seek, avoid or explore. The Cue App takes robotics to the next level. Engage with witty chat, control Cue's movements, create reactive sensor behaviours or code creative interactions. The sky is the limit!

Cue Applied Robotics Curriculum

The Applied Robotics Curriculum for Cue provides teachers step-by-step, comprehensive guidance on bringing computer science to life in their classrooms. You will learn how to use our robots, curriculum content, implementation approaches, project-based assessment strategies, and cross-curricular extensions. The Applied Robotics Curriculum Guide is organised into themes; Unit 1: Creative Writing, Unit 2: Game Design, and Unit 3: Innovation. Each unit introduces new robot capabilities that are tied to fundamental coding concepts. The consumable notebooks allow students to express their creative ideas, and can be used in conjunction with the ten lesson plans of each unit in the Curriculum Guide.

Bee-Bot

Bee-Bot

Award-winning programmable floor robot, the Bee-Bot® has a simple and child friendly layout that is a perfect starting point for teaching control, sequencing, basic control, directional language and programming to young children. Through creative and imaginative play, Bee-Bot is a fantastic resource to bring technology to life into every subject!

Powered (TTSB001)	Powered (TTSB0363)	Programming
x3		

Why Bee-Bot?

- Ideal for early stages of control and programming
- Helps to teach algorithms and simple programs
- Robust and easy to use
- Cross-curricular when used with the different mats available

Key Features:

- Clear and bright buttons
- Makes sounds and flashes eyes to confirm instructions when sequencing
- Memory of up to 40 steps and pause commands
- Robust and child friendly design
- No confusing degree turns to program
- Open-ended learning device
- Small and compact
- Performs 90 degree turn and moves in 15cm steps

Original Bee-Bot

Bee-Bot measures 13 x 10 x 7cm. It has a memory of up to 40 steps, and moves in 15cm increments and with 90 degree turns. Requires 3 'AA' batteries (not included).

TTSB001	Each \$89.95

Blue-Bot

Blue-Bot

Blue-Bot helps you code, debug and simulate algorithms. Blue-Bot is a Bluetooth enabled robot, which can be controlled with your PC or tablet. Alternatively, you can use the buttons on top of the robot to program simple algorithms. Now with new and improved features!

Powered	Connection	Programming Language/Software	Operating Systems	Age Group
				Years PS-3

Why Blue-Bot?

- Control Blue-Bot with the buttons on its shell, or connect to a tablet or PC and control Blue-Bot with a Bluetooth enabled device
- Program more steps and introduce 45° angles
- Ideal for early stages of control and programming
- Helps to teach algorithms and simple programs
- Robust and easy to use
- Cross-curricular when used with the different mats available

Blue-Bot - Bluetooth Floor Robot

The new and improved Blue-Bot is a perfect starting point for teaching control, and you can wirelessly control it with your tablet or PC. Blue-Bot now interacts with other Rechargeable Bee-Bots and Blue-Bots and can say 'Hello', or record your own sound! Students can also record audio to play back when each button is pressed, making it more accessible to all students, including those with auditory or visual processing needs. Blue-Bot comes with USB charging cable.

Bee-Bot & Blue-Bot Robot Sensor & Fronts Kit

This is a kit of 1 Robot Sensor (TTSB0101), and a set of 10 Sensor Fronts (TTSB0132).

Use this Robot Sensor to add interactivity and engagement to your programming challenges, and expand the possibilities of adventures of your Bee- and Blue-Bots. The sensor will detect movement up to 15cm in front of it, and play audio which can be pre-recorded by the students. Movement will also trigger an LED to turn on which is on an extended stalk to act as a street light. By snapping the Sensor Fronts to your Sensor, you can transform the Sensor to a market stall or a shop. Choose from a bakery, butcher, the doctor, police, mechanics, school, flower stall, fish stall, cheese stall and ice cream van, and let your robot visit the different shops.

Blue-Bot Or Bee-Bot & Accessories Kit

A perfect Blue-Bot Accessories kit to have different adventures with your Blue-Bot or Bee-Bot. The kit consists of 6 Blue-Bot pen holders (TTSB0105), 6 Blue-Bot bulldozers (TTSB0112), 1 Robot Sensor (TTSB0101) and 1 Robot Sensor Fronts (TTSB0132), and 6 Robots. Available with either 6 Blue-Bots (TTSB485), or 6 Original Bee-Bots (TTSB001).

TTSB0112K
 TTSB0105K

With 6 Blue-Bots **\$1,399.95**
 With 6 Original Bee-Bots **\$619.95**

TTSB0112K includes 6x Blue-Bot!

**Bee-Bot & Blue-Bot
 Obstacle Course**

*Navigate Bee-Bot
 or Blue-Bot through
 doorways, arches
 and mazes!*

Students learn to program through the Bee-Bot & Blue Bot obstacle course. Add different pieces onto your coding area to add challenges. Make sure your robot doesn't bump into a wall! Move the pieces around to create new mazes and challenges over and over again! This set includes 10 wall pieces, 6 doorways, and 2 arches to allow for variation and progression lesson to lesson.

TTSB0113

\$179.95

Bee-Bot & Blue-Bot Trailer

This easy to use trailer is great for incorporating role play and retrieval exercises into your lessons. Although limited to 90 degree turns at a time (Bee-Bot & Blue Bot turning circle), the trailer still enables Bee-Bots & Blue Bots to tow objects with ease.

TTSB1100

\$39.95

Bee-Bot & Blue-Bot Bulldozers

Push objects from one destination to another with this set of clip-on Bee-Bot & Blue-Bot Bulldozer. The set is supplied in 6 rainbow colours. The bulldozer clip-ons fit both Bee-Bots and Blue-Bots. A great resource to extend the use of your robot.

TTSB0112

Set of 6 **\$39.95**

Bee-Bot & Blue-Bot Mats

Did you know... MTA Robotics mats can be used with Bee-Bots, Blue-Bots and Cubetto?

MTA Robotics Mat Value Pack of 12

All MTA Robotics Mats in one Value Pack!
This kit includes one of each of the following mats:
Transparent Pocket Mat (TEB6221), Transparent Grid Mat (TEB6222), Alphabet Mat (TEB6223), Space Mat (TEB6224), Farm Mat (TEB6225), Pirates Mat (TEB6226), Australia & New Zealand Mat (TEB6227), Shape, Colour & Size Mat (TEB6228), Under the Ocean Mat (TEB6253), Australian Animals Mat (TEB6254), Uppercase & Lowercase Mat (TEB6256) and Coordinates Whiteboard Mat (TEB6255).

MTA Robotics Under the Ocean Mat

Students will love to learn about the marine life and robotics with this colourful under the ocean themed robotics mat. Introduce students to different animals, and swim from one corner to the other. This mat includes 9 different types of animals including a dolphin, shark, octopus, and many more! Teach your students about keeping the oceans clean, while enhancing their STEAM education. The mat measures 115 x 85cm.

TEB6253

\$49.95

MTA Robotics Australian Animals Mat

Teach your students about Australian animals with robotics with this colourful mat. This mat includes 13 different types of animals including a dingo, koala, kangaroo, and many more! Teach your students about Australian wildlife diversity, while enhancing their STEAM education. Size 115x85cm.

TEB6254

\$49.95

MTA Robotics Coordinates Whiteboard Mat

This Coordinates whiteboard mat features a 6 x 13 grid with A to F on one side and 1 to 13 on the other side. This allows students to locate a certain location on the grid. The mat is made of a write and wipe material, to be used with whiteboard markers. Ideal in combination with the new Bee-Bot & Blue-Bot Pen Holders (TTSB0105, not included and sold separately). The mat measures a large 100 x 205cm!

TEB6255

\$89.95

MTA Robotics Uppercase & Lowercase Mat

Combine robotics with literacy with this MTA robotics mat. Let students program their robots to go to certain uppercase or lowercase letter, or vowel. Maybe tell your students to program their robot to spell a word or their name! The possibilities are endless. Size 130x115cm

TEB6256

\$49.95

Teach language and literacy with Bee-Bot

Bee-Bot Fairytale Mat

Children will enjoy programming Bee-Bot to visit characters and scenery from familiar fairytales, including: Goldilocks and the Three Bears; Jack and the Beanstalk and The Three Little Pigs. Comprehensive teacher's notes included. Size 120(L) x 45(H)cm.

TTSB033

\$89.95

KUBO

KUBO KUBO

KUBO is the new screen-free coding solution for primary education. KUBO is the new plug-and-learn TagTile robot, which unique system does not require any prior coding experience, takes no time to set up, and it doesn't require any screens or software. Deliver STEAM lessons in a creative and playful way. The unique TagTiles®

make coding as easy as solving a puzzle. Simply use the Route TagTiles to lay down a route for KUBO to follow, or create a function with the Function Tiles. KUBO will first drive over the function, remembers the sequence and will repeat the sequence of instructions to execute the demands!

Powered	Programming Language/Software	Age Group Years K-5

Why KUBO?

- Easy to use, up and running in less than 5 minutes
- Unique TagTile concept, hands-on and screen-free
- Easy to differentiate, low entry, high ceiling for computational thinking
- Full solution with teaching content, tutorials and support
- Access to the KUBO Map Maker online, to create your own coding challenges and maps

KUBO can be used on a standard classroom table

KUBO Coding Core Set

This KUBO Coding Starter Set is the ideal starting point for introducing coding and computational thinking to students from four years. Teach functions, subroutines and loops in simple, logical steps. KUBO comes with comprehensive lesson plans and teacher guides to make it easy for teachers to deliver cross-curricular challenges in a hands-on, playful way. Included in the set:

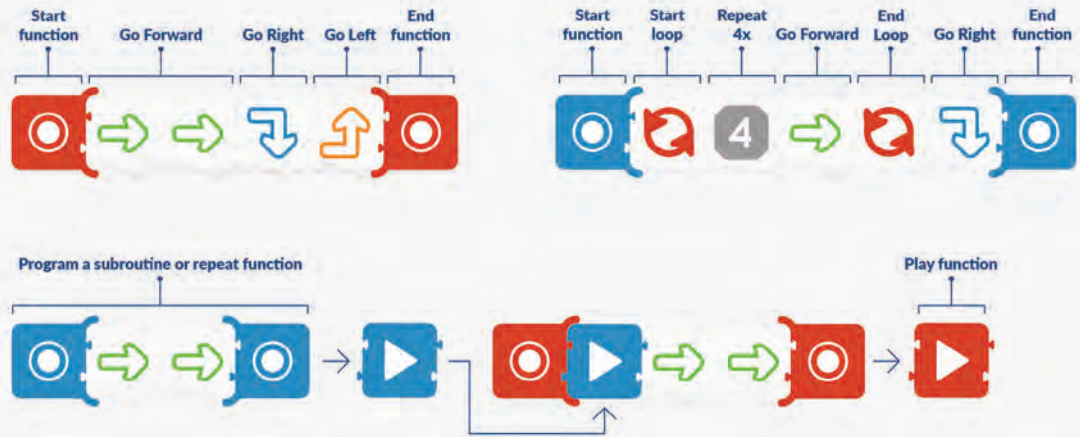

- 1x KUBO Body and 1x KUBO Head
- USB Charging Cable
- 46 TagTiles; 14 Go Forward, 6 Go Left, 6 Go Right, 4 blue and 4 red Record and Play Function Tiles, 2 Loop tiles and Parameter Tiles numbered 1 to 10
- 1x Activity Map delivered in 4 large puzzle pieces that slot together easily

KUBO Coding++ Set – Add-On Tag Tiles Set

The KUBO Coding++ Set completes the series of TagTiles needed to introduce all primary concepts of coding in a unique hands-on, screen-free way. This puzzle like set makes it easier for students to work with complex algorithms and develop abstract thinking. The set includes 44 TagTiles addressing concepts of events, conditions (if/else) and variables. This comes with lesson plans, a project pack and teacher guides. Included in the set:

- 6x Variable TagTiles
- 2x Equal to Variable, 2x Subtract from Variable and
- 2x Add to Variable Operator TagTiles
- 1x Greater Than and 1x Less Than TagTiles
- 2x 'Start If' and 2x 'End If' TagTiles
- 2x True and 2x False TagTiles
- 3 sets of Event TagTiles (12 tiles in total)
- 2x Turn 15 degrees right and left TagTiles
- 2x Set Speed TagTiles
- 1x Zero Parameter TagTile
- 1x 'Start Random' and 1x 'End Random' TagTile
- 3 Modulator TagTiles

Includes TagTiles to address concepts of events, conditions (if/else) and variables

Cubetto

PRIMO Cubetto

Cubetto is a playful wooden robot that helps young children (3+) discover programming through storytelling, adventure and collaboration.

It's the first coding toy of its kind to work without a screen or digital interface, and lets children learn to code before they can read or write.

Powered	Connection	Programming Language/Software
 x6		

Age Group
Years PS-2

Why Cubetto?

- Coding without screens for students as young as ages 3 and up
- Montessori approved, LOGO Turtle inspired
- Expanded learning with the educational story books and accompanying maps
- Cubetto is cross-curricular! Students learn about coding, the solar system, Ancient Egypt, and much more while improving collaboration, team work and storytelling
- Great for special needs students!

Sammy the First Coding Robot

Sammy the First Coding Robot

Meet Sammy. This cute little peanut butter and jelly sandwich is actually a robot that teaches coding principles and skills to children in grades K-2. You don't need a tablet, smartphone, or computer to

program this robot; programs are created by simply laying down a sequence of physical code cards. As the robot drives over the code cards, an optical identification sensor on the bottom of the robot reads the code cards one by one and loads the program. Completely screen free!

Powered	Programming Language/Software
x3	

Why Sammy the First Coding Robot?

- Completely screen-free programming
- Learn basic coding program concepts by completing challenges which encourages hands-on involvement with the robot and the story cards
- The storylines included will allow you to teach coding step by step, while integrating storytelling and STEAM
- With fun sounds and light effects to keep students engaged
- Sammy doesn't only drive in multiple directions, it also can move its arms to interact with other models

Set of 12
\$1,239⁹⁵
 Save \$115.45

Build 6 different models and explore six storylines and scenarios

Sammy the First Coding Robot

Sammy is packed with sensors and motors, sound and light output and with integrated output gears to make it possible to move in different directions. The set consists of a wide assortment of blocks to build 38 different models in 6 different themes, 120 coding cards to give Sammy a wide variety of instructions, and 19 double-sided map cards. The coding cards teach students about sequences, loops, functions, conditions, algorithms and variables. By following the storylines, students will learn to code, while improving their story telling and literacy skills.

Create sequences with the coding cards and build a grid with maps cards

- 16 pieces to create a 50 x 50cm maze board
- 22 maze walls
- 3 tunnels
- Activity guide

Key Features

- Colby the robot mouse has two 2 speeds
- It moves in 4 directions: forward, backward, left and right
- The colourful buttons match the coding cards for easy programming and sequencing
- Perfect for basic coding, problem solving, logic and navigating while having fun
- For extended learning, try adding an additional mouse named Jack (LER2841), sold separately

Code & Go Robot Mouse Maths Pack

This maths activity set incorporates coding concepts into everyday lessons in sequencing, counting and more. Play around with numbers using the set's interactive cards, dice, and double-sided number board. Includes Activity Guide with levelled activities. Robot Mouse not included.

Intelino

intelino® Intelino Smart Train

Simplicity and intuitiveness of the child's first train set. Intelligence and sophistication of an advanced robotic toy. The interline smart train augments the classic toy train experience to engage and entertain train fans of all ages. It has the simplicity and ease of use expected in a child's first train set. Yet it has the sophistication of an advanced robotic toy. This smart train is intuitive, interactive and intelligent.

Powered	Connection	Programming Language/Software	Operating Systems	Age Group Years PS-2

Why Intelino Smart Train?

- Intelino combines the intuitiveness of train sets with a new coding experience, making it interactive and intelligent
- Intelino can be used screen-free with colour-coded snaps, or in combination with the Intelino App for an advanced coding experience
- Compatible with most wooden tracks
- Intelino has built-in sensors which enable advanced interactivity
- Intelino engages every student, introduces the starting principles of coding and programming while having fun

Set of 12
\$1,899⁹⁵
—
Save **\$139.45**

Code Intelino with the Colour Snaps that click onto the tracks, or use in combination with the Intelino App!

Intelino Smart Train

Great child's first train set! Intelligence and sophistication of an advanced robotic toy. The Intelino smart train entertains fans of all ages and teaches the very basics of coding.

- 1 x Smart Engine
- 1 x Train Wagon
- 20 x Track Pieces
- 40 x Colour Snaps
- 1 x Train Decal Sheet
- 1 x Micro USB Cable

Specifications:

- 32 in/sec (80 cm/sec) top speed
- Bluetooth Smart 4.2
- Wireless Range
- Runs on most wooden tracks
- 100+ min play time
- USB Charging

Mabot Mabot

Mabot is a plug-and-play modular robot for endless combinations and possibilities. Students build, customise and program robots, while exploring mechanisms, engineering, coding and developing STEAM skills. Mabot integrates complex functions into quality ball modules, so students can just simply plug and play! Multi-angle design allows numerous combinations and variations. The Mabot IDE app, designed on Scratch, will walk students through coding basics, allowing them to progress as they master modules. Teach sequences, loops, events, functions, logic, conditionals and more!

Powered	Connection	Programming Language/Software	Operating Systems	Age Group
				Years K-4

Why Mabot?

- Modular design, easy to assemble
- Multi-angle plug for multiple forms of robots
- Hot-plugging function allows easy accessibility and uninterrupted learning
- Comes with an entertaining app that turns learning into a game
- Compatible with LEGO®

Included in BM1005:

- 1 x Control Ball
- 1 x Battery Ball
- 2 x 6-port Connection Ball
- 2 x Drive Ball
- 1 x Colour Sensor
- & Other Accessories

Included in BM1006:

- 1 x Control Ball
- 1 x Battery Ball
- 5 x 6-port Connection Ball
- 2 x Drive Ball
- 1 x Colour Sensor
- 1 x Touch Sensor
- 1 x Infrared Sensor
- 3 x 3-port connection ball

Included in BM1007:

- 1 x Control Ball
- 2 x Battery Ball
- 8 x 6-port Connection Ball
- 4 x Drive Ball
- 1 x Colour Sensor
- 1 x Touch Sensor
- 1 x Infrared Sensor
- 3 x 3-port connection ball
- 2 x Swinging joint
- 2 x Rotate Joint
- 1 x Clipper
- & Other Accessories

Included in BM1008:

- 1 x Control Ball
- 2 x Battery Ball
- 8 x 6-port Connection Ball
- 4 x Drive Ball
- 1 x Colour Sensor
- 1 x Touch Sensor
- 1 x Infrared Sensor
- 3 x 3 port connection Ball
- 2 x Swinging Joint
- 2 x Rotate Joint
- 1 x Clipper
- & Other Accessories

Mabot Modular Kits

The Mabot range exists of 4 sets, with an increasing in number of modular sensors and motors included in each set. The Starter Kit (BM1005) allows you to build 2 robots and introduces students to the basics of coding. The Advanced Kit (BM1006) includes additional modules such as touch and infrared sensors, and builds a minimum of 5 official robots. The Deluxe Kit (BM1007) includes swinging joints for even more advanced robots, and the Pro Kit (BM1008) is perfect for the most advanced combinations and creations. Each robot requires one Battery Ball Module (BM0002) and one Control Ball Module (BM0001), which are included in each of the sets, but also available individually to build more robots simultaneously.

BM1005	Kit with 7 Modules	\$219.95
BM1006	Kit with 15 Modules	\$399.95
BM1007	Kit with 25 Modules	\$699.95
BM1008	Kit with 42 Modules	\$1,199.95
BM0001	Control Ball Module	\$79.95
BM0002	Battery Ball Module	\$42.95

Modular and expandable, for endless combinations and increased complexity

Learning Lab – Robotics Workshop

Learning Lab – Robotics Workshop

Learning Lab is a series of construction-based learning sets that include lesson plans for classroom implementation. This set combines the Learning Lab construction blocks with micro:bit to build models that are interactive and programmable. The lesson plans included will give you plenty of classroom activities and ideas to start with, or build your own model! You can re-use the pieces over and over again. Students will gain scientific knowledge through hands-on experience, developing problem solving abilities, as well as a positive attitude towards science. It allows them to apply their newfound knowledge to daily life, furthering their innovation skills and abilities.

Powered	Connection	Programming Language/Software	Operating Systems	Age Group
x6				Years 5-10

Why Learning Lab Robotics Workshop?

- Using Gigo's building block construction-based curriculum, every class has a ready-to-assemble model, and includes time designated to promote individual creativity
- Boosts thinking outside-the-box of the traditional educational framework by learning innovation through play!
- The Learning Lab system takes into account the ability to work as part of a team as well as individual development of each student
- Course levels are designed from primary to challenging, combining a life sciences based curriculum with applications from daily life
- Experiment using Gigo's building blocks, which can be used over and over again, saving both time and effort

The ideal STEM resource, combining all elements of learning with room for creativity of the individual student

Set of 4 with micro:bit Save **\$3365**

Combine engineering and design with micro:bit to create models that you can program!

Learning Lab – Robotics Workshop for micro:bit

The Robotics Workshop set for micro:bit includes 259 components to build 18 models and 4 creative works. The set can be used with micro:bit (not included and sold separately), and – in addition to the micro:bit visual coding software – can also be used with the JavaScript Blocks Editor and MicroPython. The set includes a student book and teacher guide (download online). With all motors and sensors included, students will combine engineering and learning about mechanical structures, transmissions and sensing principles with coding and programming.

DFR148-12M	Set of 12	\$999.95

Included in the set:

- 1x MaQueen metal body including:
- 2x Infrared Grayscale Sensor
- 1x Buzzer
- 1x Infrared Receiver
- 2x LED Lights
- 4x RGB Ambient Light
- 1x Ultrasonic Interface
- 1x IIC Interface (3.3V)
- 2x Gravity Extension Interfaces
- 2x All-metal Gear Motor

Max:bot

DFROBOT
DRIVE THE FUTURE

Max:Bot

Max:Bot is a micro:bit compatible robot, suitable for ages 10 - 16. The Max:Bot combines engineering with coding, with limitless possibilities. The robot is accompanied by detailed course material that assists the students in understand how the robot works. The Max:Bot is the perfect solution that allows students to enjoy and hands-on experience of coding, electronics and robotics.

Powered	Connection	Programming Language/Software	Operating Systems	Age Group
x4				Years 5-10

Why Max:bot?

- Max:Bot is programmed via a micro:bit.
- Students build their own robots.
- The Max:Bot can be used with Boson (pg36-38) to extend its capabilities.
- Comes with the Max:Bot starter guide to help students start their maxbot journey
- Max:Bot comes with project based course material, with step-by-step explanations

Set of 10
\$1,599.95
Save **\$99.55**

Compatible with micro:bit

Max:Bot

The Max:Bot is the micro:bit compatible robot that will help your students to excel in robotics and programming. With the accompanying project based learning resources your class will be experts in the field of coding and technology. Max:Bot comes equipped with 10+ programmable modules, including ultrasonic sensors, IR sensors, motors and more.

DFR147 Each \$169.95
DFR147-5 Set of 5 \$799.95
DFR147-10 Set of 10 \$1,599.95

Boson - Essential Input & Output Modules Kit

Add Boson input and output sensor to your Max:Bot robot for even more possibilities! This kit includes the most popular Boson modules. The kit includes one of each: expansion board for micro:bit, blue, red and yellow push buttons, self locking switch, buzzer, fan, voice recorder, motor, servo motor, multicolour string light, cable pack of 30 and a battery holder.

DFR002K \$189.95

Save **\$16.95**

Add Boson modules to your Max:Bot robot!

Sphero RVR

The new Sphero RVR is a revolutionary programmable robot that goes anywhere! Drivable right out of the box, packed with a diverse suite of sensors, and built for customisation. This robot is a hackable mobile platform for beginners, educators, and students. Utilising an expansion port, you can connect 3rd party hardware like Arduino, micro:bit, Raspberry Pi, and more.

Powered	Connection	Programming Language/Software	Operating Systems	Age Group
				Years 4-10

Why Sphero RVR?

- Uses Sphero's highly sophisticated control system on a truly hackable platform
- From beginners to technical hobbyists, RVR has something for everyone
- A powerful motor, all-terrain treads and plenty of torque give you the freedom to drive RVR just about anywhere
- Packed with sensors - colour sensor, light sensor, IR, magnetometer, accelerometer, and gyroscope
- A removable, rechargeable battery delivers enough juice to power RVR and third-party hardware
- Highly expandable: RVR's expansion plate is designed to work with most third-party hardware including Raspberry Pi, Arduino, micro:bit and more
- Seamlessly integrates with our Sphero Edu app so you can start coding using Draw & Drive, Scratch blocks, or writing JavaScript

Sphero RVR

Sphero RVR is ready to drive, program, and customise right out of the box. Its Sphero's first all-terrain, tank tread, driving experience. RVR works with the existing and acclaimed Sphero EDU app. A powerful motor, all-terrain treads and plenty of torque give you the freedom to drive RVR just about anywhere! Sphero will provide SKD's, code samples and other resources for popular platforms like Raspberry Pi, Arduino and BBC micro:bit, to truly make this the most expandable robot!

MG100 Each \$364.95
 MG105 Set of 5 \$1,549.95

Drive RVR right out of the box, no assembly or complicated setup required!

Sphero EDU APP

Sphero BOLT

Sphero BOLT

Sphero BOLT is an app-enabled robotic ball that provides endless opportunities to have fun while learning.

Program with the Sphero Edu app, discover community-created activities or just drive and play. BOLT was built to shine with an animated 8x8 LED Matrix that displays real-time data and advanced sensors like its gyroscope, accelerometer, and infrared communications. Get amped – Sphero BOLT establishes a striking new way to learn and play.

Powered	Connection	Programming Language/Software	Operating Systems	Age Group
				Years 3-10

Why Sphero BOLT?

- Learn to code by drawing, using Scratch blocks, or writing JavaScript text with the Sphero Edu app
- A long battery life of 2+ hours per charge keeps you going during your biggest projects
- Sphero BOLT is approachable, yet advanced for every level of learning
- Durable and waterproof; you can even use BOLT in water for extended learning possibilities

Sphero BOLT

The new Sphero BOLT comes with a colourful and animated 8x8 LED matrix which is fully programmable and easy on the eyes. Watch it bring your programs to life and display real-time data! BOLT to BOLT infrared communication allows for new games and advanced movements like swarming. Auto-aim your robot thanks to the built-in compass. Programmable sensors including infrared, compass, light sensor, gyroscope, accelerometer and motor encoders.

MG002

\$236.95

What's in the box:

- Sphero BOLT
- Inductive Charging Cradle with USB Cable
- Protractor with heading, directions, and clock
- Sticker sheet
- Quick Start Guide
- Sphero Edu app available for download on iOS, Android, Kindle, Mac, Windows, and Chrome
- Sphero Play app available for download on iOS, and Android
- Swift Playgrounds app available for download on iOS. Works with the Sphero Arcade and Sphero Template playgrounds

The BOLT includes an animated 8 x 8 LED Matrix

Product Specifications

- Free App: Sphero Edu app compatible with iOS, Android, Kindle, Mac, Windows, Chrome
- Durable UV-coated clear plastic shell
- Bluetooth Smart connection (100 foot range)
- Inductive charging (6 hour charge for 2+ hours of play)
- Height: 73mm, Width: 73mm, Weight 200g
- Top speed: 4.5 MPH

Sphero BOLT Edu Power Pack 15-Pack

The BOLT Power Pack lets you charge, store, and carry Sphero BOLT robots times 15. Built with an integrated cooling system, your robots can charge safely all from one place. With more robots, a longer battery life (2+ hours), auto-aiming, and more, the BOLT Power Pack is the top of the line kit for educators using the Sphero Edu program in a classroom, robotics club, or in any maker environment you can dream up.

MG002-15P \$3,817.95

Store and charge up to 15 Sphero BOLT robots at the same time!

Sphero BOLT Edu 15-Pack

The Sphero BOLT 15 pack contains everything you need to get started teaching robotics and the fundamentals of programming, and then some. Electrify your class, club, or program with BOLT and Sphero Edu and get started with a 15 pack. The Edu 15-Pack (MG002-15) includes:

- 15 Sphero BOLT robots
- 15 Charging Cradles and USB cables
- 15 Protractors
- 124 Stickers
- Quick Start Guide

MG002-15CH also includes two 10-port USB chargers.

MG002-15 Pack of 15 \$2,817.95

MG002-15CH Pack of 15 & 2 10-Port Chargers \$2,899.95

Two 10-port USB chargers included with MG002-15CH

No matter what your coding experience is, the Sphero EDU app is suitable for all levels of programming

Now with activities aligned to the AU Curriculum

Sphero Edu 5.0 App:

- Draw paths or use blocks that represent code, then write your own Javascript text programs.
- With plenty of STEAM activities and live sensor data
- Zoom in and out of the block canvas to get a closer look at your program
- Trigonometry functions - New maths functions have been added to the operator's category.
- Simplified function and variable wizard - Make and manage variables and functions with ease.
- Distance Senso - We added a "distance" sensor so you can write logic on how far your robot rolls.

Sphero SPRK+

Sphero SPRK+

Designed to inspire curiosity, creativity, and invention through connected play and coding, SPRK+ is far more than just a robot. Powered by the Sphero Edu app, you can easily learn programming, complete hands-on activities, and share your creations with the community. Navigate different mazes, or program a painting, the possibilities are endless. Sphero SPRK+ has a battery life of 2+ when fully charged, perfect for the classroom! The visual block-based building app makes learning the basic principles of programming approachable and fun. Drag and drop actions, controls, operators, and more to learn how your Sphero works. The written code you create can then be viewed right beside your block sequence for a more advanced understanding of the C-based language.

Powered	Connection	Programming Language/Software	Operating Systems	Age Group
				Years 3-10

Why Sphero SPRK+?

- Sphero SPRK+ supports different levels of learners, from beginners to advanced. Beginners draw paths that represent codes, intermediate coders move on to block-based drag and drop programming and pros use JavaScript and write text programs
- Sphero SPRK+ is water- and scratch proof, which allows you to let Sphero swim across water, navigate a maze, program a painting or mimic the solar system. The only limit is your imagination

Sphero SPRK+ Edition

The Sphero SPRK+ comes with inductive charging base with USB charging cable, maze tape, 360 degree protractor, sticker sheet and quick start guide. The Sphero SPRK Lightning app allows you to collaborate with other users around the globe to innovate the world of education and empower anyone to program.

MG001 \$199.95

What's in the box:

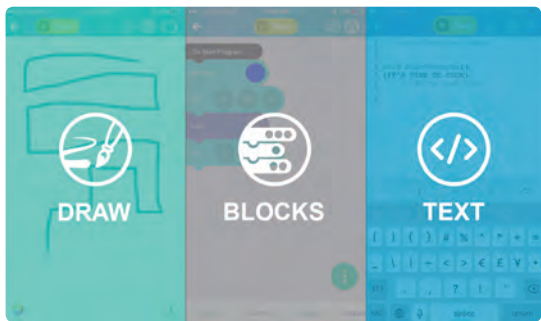

- Sphero SPRK+
- Inductive charging base with USB charging cable
- Maze tape, 360 degree protractor and sticker sheet
- Quick Start guide to get you rolling

Product Specifications

- Super durable UV coated polycarbonate shell
- Bluetooth Smart (30 metre range)
- Goes over 2m/s
- Built-in LED glow lights
- Inductive charging with over 1 hour of play on a full charge
- App and firmware updates that introduce new features

From beginner to advanced programmer with the Sphero App

Sphero Accessories

Sphero Activity Mat 1

Take the most out of your Sphero's with this Sphero Activity Mat 1! This mat is designed to work with the Sphero SPRK+, Sphero Bolt, and the Sphero Edu platform. The mat is great to help students develop key coding skills, that are linked to everyday curriculum outcomes.

MG211

\$249.99

Sphero Activity Mat 2

The Sphero Activity Mat 2 measures 1220mm x 2010mm, and it is a robust vinyl floor mat. The mat is perfect for classroom use as its wipe clean and has a tough wearing surface. There are 4 complex mazes that are reversible, which means that there are 8 activities on the mat. Students should place the Sphero at "Start Here" at the beginning of each maze, and program it to move to the centre of the mat.

MG212

\$249.99

Sphero Golf Mat

This mat is designed to work with the Sphero SPRK+, Sphero Bolt, and the Sphero Edu platform. The mat is great to help students develop key coding skills, that are linked to everyday curriculum outcomes. There are 6 reversible holes, in effect allowing students to complete 12 complex mazes. The Sphero Golf Mat measures 1220mm x 2010mm, and it is a robust vinyl floor mat. The mat is perfect for classroom use as its wipe clean and has a tough wearing surface.

MG213

\$249.99

Sphero Code Mat 2-sided with Activity Cards

Explore new ways to learn and play with the Sphero Code Mat and Activity Cards. The Sphero Code Mat seamlessly pairs learning with play. Perfect for educators, students, and parents. This two-sided mat offers a simple, accessible way to learn block-based coding, basic math principles, and collaborative problem-solving. The double-sided cards feature 20 fun challenges and games.

MG210

\$269.95

Includes 20 challenges and games

Sphero Covers

Shields your Sphero against the elements and protect your Sphero from scratches and scuffs. The Nubby cover provides unbeatable traction for all types of terrain, where the Turbo cover gives five times traction and control to speed past your competition. Suitable for all Sphero versions. Each type of cover is available in two colours.

MG001A

Nubby - Orange \$24.95

MG001B

Nubby - Blue \$24.95

MG001R

Turbo - Red \$24.95

Sphero Chariot - Blue

Put your round robot in the driver seat with the Sphero Chariot! This chariot adds another level of creativity to Sphero. Let it carry cargo, turn it into the ultimate spy-bot by adding a phone to the custom carrier, snap on toy building bricks to design your own creation. Compatible with LEGO®.

MG001C

\$37.95

Sphero EDU Maze Tape

This Maze Tape refill pack includes 6 rolls of tape to keep your personal projects moving, your class programming, and your posters on the wall. Each roll is 13 metres long and has metric unit markings (both cm and m).

MG010

6 pack \$39.95

Artie

Fun and educational, Artie the drawing robot, is perfect for young students to learn the basics of programming and boost their creativity. Children will program their creations using the robot's built-in apps, and then Artie will draw it right on any piece of paper using one of the four included markers. Artie can use any marker between 8 to 10.5 millimetre diameter thickness.

Powered	Connection	Programming Language/Software	Operating Systems	Age Group
x4				Years 2-6

Why Artie?

- With the built-in WiFi server, you can control Artie from a desktop, tablet via WiFi, laptop, etc. No internet connection required
- Artie has 360° movement, move forward and backward, and turns and spins in any direction
- Includes 4 colours of thin felt tipped pens (fits almost all brands)
- Artie can be coded with different coding applications like: Point & Click, Blockly, Snap!, Python, and JavaScript

Teach maths concepts such as angles and measurements, or use Artie for art creations!

Artie Robot

You write the code and Artie draws the lines! Easy to learn and cool to create with, Artie also comes ready to draw with pre-programmed designs, shapes, and games. Key Features :

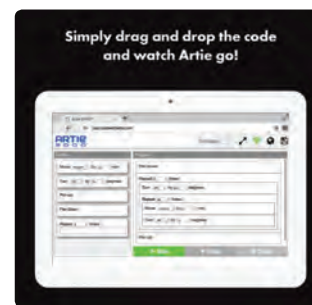

- Programmable robot draws whatever you code on any sheet of paper
- Includes WIFI-enable drawing robot
- Drag and drop visual programming software
- 4 coloured markers
- Quick start guide
- Comes pre-programmed with shapes and games, or write your own custom code
- Requires 4 AA batteries (not included)

LER1125 Each \$119.95
 LER1125-4 Set of 4 \$459.95
 LER1125-8 Set of 8 \$879.95

Set of 8
\$879⁹⁵
 Save \$79.65

From pre-programmed shapes to drag-and-drop and even text-based coding, Artie caters for all levels of coding experience.

Pro-Bot

Pro-Bot

When children need a bigger challenge than the Bee-Bot, Pro-Bot provides the next step. The built-in LCD screen makes on-board programming easy. Use distance for movements and degrees for turns, or program the sensors for more advanced control techniques. It has the capability to repeat and follow a series of commands, including a main program and sub-programs. Built-in touch, light, and sound sensors give Pro-Bot the ability to respond to its environment, making it a great platform for teaching the basics of robotics.

Powered	Programming Language/Software

Age Group
Years 2-6

Why Pro-Bot?

- Pro-Bot can be used simply by programming the arrows or accepts more complex commands with on-board programming
- Teach geometry and art using the pen mechanism to create amazing patterns involving subroutines. This also allows for immediate confirmation of the program
- Easily edit your programs on the Pro-Bot screen
- Teaches uses of touch, light and sound sensors
- PC software available for further programming (optional)
- Compact, fun and easy to use in the classroom

Pro-Bot

Pro-Bot is now rechargeable! Pro-Bot is compatible with K'NEX and accepts standard felt pens. The backup memory uses lithium battery (supplied). Ages 6+ years

Pro-Bot & K'NEX® Pack

This kit consists of 4x Pro-Bot (TTSP0535) and one set of K'NEX Classic Construction Set (KN17435). This allows you to personalise your Pro-Bot with the K'NEX pieces. Combine digital technologies with engineering and design! Enhance the car design to let Pro-Bot carry objects around, convert into a tank or create a space ship. The possibilities are endless!

TTSP0535K2 \$1,049.95

Robot Camera Mount

Fix any camera to your Pro-Bot robot and film what your robot sees. A universal camera mount made from a durable plastic with a metal screw thread. Please note: Pro-Bot is not included.

TTS10004 \$7.95

FlipRobot

FlipRobot FlipRobot

FlipRobot delivers educators a complete STEAM learning solution, based on a nationally mapped robotics curriculum. With rich teaching resources, accredited professional development courses, extensive local support, and expansion capabilities, FlipRobot achieves easy implementation ready for all technology curriculum.

<p>Powered</p>  x4 (ACU300)  (ACU310)	<p>Connection</p>  (ACU300)  (ACU310)	<p>Programming</p> 	<p>Operating Systems</p>     (ACU310)	<p>Age Group</p> <p>Years 5-8</p>
---	---	--	--	--

Why FlipRobot?

- An innovative and affordable robot, designed for versatility and scalability with a wide variety of hardware options.
- ACARA compliant, nationally mapped curriculum to Digital Technology, Design & Technology and Science & Technology syllabus, including complete program designs and teaching resources.
- Intuitive block-based graphical and script programming interface suitable for all skill levels. Compatible with all major operating systems, and accessible anywhere, anytime, online or offline through Chrome browser.
- Accredited Professional Development courses across Australia and New Zealand to empower educators from any teaching background with technical knowledge and classroom implementation. Available in face-to-face or eLearning formats.

Comprehensive Curriculum: Fliprobot

- Digital Technologies syllabus (Year 7-8)
- Design and Technology syllabus (Year 7-8)
- Science and Technology syllabus (Year 5-6)
- Program designs mapped with ACARA learning outcomes
- Teaching resources and materials (including learning and activity sheets, powerpoint slides, and coding samples)

Comprehensive Curriculum:

- Multi-year curriculum encompassing more than 60 topics
- Over 100 hours of teaching materials in each year

Original FlipRobot E300

The FlipRobot E300 starter kit is a cost effective solution to bring robotics to the classroom. A durable design, block and script based programming languages and easy operation make the FlipRobot E300 starter kit perfect for in-class implementation. This all bundled in with a price that allows every student to have their own robot to advance their own STEM learning.

ACU300	Each \$136.95
ACU300-5	Set of 5 \$659.95
ACU300-10	Set of 10 \$1,299.95
ACU300-15	Set of 15 \$1,899.95

Topic 1 & 2

FlipRobot is now rechargeable and includes a Bluetooth function

Set of 15
Save
\$294³⁰

Rechargeable FlipRobot E310 Plus

The FlipRobot E310+, equipped with Bluetooth connectivity and rechargeable battery pack, allows students to master the critical STEAM related skills required for life after the classroom. Capable of both block and script based programming the FlipRobot E310+ is both those who are looking to begin the basics of coding through to more advanced senior school robotics learning.

ACU310	Each \$254.95
ACU310-5	Set of 5 \$1,229.95
ACU310-10	Set of 10 \$2,399.95
ACU310-15	Set of 15 \$3,529.95

Endless Expandability with Extension Kits

STEAM Ability 1

Topic 3

FlipRobot Add-On Kit - Insect Limbed Robot

Insect Limbed Robot instills engineering creativity and artificial intelligence with flexible limb designs and dynamic light sensors. Students can navigate the Insect Limbed Robot through challenging terrains, by mimicking movements from the animal kingdom.

ACU131 \$77.95

Topic 4

FlipRobot Add-On Kit - Air Piano

Students will learn to create music by utilising ultrasonic sensors, LED lights, and servo-motor. Students will also experience human and robot interactions by playing the Air Piano, then using creativity and computational thinking to program and play a melody of their own design.

ACU141 \$104.95

Topic 5

FlipRobot Add-On Kit - Little Artist

Students will discover the applications of omni-directional wheels for enhanced mobility. By applying the coordinate system concept in coding, students can unleash their artistic creativity and program FlipRobot to draw their very own masterpiece.

ACU151 \$177.95

Topic 6

FlipRobot Add-On Kit - Household Cleaner

Students will explore the practical applications of robotics by creating a home cleaner powered by artificial intelligence. Equipped with dual microswitches, Smart Household Robot allows students to utilise problem-solving skills to design efficient routes and program it to perform autonomous cleaning tasks.

ACU161 \$82.95

STEAM Ability 2

Topic 1

FlipRobot Extension Kit - Dancing Robot

Start the journey in learning the world of bionics by programming unique bipedal movements. Learn the applications for speed and power, and program and problem solve issues with the Dancing Robot, by using FlipCode and FipRAS to complete challenges.

ACU118 \$81.95

Topic 2

FlipRobot Extension Kit - Little Drummer

Students can form a band with robots to unleash their musical talent and creativity. Learn about how sound is created and transmitted, the horizontal and vertical movements of servo motors, and robotic applications in playing percussion music.

ACU218 \$118.95

Topic 3

FlipRobot Extension Kit - Robotic Arm

Students will learn and apply the robotic arm mechanics to create solutions to real life challenges. Students will learn about robotic arm mechanics, and robotic arm industrial applications, also to program and control robotic arm to move objects, and to advance human productivity.

ACU318 \$209.95

Topic 4

FlipRobot Extension Kit - Bionic Quadruped Robot

Transform FlipRobot into an advanced animal-like robot. Through intuitive servo motor graphical programming, students can expand their creativity and bring the robot to life by designing complex robot movement with ease.

ACU418 \$362.95

Edison

Edison

Edison is an affordable robot for learning and inventing. It is LEGO compatible and easy to program.

Download the free software, lesson plans, EBooks and floor mats online and get started straight away! Edison can be programmed with three different platforms for stepped learning.

Powered	Connection	Programming Language/Software	Operating Systems	Age Group Years 3-8
 x4		  	    	

Why Edison?

- Edison is the super affordable robot
- With three types of programming languages, Edison grows with your students from beginner to advanced programmers
- Compatible with LEGO bricks, modular and easily expandable to create bigger and better models
- Classroom ready - find robotics lesson plans online to get you started straight away
- Open and free software for Windows, Mac, Linux, iOS and Android
- Built to last - tough enough to be driven over by a car!

Edison Complete Classroom Solution

This kit includes everything you need to use Edison in the classroom.

EDM001-KIT1

\$1,149.95

Included in the Kit:

- 10x Edison
- 2x EdCreate - each set includes 115 LEGO compatible Building elements
- 5x EdMat
- 1x EdComm Spare Cables - set of 10

EdCreate 115 LEGO® Compatible Building Pieces

Create bigger and more impressive models with EdCreate. This pack of 115 LEGO® compatible building elements to compliment the Edison robot.

EDM004

\$47.50

EdComm Cables

A set of 10 rugged replacement cables to upload your program to your Edison.

EDM005

Set of 10 \$72.95

Robot sensors

- Left and right infrared obstacle detection - Navigate through a maze and avoid collisions
- Left and right light sensors - Follow a torch/flash light or find a dark corner
- Clap detector - Sense loud sounds such as claps to control driving
- Line tracking sensor - follow lines and stay within borders

Lights, sound and action

- Left and right red LED lights - Flash the LED lights to add a cool look
- Buzzer - Gives sound feedback and can play musical notes
- Two motors with encoders - Drive Edison or use the LEGO cross axles to power a new invention

Robot communications

- Infrared receiver - Remote control from a standard TV/DVD remote control
- Infrared LEDs - Transmit messages and control commands to another Edison robot
- Infrared receiver - Receive messages and control commands from another Edison robot

Multifunction line tracking sensor

Edison's line tracking sensor has three functions:

1. Detect lines - Contrast between black and white surfaces
2. Read barcodes that activate pre-programmed functions
3. Receive the programming signal from EdWare via the EdComm cable

LEGO compatibility

Edison has been designed as a modular robotics system that is easily expandable using LEGO® bricks. Two or more Edisons can be connected together.

Software

Edison is programmed using EdBlocks, EdWare or EdPy. The software is free and open source and works on Windows, Mac and Linux computers and iOS, Android and Chromebook. For full compatibility and more information about the software, please refer to our website.

StarLAB

StarLAB

StarLAB is a platform that allows students to create codes that can quickly interact with real world sensors. The StarLAB content will take students through the science behind each sensor, real world applications and the coding commands needed to interact with it. With the Rover, students learn the fundamentals of robotic machinery, how robots move and sense the world around them. Programmable with Python.

Powered	Connection	Programming Language/Software	Operating Systems

Why StarLAB?

- Code with Python! Python is the most popular programming language currently used around the world. The StarLAB Python course teaches students everything you need to know to get started with coding, thinking creatively and how to make interactive code that you can use everywhere
- The StarLAB Mars Rover teaches students to develop rover code starting with moving in a straight line through to navigating a maze
- The rover platform is an exciting way to engage students in robotics with a 3D printed frame, high power motors and additional sensors to allow the rover to navigate

StarLAB Mars Rover Bundle + Site License

With StarLAB and Rover set, students can program different sensors on the same robot, at the same time! The StarLAB Coding Platform is a sensor lab you can hold in your hand. It allows you to measure the world around you like air pressure, movement, light, and can take HD videos and photos. StarLAB gathers information from its sensors and gives you tools to use the data for any experiment you want to run. With the StarLAB Rover, you can experiment with robotics and take your sensors on the go.

SLB001 Each \$1,799.95
 SLB001-2 Set of 2 \$3,249.95

Up to 15 students can connect to one Rover to collect data!

StarLAB offers a complete STEM education platform and includes curriculum aligned lesson plans and 12 months access to the online learning platform!

RCJA Rescue Field - Cut and Printed Tiles Kit

This modular robotics RobocupJunior Rescue Course has been designed to allow schools to have an almost completely out of the box ready challenge for students which also meets the course specifications necessary to prepare for the RCJA Rescue Competition. Includes 29 tiles (1 tile measures 60 x 60cm and 28 double-sided tiles measuring 30 x 30cm), 4 ramps, risers to create different levels and heights within the course, reusable colour stickers (4x4cm) and a variety of pins and plugs.

ROB016

\$899.95

Official RobocupJunior Rescue Practice Field

The Rescue Practice Field is a durable and waterproof vinyl resource that has been designed for use in the RobocupJunior Australia competition. The field includes the Premier tiles and can be cut into 15 separate tiles or used as one complete field. Complete size: 297.8cm(W) x 311.2cm(L). Individual tile size: 594mm x 594mm.

ROB009

\$139.95

Robot Soccer Field

The Robot Soccer Field can be used as an educational activity in the classroom as an introduction to coding and the use of sensors broadening the appeal of robotics to encouraging a wider range of students to explore STEM subjects and careers. The RoboCupJunior Australia Simple Simon Soccer Game could be used with this mat which is an introductory league. Please refer to Simple Simon rules listed under Soccer on the RobocupJunior website.

ROB010

\$139.95

teachables

MTA Robotics Training Mat

This MTA Robotics Training Mat is a great resource to get started with the NXT Base Set and EV3 Core Set. A wide range of activities can be performed with this mat. This mat has been developed to allow for open ended activities that can be designed by the teacher or the students. It can be used as a testing mat or challenge area.

ROB014

\$119.95

teachables

Robotics Sumo Mat

This Sumo robotics mat is a perfect mat to practise for sumo robotics competitions. The mat measures 1m in diameter, with the outer white circle measuring 5cm.

TEB6229

\$49.95

Scratch Controller

A simple input device that can extend your use of Scratch, at a price you can afford. The Scratch Controller is an input device we've specially designed for use with the popular Scratch programming language. Students can design and create fun and challenging activities whilst developing their programming and debugging skills. A perfect alternative to using a keyboard or mouse in Scratch.

Bee-Bot Road Maze Tiles Kit

Learn the basics of programming with this amazing Bee-Bot Road Maze Tiles Kit! You can give instructions to your Bee-Bot or Blue-Bot to go from the school, to the cafe to the cinema, etc... Create different towns, and different stories with the 27 puzzle pieces included in this kit (TEB6236 & TEB6237).

TEB6236K Kit \$99.95
 TEB6236 Road Crossings only - Set of 18 \$69.95
 TEB6237 Town only - Set of 9 \$39.95

Coding Steps Puzzle Tiles

Link the puzzle pieces together and follow the arrows! Practise with a sequence of instructions by moving in the direction of the arrows. This will teach students the starting principles of programming. Use the puzzle pieces as an active game, or let your Bee-Bot or Blue-Bot follow the arrows. Each piece measures 15x15cm, set of 18 pieces.

SPP0260 Set of 18 \$69.95

teachables

Robotics Coding Cards

A set of 60 double-sided cards with the basic directional instructions on one side (left, right, forwards, backwards, pause), and more advanced coding controls on the reverse, such as repetition, loops, and degrees. Each card measures 5x5cm and is laminated.

TEB6220 Set of 60 double-sided cards \$9.95

Duracell All-In-One Battery Charger

Duracell All-In-One Battery Charger provides 4 hours of use after just 45 minutes of charge! A simple, safe and reliable solution for your daily power needs, this charger can charge 4 AA batteries in 4 hours. Suitable for use for AAA and AA rechargeable batteries.

ACC1625 \$39.95

Duracell Recharge Ultra Batteries

Duracell Recharge Ultra AAA & AA batteries let you charge 400 times and with a Long-Life Ion Core you get amazing power in every battery. Plus, they come pre-charged, so you can power your devices right away and will stay charged for up to 12 months, when not in use.

ACC0080 AAA Batteries - Pack of 4 \$34.95
 ACC9812 AA Batteries - Pack of 4 \$34.95

Kinazium Robotics Maze & Sensors Kit

Kinazium unleashes the potential of robots by giving kids the tools to design mazes, ramps, games and more for playing, racing and competing. Invent your own robot courses for robots of all sizes. Program your robots to actively navigate simple or complex mazes. Infinitely expandable, a four pack can be used individually or combined to become Kinazium in the Gymnasium! The maze consists of 4 mats with peg holes (each measuring 50 x 50cm), 80 pegs, 44 walls and ramps of different sizes and shapes. Use the two wireless accelerometer sensors to score points, or alternatively use them as sequential timers. The kit includes 1 maze (TRX001) and a set of 2 sensors (TRX002).

Endlessly combine the walls to create mazes and even ramps!

- TRX003 Kit **\$199.95**
- TRX001 Maze only **\$139.95**
- TRX002 Sensors only - Set of 2 **\$89.95**

Each mat is available individually, see page 64-68

~~\$629.40~~
\$499.95
 Save **\$129.45**

MTA Robotics Mat Value Pack of 12

This kit consists of 12 robotics mats. Each of the mats show a 15 x 15 cm grid, ideal to be used with robots that move in 15cm increments, such as Bee-Bot, Blue-Bot, Cubetto. The mats can also be used with other robots which can be programmed to move in 15cm increments, such as LEGO Education EV3, Max:Bot, MaQueen, Dash and Cue.

- TEB6223K Kit **\$499.95**

Tello EDU Drone

TELLO EDU Tello EDU Drone

POWERED BY DJI

Tello EDU is an impressive and programmable drone perfect for education. Take drones to the next level and give your drone instructions by programming it! The Tello drone also supports block programming. Simply drag coding blocks on the screen to program Tello EDU and enable certain movements. Additionally, the Tello Space Travel tutorial teaches you how to use Swift programming language to code on your iPad while following a fun storyline.

Powered	Connection	Programming Language/Software	Operating Systems	Age Group
				Years 6-12

Why Tello EDU Drone?

- You can program multiple Tello EDUs simultaneously through one device
- The mission pads are a fantastic asset for increased programming precision, as they serve not only as guiding points, but as trigger mechanisms
- VR Headset Compatibility
- Industry-leading components to ensure stable flights
- Getting started is extra easy with the Tello app's friendly UI

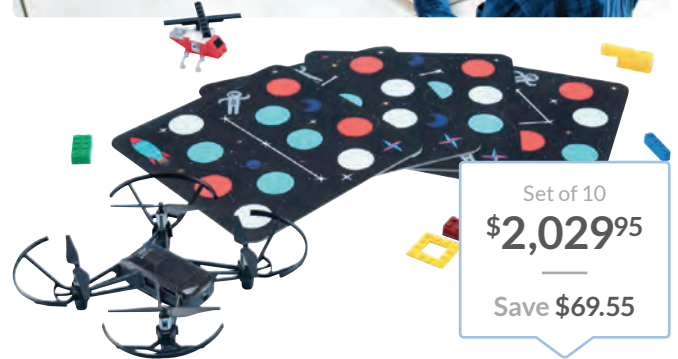

Tello Education Drone

Take drones to the next level and give your drone instructions by programming it! You can easily learn programming languages such as Scratch, Python, and Swift. Complete with DJI's flight control technology, Tello EDU also supports Electronic Image Stabilisation. Write code to command multiple Tello EDUs to fly in a swarm and develop amazing AI functions. Programming has never been this fun with Tello EDU!

ClassVR

ClassVR

ClassVR is a complete VR and AR system for the classroom. It provides an engaging, immersive experience for students of all ages, and allows them to view and understand subjects and topics

CLASSVR through personal experience. The immersion and engagement students gain from VR dramatically increases their ability to understand and retain information. The Virtual Reality headset complete with a unique student-friendly interface, gesture controls, embedded educational resources and simple-to-use teacher controls. With over 700 pre-made activities or the ability to create your own content, the possibilities are endless!

Powered	Connection	Software	Operating Systems

Why ClassVR?

- First complete virtual and augmented reality set designed specifically for schools, with standalone headsets, intuitive gesture controls, a huge library of content and an easy-to-use teacher management portal.
- Designed to raise student engagement and increase knowledge retention.
- Deliver incredible experiences and interactions in your classroom.
- When students put on the ClassVR headset they are transported to a futuristic reality where they can use innovative head and hand gestures to navigate around.
- Includes charging and storage cases, with rechargeable batteries that are designed to last an entire school day.

ClassVR Classroom Set

ClassVR's headset is a standalone, classroom-ready device, delivering a fully immersive VR experience under the teacher's control. ClassVR doesn't require any additional devices, such as phones. Available in sets of 4 or 8. Please note: the purchase of the ClassVR Portal access (CVR500 or CRV499) is required and not included.

- CVR008** Set of 8 Goggles \$4,599.95
- CVR004** Set of 4 Goggles \$2,659.95

Key Features

- A high definition 5.5" display to deliver crystal clear images and videos
- Integrated speakers with volume controls and an audio-out port to connect headphones
- Wi-Fi and Bluetooth connectivity to enable classroom control
- Features a front facing 8MP integrated camera, to support Augmented Reality content
- Lightweight, comfortable and suitable for users of all ages
- Suitable for students wearing glasses
- Includes strong, durable, and portable ClassVR storage and charging case

Please note: the purchase of the ClassVR Portal access (CVR500 or CRV499) is required and not included.

What's Included?

Standalone Headsets

ClassVR's standalone headset is fully classroom ready. No additional mobile device is needed, the headset delivers a fully immersive VR experience whilst being wirelessly managed and controlled by our innovative ClassVR Teacher Portal

Central Headset Management

With the real-time classroom delivery platform and full control and management of multiple headsets in the classroom teachers have a quick and simple way to send their lesson to multiple headsets and view and monitor progress

Optional Setup, training and support

Do you require further assistance with the setup of ClassVR in your school? The ClassVR Webinar & Remote Installation Support (CVR001) will help you getting started! Find more information on our website

Curriculum Aligned Content

ClassVR comes complete with a huge range of pedagogically sound, engaging content along with structured lesson plans to help spark the imagination of students, leaving them with memories and experiences that they will remember

ClassVR Portal

CLASSVR

ClassVR is an open platform, supporting Virtual, Augmented and Mixed Reality curriculum content, as well as allowing students and teachers to create, upload and share their own content, creating a collaborative community of global educational resources. The ClassVR portal is a web based app that can be accessed via the web on any device or operating system. The portal communicates with headsets through the wireless internet.

ClassVR Portal

The ClassVR Portal access is an annual subscription, available for schools with 500+ students to be connected to the portal (CVR50), or for schools with up to 499 students (CVR499). The ClassVR Portal is a comprehensive VR headset management and content delivery system. Please note, the ClassVR Portal requires the use of the ClassVR Headsets (CVR004 or CVR008), not included and sold separately.

CVR500	Over 500 Students	\$929.95
CVR449	Up to 500 Students	\$629.95

Key Features

- Unlimited access to over 750 AR, VR and MR educational resources, adapt existing content or create your own
- New resources and activities added monthly
- Complete overview and control of all ClassVR headsets within the school
- Controlled, student appropriate interface
- Guide students through the experience,

- highlighting points of interest and promoting collaboration and peer discussion along the way
- Teachers can review each students' headset 'point of view' to instantly see if students are focused at the right place
- Launch activities to multiple headsets simultaneously
- Track student focus
- A growing library of 360° video content

Controlled, student appropriate interface

Adding to the excitement is ClassVR's gesture controls; a simple way for students to navigate the interface to find, select and launch activities. Using just your hands and simple head movements you can navigate around the icons and select and launch activities. No buttons to fumble for, no controllers to hold. Find what you want, then give a gesture and you're off!

Dynamic Points of Interest

Students can be so immersed in a VR experience, it can be hard to get their attention. With ClassVR's dynamic 'Point of Interest' (POI), teachers can guide students to look at a specific part of a VR experience, by simply clicking anywhere on the 360 image that is playing. Students will see a trail of 'breadcrumbs' leading them to the POI.

Launch activities simultaneously

The ClassVR portal allows the teacher to deliver a defined playlist of resources to multiple headsets simultaneously. A simple set of 'play' and 'pause' controls sends resources to headsets and starts experiences. Videos are sequenced so that every student will see the video at the same point, allowing teachers to describe and comment as it plays.

360° videos

Our growing library of 360° video content takes immersion to the next level. Each video has been carefully chosen for its educational benefit. Get ready to take your students deeper into their learning as you deliver video simultaneously to all headsets, keeping everyone focused and on-task. Pause the video on your teacher's portal, and it will pause on your students' ClassVR headsets – a perfect way to leave space for discussion or draw attention to specific learning points..

Merge

MERGE® Merge

The Merge Cube is a holographic resource that allows students to physically hold and interact with 3D objects using augmented reality (AR) technology. Bring lesson plans to life in the classroom, lab, library and Makerspace to support active learning and content creation.

Software	Operating Systems
  and many more	 

Why Merge?

- Use Merge Cube to teach lessons or create activities
- Convert 3D files to digital objects to illustrate complex concepts
- Merge allows students to "experience" history and science
- Convert Paint 3D and Tinkercad designs into virtual objects
- Code in CoSpaces Edu and hold creations as virtual objects
- Scan real-world objects with Qlone and convert into virtual objects

Merge Holographic Cube

Learn through virtual reality! With the Merge Cube you can hold virtual objects in your hand and learn about anatomy, math, science, engineering and more. The durable and soft Cube has long lasting battery, and over 30 available apps to learn and play.

Merge EDU Platform

Inspire and engage students in STEM and develop 21st Century Learning skills with MERGE EDU, an active-learning platform that provides AR tools, VR learning experiences, a wealth of content and immersive lesson activities designed for the award-winning MERGE Cube. With different subscription models, there is always an option suitable for your school. For a full list of inclusions for each subscription model, please refer to our website.

Included in the platform subscription:

Merge Explorer

Interact with complex models, perform virtual dissections, and observe virtual phenomenon

Object Viewer

Object Viewer allows you to convert 3D models and digital designs into virtual objects you can hold on the MERGE Cube

Lesson Activities

Find a starter collection of lesson activities ranging from 15 minutes to full class length to get started with Merge Explorer or Object Viewer

Teacher Dashboard

Provision and manage student accounts, monitor completion tracking of individual Explorer learning modules and administer student virtual object collections

Hue Stop Motion Animation

HUE animation studio Hue Animation

Tell your story with stop-motion videos made using HUE Animation for your Mac or PC, which was built specifically for students and teachers. A simple, user-friendly interface enables students of all ages to express their ideas visually within minutes. Easily snap images frame by frame, add narration and background sounds, make time-lapse movies, edit with paint tools, then share direct to Creatubbles, YouTube and other video sharing sites.

Operating Systems

Age Group
Years 2+

Why Hue Animation?

- Animation encourages students to solve problems, make decisions and judgements, evaluate and improve their projects and review and reflect on their learning.
- Perfect for storytelling, while improving digital literacy skills.
- A versatile cross-curricular tool, which brings projects to life and gives a welcomed change from the writing process routine.

Hue Animation Studio Kit – Software & Camera

HUE Animation Studio contains everything that a budding animator needs to create stop motion animation videos. Perfect for school projects, this is a creative and educational tool for endless creativity and imagination. The kit includes the Animation Software (single license), the HUE Camera, a user guide, and 1.8m USB cable. The HUE camera is a multipurpose camera and can be used for stop motion animation, video recording, classroom document camera/visualiser and video chat. The HUE HD camera is a flexible plug and play USB camera with built-in microphone, perfect for animation. The kit also includes the HUE Book of Animation with instructions for 20 stop motion videos.

HUEKIT1

\$189.95

Hue HD Camera & Visualiser

The HUE camera is a multi-purpose camera and can be used for stop motion animation, video recording, document imaging, visualiser and video chat. With built-in microphone, weighted base and flexible neck, the camera can also be used to magnify very small items.

HUE001 \$139.95

Hue HD Pro Camera & Software

The HUE HD Pro classroom camera and visualiser can view a full A4 page and project it onto the whiteboard via your PC and projector. It also comes with specially designed software (single license), HUE Intuition, to allow you to master the full functionality of the camera. HUE Intuition allows you to record video and sound and save movies, annotate images and save them, take snapshots, and take multiple images over time. The camera has built-in LED lights, full 360° rotation, manual focus, optional base and integrated microphone and comes with USB to mini-USB cable.

HUE002

\$192.95

HUE Animation Software

If you already have a HUE Camera, or any other USB webcam or a built-in laptop camera which you want to use to create stop motion animation on more than just one computer, you can purchase the HUE Animation software separately.

HUE005

Sports Camera with WiFi

The Sports Camera with WiFi offers a modern, simple and fun way to capture images. It is ideal for teacher or pupil use due to the clear and easy to use buttons. The perfect resource to capture all the important progressions of your students throughout the day. In addition, use WiFi to connect your tablet or mobile, which can then act as a view finder and remote control. It comes with a waterproof housing, a selection of mounts and a wireless remote control.

TTS617N

\$179.95

Digital Microscope - Wireless /USB

This extraordinary wireless handheld digital microscope/camera is easy to use; just connect it to your computer or even your smartphone, simply using the 10m covered WiFi, and start taking videos or photos. Alternatively, you can simply use the USB to connect to your computer and use it as a normal web-cam. You can even mount it on a standard tripod (not included). For product specification please refer to our website.

FD079

\$114.95

Luna 2.0 - Document Camera

Contemporary new design and enhanced image quality meets reliable simplicity. Easy-to-use digital projection camera is also a web cam and photo/video camera. Great for students' multimedia projects across the curriculum or whole-class demonstrations of manipulatives in action, book pages, science models, and more. Connects via USB port to use with your computer or interactive whiteboard. Features 2.0 MP digital images, adjustable gooseneck, auto focus, 8 LED lights, and internal microphone. No batteries required. Compatible with PC and Mac. Measures 50cm high.

LER4427

\$299.95

Zoomy 2.0 - Digital Microscope

Zoom in on the world around you! This freshly updated, all-in-one handheld digital microscope now in vibrant blue gives early scientific study a whole new perspective, and is easy for young children to use. Zoomy 2.0 magnifies up to 54x and allows students to closely analyse the structure of objects in greater detail than ever before. Use with a computer, projector, or interactive whiteboard. Uploads and connects via USB. Features 640 x 480 pixels, VGA CMOS sensor, 4 LED lights, and 2 head adapters. Compatible with PC and Mac. Measures 7.5cm in diameter.

LER4429-B

\$109.95

Digital Microscope - USB 5MP with Software

A USB microscope with a simple but incredibly useful stand that allows students to make fine adjustments to the vertical height of the microscope and swivel the scope arm around a 360 degree range. This permits a greater level of viewing accuracy and stability. On either side of the stand there are two metal holders to lock your object in place and a printed ruler to help you get an approximate feel for the length of objects. The optics built into this microscope are excellent. The sharpness of texture on magnified objects is incredible to look at, you will spend hours searching for things to magnify. It comes with a great piece of software for capturing 5MP (2592x1944) res JPGs, BMPs, TIFs or PNGs and 1280x960 pixel AVI files. Compatible with WinXP/Vista/7/8, Mac 10.6-10.8. Magnification ratio: 10x, 300x (at 5MP res). Find full specifications on our website.

Digital Music – ROLI

ROLI

ROLI changes the way people make music. ROLI offers high tech musical instruments that allow students to expand their creativity, while creating music. With the ROLI's Seaboard, and Blocks, the possibilities of creating different sounds are endless. By combining the modular block systems, making music has never been

this fun and exciting! Start with the Seaboard Block or Lightpad Block and expand your range while you become a more competent music maker!

Powered	Connectivity	Programming Language/Software	Operating Systems

Age Group
Years 2-12

Why ROLI?

- The Seaboard reimagined what a keyboard could do
- The ROLI system is expressive and expandable - begin with one Block and build bigger instruments as your skills grow
- Modular system - connects to other Seaboard Blocks and any Block from the ROLI BLOCKS system
- Explore hundreds of sounds from strings to synths
- Wireless and portable system
- 15 Meter Bluetooth range, Mac OSX and iOS only
- 10 Hours battery life, 4 hours charge time

ROLI Beatmaker Kit

The Beatmaker Kit gives everything needed to take your beats to the next level, whether making a first track or honing techniques. Learn finger drumming skills, play with hundreds of expressive sounds, and complete a track with a suite of software. It's an all-in-one package for making beats, wherever your musical ideas strike. The Beatmaker includes 1 Lightpad M and 1 Loop Block.

MG1901 \$409.95

ROLI Touch Block

The ROLI Touch Block is the companion that helps you adjust the expressive behaviour of your Seaboard Block and Lightpad Block M. Turn up or turn down the responsiveness of the surface to the Strike, Glide, Slide, Press, and Lift dimensions of touch. Maximise the depth of expression available through pressure, or minimise the pitch-bend effect of sideways movements.

MG1143 \$149.95

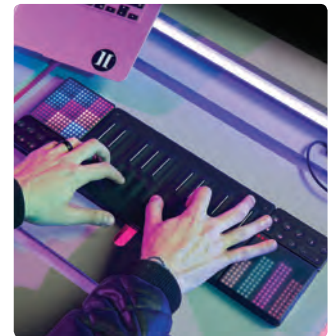

ROLI Seaboard Block

Create astonishingly expressive music on a next-generation, fun, and futuristic keyboard, the ROLI Seaboard Block. A portable, powerful controller that works on its own and connects to other Blocks in the modular BLOCKS system. This keyboard replaces a traditional keyboard with a soft, pressure-responsive surface allowing you to touch and shape your own sound and let you make music in your own way.

MG1142 \$479.95

Check out the video on our website to truly understand the magic of ROLI!

ROLI Lightpad Block M

Lightpad Block M is a musical touchpad that lets you make music in a new way, featuring an enhanced tactile surface for additional expression control, suitable for professionals or for those making music for the first time.

MG1591 \$319.95

ROLI Live Block

The Live Block's controls provide shortcuts for switching scales and octaves, playing chords and arpeggios, and sustaining notes – all in real time during a performance.

MG1213 \$149.95

ROLI Loop Block

The Loop Block's controls help to set a tempo, record loops, and quantise loops so they always snap in time with the tempo.

MG1218 \$149.95

Makerspace Kits

Includes over 15,000 components, complete with a pallet of replacement supplies!

Makerspace Trolley - STEAM Activity Cart incl Resources

Roll it into your classroom, lab, or library for the ultimate Maker/STEM/STEAM solution. With over 40+ STEM projects and almost every TeacherGeek component ever manufactured, this cart can easily support hundreds of kids. Each cart includes a pallet of replacement supplies (way more supplies than you see in the cart, over 15,000 components in total!) and sturdy tools to create almost any project. The sign is dry erase. Suitable for grades K-12.

Students will learn science and engineering concepts through experimentation, grow their understanding and evolve projects through the design & engineering process. The TeacherGeek Maker Cart provides ample opportunities for amazing true STEM projects.

3D Printer Cart – Premium Model

This 3D Printer Cart allows printing equipment to be shared around the school easily and keeps everything that you need close at hand. Also ideal for libraries where diverse creative activities are undertaken and space is limited. Please note: 3D printer is not included. Size: 150 x 91 x 64cm with spool arm, 104 x 91 x 64cm without spool arm.

CRN5001

\$869.95

Key Features:

- Accommodates 3D Printers with a footprint of up to 60 x 67cm
- Base Tech Tub® for locking up specialised equipment and tools (supply your own padlock). Does not come with dividers
- 2 Open Tubs
- 1 Really Big Tub
- 4" castors, 2 locking
- Adjustable spool holder (holds maximum of 4 spools)
- Sliding laptop shelf fits laptops up to 17"
- Magnets for attaching accessories to frame

Easy transport of 3D printer while securely store valuables

Ideal for Makerspaces

STEM Maker Station

Schools everywhere are putting more and more emphasis on learning through building and hands-on experiences. The STEM Maker Station allows classrooms to store all of their essential maker materials in one secure place and share a unit between classrooms. The STEM Maker Station is also ideal for libraries where diverse creative activities are undertaken and space is limited.

CRN001S

\$749.95

Key Features:

- Cardboard or material storage rack
- Tape/ribbon/string dispenser rack
- Coroplast overhead sign and display to personalise your station (letters not included)
- Hooks for hanging accessories/tools
- Large bottom shelf
- 6 Open Tubs, 4 Tiny Tubs
- 4" castors, 2 with brakes and pinch point covers

Specifications:

- Frame: 167(H) x 131(W) x 66(D)cm
- Bottom shelf: 99(W) x 36(D)cm with a 7(H)cm edge
- Open Tubs: 38(L) x 30(W) x 15(D)cm
- Tiny Tubs: 13(L) x 8(W) x 10(D)cm

TeacherGeek is dedicated to inspiring and empowering the innovators of tomorrow. The TeacherGeek build system allows you to create almost anything mechanical. Make it your way incorporating found/ recycling bin materials. Experiment and play, then revise and re-engineer. The TeacherGeek system allows for true engineering and innovation. The range consists of a combination of ready-to-go activity packs, or combine a wide variety of loose components to create your own STEAM model. TeacherGeek engages the hands and minds of students and teachers alike with a broad range of exciting and inspiring STEAM education activities and concepts. Students create unique solutions through scientific and engineering methods that are process, performance, and goal-driven. The components allow for designs which test accurately and consistently, so engineering can be driven by scientific research and method.

Includes over 15,000 components, complete with a pallet of replacement supplies!

Makerspace Trolley – STEAM Activity Cart incl Resources

Roll it into your classroom, lab, or library for the ultimate Maker/STEM/STEAM solution. With over 40+ STEM projects and almost every TeacherGeek component ever manufactured, this cart can easily support hundreds of kids. Each cart includes a pallet of replacement supplies (way more supplies than you see in the cart, over 15,000 components in total!) and sturdy tools to create almost any project. The sign is dry erase. Suitable for grades K-12. Students will learn science and engineering concepts through experimentation, grow their understanding and evolve projects through the design & engineering process. The TeacherGeek Maker Cart provides ample opportunities for amazing true STEM projects.

 SER1823-60 \$19.95

Tyres Rubber Bands – Pack of 40 NEW
 SER1823-64 \$26.95

TeacherGeek - Rubber Band Racer - Advanced

Design and engineer a vehicle that is propelled by the energy stored in rubber bands. Make it go for distance, or stop with precision. Design it to go fast, or cross a difficult terrain. Rubber band racers can be easily redesigned/reconfigured, so every day you can have a different challenge. Learn by experiencing potential and kinetic energy, simple machines, friction, elasticity and ratios. Learn how friction can help, and hurt your racer.

SER1822-96 Pack of 10 \$219.95
 SER1822-95 Each \$26.95

TeacherGeek - Wind Lift Activity

Experience the power of wind. Design and build a wind lift that can capture it. Wind lifts use energy from the wind to raise a bucket. Engineer it to lift a heavy load or raise the bucket with speed. Wind lifts make learning about wind power, energy, mechanical advantage, torque, work, and other scientific concepts fun and understandable.

SER1823-15 Pack of 10 \$89.95
 SER1823-14 Each \$13.95

TeacherGeek - Wiggle Bot

Wiggle-Bots are motorized contraptions that are designed and built entirely by students. Watch eyes widen as wires are connected and Wiggle-Bots start to move. See how understanding and design evolves through experimentation and tinkering. Appreciate the challenge of going beyond step by step instructions and creating something completely new and innovative.

The Wiggle Bot includes a battery holder, motor with leads, gears, dowels, and motor mount. The Wiggle Bot Super includes the same resources, plus an additional hole plate, steal wire, connector strips, and screws and nuts.

SER1824-56 Super - Pack of 10 \$199.95
 SER1823-16 Super - Each \$26.95
 SER1824-57 Standard - Pack of 10 \$159.95
 SER1823-17 Standard - Each \$23.95

TeacherGeek - Hydraulic Claw

Design and build a hydraulic claw that works like the ones in the arcade. Move the upper cylinder and watch your claw open and close below. We have documents to get you started, but the final claw design is up to you. Can you design a claw to pick up specific objects (worms, marshmallows, balls)?

SER1824-60 Pack of 10 \$139.95
 SER1824-59 Each \$17.95

TeacherGeek - Electric Air Racer

Send this racer flying with an electric motor and propeller. Design it for speed by designing the frame and propeller blades. This activity requires materials from the recycling bin to create the propeller blades. Learn about electricity, blade angle, and propeller design, apply the scientific method and innovate (design, build and evolve your own unique design).

SER1824-66 Pack of 10 \$129.95
 SER1824-76 Each \$17.95

TeacherGeek - Land Sail Car

Design and engineer a vehicle that is propelled by the wind. This activity is perfect for early elementary groups. It allows students to quickly and easily experiment with sail shape, angle, and placement. Engineer a Sail Car that can go the greatest distance, travel the fastest, or carry the most weight. Learn about forces and motion by completing the optional Sail Car labs.

SER1824-67 Pack of 10 \$99.95
 SER1824-77 Each \$16.95

TeacherGeek - Electromagnetic Crane

Design and build a crane that can best sort magnetic materials for recycling. Start by making and experimenting with an electromagnet, then create a crane to move it. Test the crane using the scientific method. Evolve the crane through the engineering design process.

SER1824-61 Pack of 10 \$119.95
 SER1824-71 Each \$17.95

TeacherGeek - Advanced Ping Pong Projectile Launcher

Build your own Projectile Launcher with TeacherGeek - send ping pong balls flying, marking the trajectory and distance of your shots and targets. Redesign your launcher with greater accuracy and precision through the optional labs and graphing sheets, then compete in exciting design challenges.

SER1823-05 Pack of 10 \$169.95
 SER1823-04 Each \$21.95

TeacherGeek - "Catch The Bug" The Ultimate Electronics Activity

The bug is a truly fantastic and meaningful electronics learning activity. Finished bugs run around the floor with their own personality. Bugs teach basic electronics through a physical interactive experience; an experience that yields deep and long lasting understanding.

SER1822-87 Pack of 10 \$199.95
 SER1822-86 Each \$29.95

TeacherGeek - Build A Boat Activity

Use common materials to explore buoyancy and power! Design a working electric motor boat with this activity. Find your hull in the recycling bin (milk jug, foam tray, pool noodles, etc.). Add the motor, propeller and other components. Set it in the water and watch it go.

SER1822-99 Pack of 10 \$149.95
 SER1822-98 Each \$19.95

TeacherGeek - Wind Pump Activity

The Wind Pump harnesses the energy created from wind to pump water. The wind-driven turbine powers a geared transmission that operates a hydraulic pump. This will move water from one level up to another. You will apply many scientific concepts such as calculating work, fluid mechanics, simple machines and aerodynamics. A stand is necessary and not included.

SER1823-19 Pack of 10 \$399.95
 SER1823-18 Each \$53.95

3DuxDesign

At 3DuxDesign, we realise innovation is not only about maths and science but also art, design, the environment and people. We encourage students to imaginatively and practically think through solutions to real world problems by building structures and environments. A combination of connectors and geometric cardboard forms let students build anything they can imagine. The connectors are engineered to fit most cardboard so almost any shipping box can be transformed into building material. Suitable for students from the age of 4 and up.

Why 3DuxDesign?

- Promoting STEAM education and real-world problem solving by offering an engaging product that blends science, maths, technology, engineering, art and creativity
- By incorporating sustainable and repurposed materials, 3DuxDesigns is an environmentally friendly construction set
- Perfect for schools, makerspaces, after-school STEM/STEAM programs and inventor clubs
- Includes a wide variety of freely accessible lesson plans and open-ended design challenges
- Use the high-quality 3DuxDesign geometric cardboard pieces, or use any of your spare cardboard boxes

3Dux - The Educational GOBOX including Cardboard

This specialty kit for educators comes with 400 assorted connectors, over 500 geometric cardboard forms, a full set of architectural rulers and the perfect storage case. Give your students' creativity a jumpstart and introduce your them to geometry and 3D spatial thinking. Add your own recycled cardboard for endless options.

DX002

Environmentally friendly construction sets

3Dux - The GOBOX PRO - LED Lights

The Gobox Pro is the perfect product to engage students ages 6+ in learning about architecture, engineering and electricity. The lesson plan walks students through building and electrifying their very own models. Then reuse materials to light up all of your cardboard creations.

This kit includes:

- 400 assorted connectors
- Over 500 geometric cardboard shapes
- A full set of architectural rulers
- 10 LED lighting sets (each with 4 coloured LED bulbs, 2 alligator clips, 1 foot conductive tape, 1 battery holder, 1 toy dog)
- The perfect storage case

Makeblock Laser Box

Specially designed for education and creation, LaserBox reimagines and redefines laser operating performance using a high-resolution ultra-wide-angle camera together with AI visual algorithm. The machine can auto identify any official material and then set up the cutting engraving parameters accordingly. Being a revolutionary laser machine defining operation through hand-drawing, LaserBox makes laser creation easy and fun! Create more possibilities for the classroom, and make ideas happen.

EE30090 \$9,999.95

Features:

- Directly draw and cut or engrave - no software required
- LaserBox software available for more complex projects, to show status of project, and to plan the optimal cutting and engraving pathway
- Material recognition
- Process dozens of different materials, including paper, corrugated paper, wood, acrylic, cloth, leather, base plate, rubber, plastic, glass fibre and more
- Built-in ultra-wide camera will show you a preview of your design on the material
- Gallery and educational projects and lessons
- Safe and Eco-friendly - job pauses when lid is open

Directly draw and cut or engrave with one push on the button, no software required!

STEM Make-It Take-It Parachuters Kit

Combat gravity in the race to float slowly. Design a parachute that helps your character land safely. Easy-to-implement projects for after school, STEM night, summer school, or science fairs. Can be completed in 15 to 30 minutes. Enough materials for the whole classroom. Includes: 30 characters, 30 bags, 50 coffee filters, 40 tissue papers, 100 pipe cleaners, 60 straws, 50 cups and 3 tapes plus instructions.

ETA86110 \$129.95

STEM Make-It Take-It Marble Maze Kit

Get immersed in the addictive fun of marble mazes. Design a maze that challenges friends' and families' logic and skills. Easy-to-implement projects for after school, STEM night, summer school, or science fairs. Can be completed in 15 to 30 minutes. Enough materials for 30 students. Includes 50 marbles, 2 tapes, 50 straws, 30 marble run boxes and 200 foam cubes.

FlashForge 3D Printing Class Kit

This kit includes 1 FlashForge Dreamer 3D Printer, 5 FlashForge Inventor II printers, and one of each of the filaments: orange, red, green, black, transparent, blue and white.

ZF2589K **\$6,749.95**

Complete classroom solution

Connection	Programming Language/Software	Operating Systems

FlashForge - Dreamer 3D Printer

Dreamer is a true Plug 'n' Play 3D printer. It is capable of printing straight out of the box with the ability to print within minutes. The on-board colour touchscreen panel, Wi-Fi connection, filament cartridge integrated inside, all these innovative and thoughtful designs deliver an excellent user experience to every user.

ZF2589 **\$1,799.95**

Specifications

- Build Volume: 23 x 15 x 14cm
- Product Dimension: 48 x 33.5 x 41cm
- Filament diameter: 1.75mm
- Nozzle Diameter: 0.4mm
- Two extruders

Features

- Dreamer features a closable door and removeable top lid to keep out dust, and eliminates temperature interference for more consistent quality of ABS prints
- Five cooling fans ensure smoother curves and finishes
- Easy setup, print within minutes
- Filament cartridge is integrated inside the printer, to extend the filament lifetime.

The ultimate 3D school printer for top-quality designs and models

FlashForge Inventor IIS - 3D Printer

The Flash Forge Inventor IIS features a 3.5-inch HD touchscreen and Flash Forge's famously user-friendly printer controls. With an intuitive interface and convenient WiFi connection, you can start printing your 3D models in no time. The ability to preview 3D models on screen ensures you'll always know what you're going to get, while real time printing status lets you know exactly what is going on. This new Flash Forge model features a built-in camera to monitor the print progress remotely, and an active carbon filter that removes odours.

ZF8477S \$1,099.95

Upgraded version now with built-in camera to monitor the print progress remotely, and an active carbon filter that removes odours

Specifications

- Printing Volume: 15 x 14 x 14cm
- Filament: PLA with a 1.75mm diameter
- Nozzle Diameter: 0.4mm
- Includes built-in camera
- With active carbon filter

Features

- Exceptionally quiet
- Assisted platform calibration
- Filament run-out detection

<p>Connection</p> 	<p>Programming Language/Software</p> 	<p>Operating Systems</p> 
---	--	---

FlashForge Inventor II - 3D Printer

The FlashForge Inventor II is easy to operate and sports a 3.5-inch HD touchscreen with easy to understand controls. In only 4 taps you can start your print, and there is no need to hook it up to a computer. See previews, view real-time printing status and know when your model will be finished.

ZF8477 \$999.95

Perfect for Makerspace

Fully enclosed design space ensures safety

Features

- Fully enclosed design and smart door for double safety
- Supports PLA filaments. The innovative four-sided air supply allows the PLA to cool the shapes quickly
- Manage your 3D printing from anywhere using Polar Cloud, simply control your 3D Printer from anywhere with an internet connection

FlashForge PLA Filament

These FlashForge filaments are the most consistent PLA filaments and are perfect for use with the Inventor II printer. The filaments are made with high quality PLA material to ensure a smooth feeding and extrusion. Anti-moisture ingredients included in the formulation permits longer storage tie without loss of quality. Available in a variety of colours.

Woodworking

Playmat - 4in1 Woodworking Workshop

The Playmat - 4in1 Woodworking Workshop encourage creativity and technical understanding. The Playmat kit contains all the necessary parts for building up to 4 different, real working machines which can easily be assembled due to the well-designed component pieces and easy connection system. A special child-proof adaptor is included, to make this set suitable for ages 4 and up. Includes:

- Tailstock
- Drive Unit
- Drill
- Drilling & Sanding Table
- Sanding Disk
- Tool Res, 12V Safety adaptor
- Screw Driver, Gouge
- Detailed instructions plans & suggestion
- Wood for turning and sawing to start instantly.

The child-friendly design makes Playmat suitable for students from the age of 4 and up!

TCT9012 \$199.95

Unimat 1 Elementary Kit - Woodworking

The Cool Tool Unimat 1 was developed specifically for working with wood. It is fully modular and easy to set up. Children will be delighted with Unimat 1, as their creativity allows them to form turned work pieces and jigsaw models, entirely by hand. Due to the short stroke of the jigsaw blade, the fingers of a young carpenter cannot be injured. At the same time, professionals are delighted by the accurate and precise cutting of the saw.

TCT1601 \$599.95

Unimat ML - Design & Technology Kit

The Cool Tool has designed this Design and Technology kit, that makes the machine variants suitable for intensive usage in the classroom. Children can learn about science, technology, engineering and math. Included in the kit are the components need to build these machines:

- Wood-turning lathe
- Jig saw
- Sanding machine
- Hand-drill or -sander

TCT6015 \$999.95

Jigsaw Blades

A set of 10 replacement blades for your the Cool Tool Machines.

TCT2250 Set of 10 \$9.95

Unimat Service Set incl Blade - Sanding Paper - Gouge

Be prepared for almost all kinds of service, exchanges, upgrading's and extending's of your Unimat set. Includes woodturning gouge, 10 jigsaw blades, 10 sanding discs, and a spare parts set with connecting elements, drivebelt motor ventilator and other extra spare parts.

TCT2630 \$49.95

Assorted Wooden Dowels incl Centerhole

A set of 24 wooden dowels to use with your the Cool Tool machinery. The pieces are made of Lime wood and include 17 pieces of 2cm in diameter and 7 pieces of 3cm in diameter. With centre hole.

TCT3120

Set of 24 \$29.95

Balsa Wood – Assorted Pieces

A collection of varied sizes of balsa wood. This kit includes glue so students get started with their projects right away! Students can use these for construction in the classroom or art projects. Pack Includes:

- 3 of 1.5 x 100 x 450mm
- 3 of 3.0 x 75 x 450mm
- 2 of 5.0 x 75 x 450mm
- 4 of 9.5 x 450mm Squares
- 1 Tube of Glue

DC51629

\$20.95

Balsa Wood

Box A: Sticks, blocks and sheets of balsa wood in assorted sizes. Includes sticks: 46(L) x 1.5-2cm(W). Blocks: 15(L) x 10(W)cm. Sheets: 46(L) x 7-10 cm (W). All vary in thickness. Approx. 200 pieces.

Box B: 45(L) x 7.5-10(W) x 0.151.25cm(D)Varying sizes. Approx. 250 pieces.

Box C: Varying sizes with largest block measuring 15(L) x 10(W) x 4.5cm(D). Approx. 60 pieces.

ATM10801 School Box A \$125.95

Quality batteries at exceptional prices.
DC51113 9 Volt Super Alkaline **\$9.95**

Electric Buzzer

Loud noise buzzer comes complete with positive and negative wires attached. Input: 4-15VDC at 15mH. Output: 70dB. Unit measures 1.4cm(H), Base 3.3 x 1.5cm.
NK51165 Each **\$3.95**
NK51165-10 Set of 10 **\$37.95**

Battery Holder 2xAA Leads

Battery holder holds 2 AA batteries (not included) and features 2 x 10cm Leads (red and black).
NK50097 **\$0.75**

Battery Holder 2xAA Snaps

Holds 2 AA batteries. Connect with lead wires or battery snaps.
DC50122 **\$0.95**

Metal Strip Set

Set includes strips of soft aluminium, hard aluminium, magnetic stainless steel, non-magnetic stainless steel, zinc, zinc plate, nickel silver, bronze, galvanised steel, mild steel, copper and brass, stamped with letter to identify metal. Ideal for experiments to demonstrate magnetic properties and classifications of metals. Strips measure 50 x 25mm.
CT50147 Set of 12 **\$39.95**

Ceramic Magnets

Glue these magnets onto plaster moulds, frames or wooden pegs and decorate the whiteboard. Super pack DC51013K includes: 100 x Ceramic Magnet Round 1.5cm (dia), 100 x Ceramic Magnet Round 2cm (dia) and 100 x Ceramic Magnet Rectangular 3 x 2 x 0.3cm.
DC51012 Round - 1.5cm dia. - Set of 10 **\$3.50**
DC51014 Round - 2cm dia. - Set of 10 **\$3.50**
DC51016 Rectangular - 3 x 2 x 0.3cm - Set of 10 **\$3.20**
DC51013K Super Pack of 300 **\$96.95**

Electromagnet

Soft iron U bend 10cm high with coils, connectors and keeper, for use with 4.5 to 9 volt DC supply. Demonstrates that soft iron becomes a magnet in the presence of an electric field. Comes supplied with full supporting teacher's notes.
NK51091 **\$28.95**

Tools

Wire Strippers

Removes insulation without cutting the inner wire. Can be set for different cable thickness. Separate strong cutting jaws will cut through cables if necessary.

NK51176

Automatic \$19.95

Pliers Long Nose

Insulated pliers can be used to cut wire, hold small objects or squeeze fasteners together. Measures 15cm(L).

Excellent for STEM

LEGO Tech Machines Set

Transform your children into expert builders! With the Tech Machines set in your classroom, you'll help children develop their fine motor and problem solving skills while simultaneously unleashing their creativity as they construct classic machines.

LEG5002 95 pieces \$429.95

LEGO STEAM Park Set

STEAM Park builds on the natural curiosity and desire to create, explore, and investigate the world of early science, technology, engineering, art, and maths (STEAM) through creative play. Children can construct a STEAM Park full of dynamic moving rides, fun games, and scenes using the special selection of LEGO DUPLO® bricks. With every trip to STEAM Park, children grow their understanding of gears, motion, measurement, and solving problems together in a fun and engaging way. Includes 295 LEGO DUPLO bricks, including gears, tracks, pulleys, boats, and figures 8 double-sided building inspiration cards with 16 models to build.

LEG5024 295 pieces \$359.95

LEGO Tubes

This Tubes set will help develop their fine motor and problem solving skills while they create the different tube models. This colourful set makes learning about concepts like cause and effect fun in an engaging and hands on way.

LEG5026 150 pieces \$269.95

LEGO My XL World

Great for children to explore their creative potential by building their own unique models and worlds. Features illustrations of suggested models and a variety of figures and other elements to create their own worlds.

Learning Lab - Motion & Mechanism

Using Gigo's Learning Lab construction blocks as a foundation, kids can learn the designs of complex transport machines, and understand the movement and the function of different types of mechanical structures, including: gear racks, cams, and worm gears. It helps kids to develop the foundations of mechanical machine design. The set includes 20 lesson plans, including 16 models and 4 creative works, a student workbook, and 3D Smart Manual to view the model on your tablet in 3D. Each lesson plan consists of an introduction with theory, building instructions, the experiment, improvements and evaluation.

- over 500 geometric cardboard shapes
- a full set of architectural rulers
- 10 LED lighting sets (each with 4 coloured LED bulbs, 2 alligator clips, 30cm conductive tape, 1 battery holder, 1 toy dog)

Light up your models with LEDs

3Dux - Connector Kits

A set of 60 connector pieces in 6 shapes to build in all directions. The connectors work with most single ply cardboard. Includes 6 differently shaped connectors.

DX001

Set of 60 \$44.95

Each box will supply materials for up to 25 students!

3Dux - Cardboard Refill for Classroom

This box has an assortment of geometric corrugated cardboard shapes. Pieces will range from 2.5cm circles up to 12.5 x 25cm rectangles, including solid shapes or shapes with unique cut-outs. Each box will have a minimum of 500 pieces. All pieces are white on one side/craft on the other.

DX004 Over 500 pieces \$79.95

Design & Play STEAM Kit

Our craft kits let children create and customise real-working cars, boats and planes for a fun-filled introduction to early STEAM concepts! Ideal for integrating STEM with arts & crafts, each kit includes enough materials for 10 kids to engineer their own vehicle. Children just use the pre-cut pieces to build each one, and customise it with their craft materials (not included). Then put it into action! As students test their creations, they'll explore ways to fine-tune each vehicle until they have a car that races, a boat that sails and a plane that soars! Available in a set of 3 (LS57K), or individually. Each set is supplied with a teacher's guide & the materials needed to create 10 working vehicles.

LS570K	Kit	\$170.95
LS571	Cars	\$68.95
LS572	Boats	\$54.95
LS573	Planes	\$54.95

Each set includes 10 vehicles!

Charging Cabinets

Charges laptops and tablets!

Charging Cabinet – 32 Laptops & iPads/Tablets

Charge, secure and store up to 32 devices with a size of up to 11.6"! This charging cabinet is the ideal charging trolley for classrooms using laptop and Chromebooks, with the capacity to charge all devices in one go! The trolley comes with locking system and smart cable management. With LED status indicators to show the charging status of each zone. A student-safe cabinet, with smooth, rounded corners and edges. The sturdy steel construction ensures secure storage. Both front and back doors can be opened and locked. The back door allows easy setup of cable management. The cabinet comes with four 8-way power boards to plug in the chargers of the devices. The compact design has a smaller footprint than most cabinets with this charging capacity. With quiet sturdy casters. Size: 73(w) x 59 (d) x 91 (h)cm, weight is 62kg.

Key Features:

- **Smart cable management** – Securely lock and keep cables in place with clip-in dividers
- **Customisable slot dividers** – Charge laptops, Chromebooks or tablets up to 11.6" with the adjustable slot dividers
- **Intelligent charging** – Power additional classroom tools such as a document camera or laptop with two additional power points on the outside of the cabinet, while charging classroom devices. With auto-off system, you can turn off charging after 8 hours, or turn off auto-off for uninterrupted charging

Charge up to 32 devices at the same time!

Charge up to 16 iPads and tablets simultaneously!

Charging Cabinet – 16 Tablets

Charge, store and secure up to 16 tablets at the same time! The maximum device size is a 10.5" screen. The LED status indicators show the charging status for each zone. A student-safe cabinet, with smooth, rounded corners and edges. The sturdy steel construction ensures secure storage. Both front and back doors can be opened and locked. The back door allows easy setup of cable management. The smart cable management includes repositionable cable clips. The sturdy steel structure ensures secure storage. Size: 66(w) x 49(d) x 41(h)cm, weight is 28kg.

Key Features:

- Charge up to 16 iPads and tablets at the same time!
- Small footprint of cabinet allows you to place the cabinet at most places in the classroom
- Smart cable management
- Lockable front and back doors for easy access
- LED indicators to view charging status

The table tops are made from a fire retardant particleboard, and are coated with a high quality, grey laminate. The high quality, moulded edge adds extra durability and strength. The legs feature a rubber base to help prevent scratching and can be adjusted to stabilise the table. The tables are available in 2 sizes. Early childhood and early primary school will require the tables adjustable from 38 to 60cm high. Upper primary and high schools will require the tables adjustable from 52 to 74cm high. Castors can be added to our height adjustable tables.

Ergerite – Group Table – 154cm

Ergerite - Folding Table

A versatile table that can be folded for easy storage. Features a timber-look laminate table top, metal frame and lockable castors. Table top measures 120(W) x 60(D) x 75(H)cm.

HS169 120 x 60 x 75cm \$399.95

Ergerite - Standing Desk

A flexible and ergonomic addition to any school classroom. This table features side levers which allow the table to adjust in height from 73cm up to 103(H) cm. The table features a moulded edge for extra durability, an easy to clean wood-look melamine top and 2 castors for extra manoeuvrability. We recommend 2 people are needed when adjusting the height of the table.

HS158 120 x 60 – 73-103(H)cm \$399.95

Ergerite – STEM & Robotics Standing Table & Trays

Perfect for STEM and robotics. Table is a whiteboard and features a metal frame. Also includes lockable castors and storage on one end. Measures 120(W) x 80(D) x 97(H)cm. Kit includes 8 x small trays (SUN832S) and 4 x large trays (SUN831L). Always lift the trays when inserting or removing from the frame. Contents may vary.

Digital Technologies & STEAM Education

2020

Visit teaching.com.au/professional-learning for our workshop calendar and to book your workshop now

Professional Learning

Supporting teachers and educators with opportunities to further their professional development with a variety of Digital Technologies workshops.

During our engaging and practical workshops you will participate in a number of hands-on activities under the guidance of a specialist facilitator, and be introduced to a range of tools and strategies to engage students in digital technologies whilst building content and concept knowledge. Our workshops will provide you with ideas and activities you can immediately use in your classroom setting.
