BONUS BOOK

**Discovering Science Book Series** 

The Discovering Science Teacher book series is fully aligned to the Australian Curriculum and covers each of the three interrelated science strands - Science Understanding, Science as a Human Endeavour and Science Inquiry Skills and also the related sub-strands. It includes subject planners, week-by-week lesson plans and assessment record sheets for the teachers, as well as worksheets, resource and self-evaluation sheets for the students. Each lesson plan includes content descriptions, required resources, skills, a step-by-step activities section, extension activities and assessment ideas.

# Science Kits for the Australian Curriculum

The MTA Engaging with Science Kits have been specifically designed to use in conjunction with many of the available commercial Science programs that follow the Australian Science Curriculum (ACARA). The kits contain many of the suggested resources needed to complete lots of the activities set out in programs such as Hawker Brownlow's, R.I.C. Publications's Hands-on Science and the Australian Academy of Science's Primary Connections. All kits come in their own large container with lid and can be stacked and shelved in optional racking. Please note: we do not supply the programs with the kits. We supply the materials that can assist with using these programs.

Living things, including plants and animals, depend on each other and the environment to survive (ACSSU073)

- Investigating how plants provide shelter for animals
- Investigating the roles of living things in a habitat, for instance producers, consumers or decomposers
- Observing and describing predator-prey relationships
- · Predicting the effects when living things in feeding relationships are removed or die out in an area
- Recognising that interactions between living things may be competitive or mutually beneficial
- Living things have life cycles (ACSSU072)

LIFEC

- Making and recording observations of living things as they develop through their life cycles
- Describing the stages of life cycles of different living things such as insects, birds, frogs and flowering plants
- Comparing life cycles of animals and plants
- Recognising that environmental factors
- can affect life cycles such as fire and seed aermination

## Typical Flower Model - Dissectable

This greatly enlarged model of a typically idealised flower is an ideal resource to help children understand the principles of pollination and fertilisation in plants. The dissectible flower model is made of non-breakable plastic and features detachable parts. The flower is numbered, and the model comes with a key card for identifying the specific parts of the flower. Size: 30 x 18 x 38cm.

## **Biology Madness Kit**

Highly appealing, fun interactive kit. Encourages the development of hypotheses, the application of experimental techniques and drawing logical conclusions. Features 25 core experiments coupled with suggested extension experiments. Kit includes: all laboratory equipment necessary for the experiments, materials that contain real science plasticwear and reagents (additional household items are required), laboratory goggles, apron and gloves, a detailed illustrated manual and an interactive DVD containing video footage of young Australian scientists completing experiments. Ages 8+ years

#### Aquaponics **Flower Tower**

The Aquaponics flower tower is perfect for growing herbs, vegetables and flowers inside or out. Just add fish and seeds! The planter holds 80 litres of water and has a clear cover so you can easily view and feed the fish. The flower tower comes with 16 convenient planter locations. The water flow regulator ensures an even flow of water down the internal slides of the tube to water the plants. The plants will filter the water for the fish, while the fish fertilise the water for the plants. A perfect ecosystem! The aquaponics flower tower needs to be assembled.

#### **Raised Garden Bed**

This raised garden bed is made from 3 key components. These consist of a PVC shade and insect canopy, solid plastic sides and a heavy duty plastic sheet for the base. The constructed garden bed is 150 x 75 x 28cm high. The use of the raised garden bed, means you can use specialised soils depending on what you wish to grow, the garden bed liner means you can use the product on hard surfaces such as patios. The shade and insect canopy will protect young plants from heavy rain, frost and direct sunlight. When the canopy is fully closed it stops harmful insects from damaging foliage or flowers etc. Since the product is made from plastic it will not decay. It is easy to assemble, no tools required. Watering can and plants not included. Ages 3+ years

#### Australian Curriculum Geography

Australian Curriculum Geography is a sevenbook series linked to the requirements of the Australian National Curriculum for each stage of primary school from Foundation to Year 6. The aim of the series is to use the Geographical Knowledge and Understanding strand of the Australian Curriculum as a vehicle for practising the skills laid down by the Geographical and Inquiry Skills strand to answer the key inquiry questions. Each book is organised into sections dependent on the number of content descriptions in the Geographical Knowledge and Understanding strand for that year. Within each section is a number of 4-page units which explore different aspects of the content description linked to the key inquiry questions. The activities in each unit give students the opportunity to practise geographical skills while addressing concepts which aid geographical understanding.

#### **Basic Electricity Kit D**

The Basic Electricity Kit has been designed as a low-cost. attractive and flexible alternative to the 'circuit-board' approach to investigate simple circuits. Each component such as the switch, light bulb holder rheostat, etc. is mounted on its own individual plastic panel with 4mm sockets. The panels are then formed into circuits by connecting them together using 4mm stackable leads.

#### **Key Learning Values**

- Observing and investigating simple machines: gears, wheels and axles, levers, and pulleys
- Developing scientific inquiry skills
- Following a design brief as part of the engineering design process
- Learning and applying relevant vocabulary for simple machines
- -----
- Fair testing, predicting and measuring, collecting data, and describing outcomes

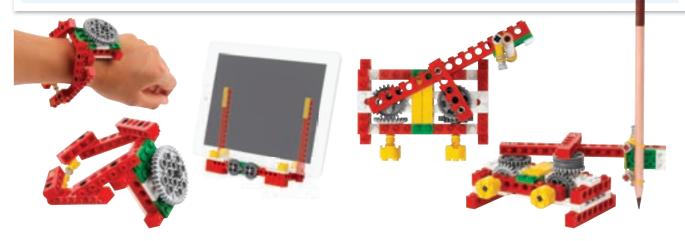

#### **Simple Machines Maker Activities**

This curriculum pack introduces primary students to the hands-on, creative freedom of Maker. Using open-ended, problem-based design brief challenges that reflect real-life scenarios, teachers can gain the creative confidence they need to help their students think up ideas, tinker with prototypes, and build and develop solutions using the LEGO Education Simple Machines set and other materials from around the classroom. In a safe, supportive and inspiring learning environment, students document and reflect on their work using the included worksheets, which can also be used for teacher assessment.

Year 3–8

#### SAM Labs | Year 3–8

SAM Labs makes smart construction kits of clever little blocks and a fun app that give everyone the power of technology to build inventions. SAM Labs is a combination of hardware blocks and software blocks, and offers students the ability to build and program their own inventions while learning the key aspects of STEAM. Simply download the app, connect your hardware blocks with the SAM Space app, and make connections between the blocks in the app. It's that simple!

One Block. A Million Inventions.

**Programming Language/Software:** The SAM Space app, JavaScript block included **Compatibility:** iOS 8 (Beta ) , OS 10.9+, Windows 8.1+, internet connected. Blocks link wirelessly via Bluetooth

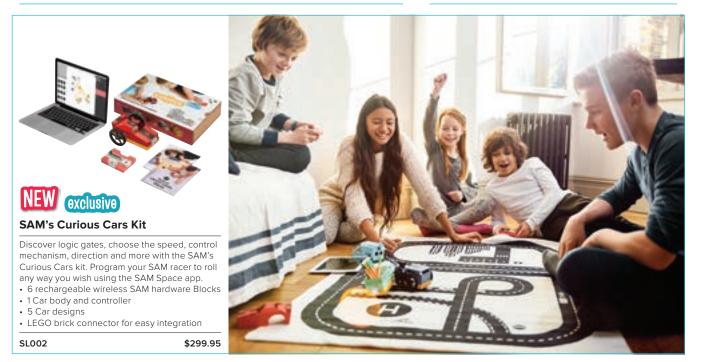

#### Why SAM Labs?

- Bring STEAM into the classroom with endless possibilities, combinations and inventions
- Wireless blocks means no wires, easy building and more freedom to create and invent
- Use the SAM Space app to add custom features to your projects, to control your computer with SAM blocks, or connect to other external platforms
- Get access to a wealth of DIY projects, games, gadgets, tutorials and much more
- LEGO compatible to extend your models

#### Wireless Hardware Blocks

#### **Software Blocks**

SAM Labs consists of wireless blocks with different functions (input such as sliders, buttons, temperature sensors, or output, such as a buzzer, DC Motor, or Servo motor), which are combined with each other and with over 40 software blocks, found in the SAM Space Education app. With the 40+ software blocks, you can customise the behaviour of the hardware blocks - for example change the colour of the light, or create a melody for a buzzer.

STEM

#### SAM's STEAM Kit

The SAM's STEAM kit is the ultimate classroom solution to invent, create and be creative with STEAM, while learning about coding. Included:

- 17 rechargeable wireless SAM hardware blocks with additional accessories
- 40+ SAM software blocks
- SAM Space app tailored for educators
- Easy integration with LEGO®
- Curriculum-based STEAM projects on data capture, programming logic & so much more Hands-on educator support

#### **Design & Play STEAM Kit**

Our craft kits let children create and customise real-working cars, boats and planes for a fun-filled introduction to early STEAM concepts! Ideal for integrating STEM with arts & crafts, each kit includes enough materials for 10 kids to engineer their own vehicle. Children just use the precut pieces to build each one, and customise it with their craft materials (not included). Then put it into action! As students test their creations, they'll explore ways to fine-tune each vehicle until they have a car that races, a boat that sails and a plane that soars! Available in a set of 3 (LS57K), or individually. Each set is supplied with a teacher's guide & the materials needed to create 10 working vehicles.

#### Youtopia - STEAM Diorama

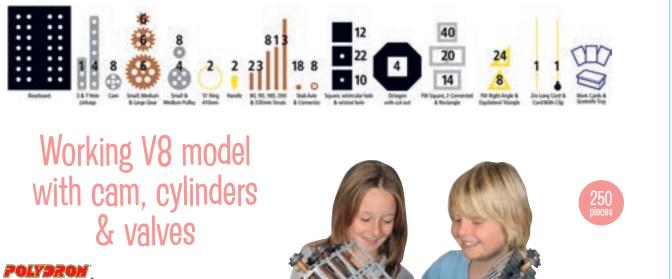

This open-ended kit takes the traditional 3 dimensional features of a diorama and mixes it with mechanics. Science and art come together so you can create a model that moves. The basic body of the diorama is assembled from pre-cut wooden pieces and the background (elevated) and foreground (ground) panels are fixed. A crank handle at the front controls a small front panel that moves vertically and a middle arm and rear arm that move independently in a horizontal arc. Card stock is supplied to be decorated and slotted or glued onto the moving parts and panels can be changed as required to create new scenes. Instructions include helpful hints for decoration and the packaging includes images of completed designs for visualisation. Ages 8+ years

#### Chromatography Paper – 10 x 30cm

Paper chromatography is an analytic method technique to identify and separate mixtures. A liquid mixture travels through the chromatography paper, each compound at a different speed. This makes it possible to identify the compounds in the mixture. Size of paper chromatography sheets is 10cm x 30cm supplied in a quantity of 100 sheets.

Highly visual cards to sort and understand the process involved in raw material sourcing, conversion into products and end of life recycling. Each set includes 13 dry-wipe picture cards that show the step-by-step process. In addition to the 13 picture cards there are two blank cards included in the set for suggestion/discussion before the next correct answer is revealed. A detailed teacher guide with suggested lesson plans and a quick-start guide are provided. Learn about the full cycle of glass, metal, plastic, wood and wool.
