Types of Paint

Washable Tempera Paints

- A temporary paint which comes alive when it gets wet.
- Comes in ready mixed bottles or in powder form. Colours can be blended easily to make a range of desired colours.
- Water-based paint which easily washes from brushes, surfaces & clothing when still wet.

Acrylic Paint

- A fast drying paint that is versatile and generally waterproof once dry.
- The range extends from economical pigments for the classroom to high quality artist pigments for professional use.

Watercolour Paint

- Watercolour paints are water-soluble colours that produce a beautiful translucency.
- The range contains watercolour paints and watercolour discs.

Painting Dyes

- Food and vegetable dyes in both powder and liquid form.
- Available in an assortment of different colours.
- Suitable for brush painting, colouring papier mache and finger painting.

UV Glow & Fluorescent Paint

- UV glow fluorescent paint requires a black light to glow.
- Specialty paint which comes in ready mixed bottles.

Metallic Paints & Inks

- Specialty Paint which comes in ready mixed bottles or paint sticks.
- Adds a shimmer to paintings and crafted items.

Fabric Paints & Inks

- Fabric paint sits on top of fabrics once dry. Fabric inks become one with fabrics.

Special Effects Paint

- A variety of paints including glitter, metallic, pearl, fluorescent, 3D, marbling, blackboard, face & body and glass & porcelain.

Painting Tools & Brushes

- Paint brushes are available in various widths, lengths and bristles for different brush strokes and textured effects.
- The range includes a variety of painting tools including palette knives, stampers, rollers and sponges.

Watercolour/Tempera Paint

Watercolour

Painting with watercolour discs is a convenient, economical and clean way to paint. Ideal for the classroom as it minimises additional equipment. To get the best results use watercolour paper, which is slightly thicker. To prevent paper from wrinkling when it gets wet, use masking tape to stick all edges of the paper to a board or work table.

Printmaking

Screen Printing

Screen printing is one of the early methods of printing. It involves the passing of ink or any other printing medium through a mesh or 'screen' that has been stretched on a frame, to which a stencil has been applied. The stencil openings determine the image that will be imprinted. Screen printing was a technique first used by the Chinese almost 2000 years ago. The Japanese adopted the screen printing process and used woven silk. The use of silk is where screen printing got its alternative name – silk-screening or silk screen printing.

Printmaking

Printmaking

Step 1: Produce the 'block' by simply pressing lines into the soft foam surface. Use a 4B pencil or a ballpoint pen. For larger areas, press into the foam with a popstick, spoon or a similar blunt object.

Step 2: Ink the surface with any kind of water-based printing ink or paint with a foam roller. Carefully lay a sheet of paper over the inked surface and rub all over with a hard roller, the back of a spoon or with the palm of your hand.

Step 3: Peel back the print slowly. Repeat the inking and rubbing for as many prints as you desire. Experiment with different coloured inks and different coloured papers.

Step 4: To wash the block, simply hold under the tap or soak in water. The surface and lines may be carefully cleaned with a soft brush. The block will store easily for future use, when completely dry.

Splatter Paint Print

Step 1: Use a piece of drawing paper (cover the table with newspaper or a mess free cloth).

Step 2: Place an item such as a pressed flower (stencils also work well) on the paper. Dip the bristles of the brush in watercolour or poster paint.

Step 3: Rub the brush over the splatter screen to splatter the paint around the flower, then remove the flower.

The splattered paint will look like confetti outlining your picture. Allow the paint to dry. To create rainbow splatters, use different colours of paints.

Great with stencils and cut outs

Splatter Frames

Drawing Materials

A selection of writing and drawing tools to create a picture or story

Chalk

- Chalk is great to work with, as mistakes can be removed easily.
- Use with chalkboards, black paper or on pavements.
- Use the long side for broad strokes and the top to draw thin lines.

Crayons

- The very first crayons were a mix of charcoal and oil and were always black.
- These days, crayons are made of pigment and wax in a variety of colours.
- Easy to work with, non-toxic, inexpensive and not messy.

Pastels

- Pastels are sticks of pure pigment.
- Hard pastels are able to be shaped and sharpened to achieve more exact lines but are made with less pigment than soft pastels.
- Soft pastels crumble more easily and smudge however they contain more pigment.

Oil Pastels

- Oil pastels look like crayons but are much smoother, brighter and easier to blend.
- The pigments contain non-drying oils and binders that are less powdery than soft pastels.
- They provide a harder edge than "soft" pastels but are more difficult to blend.

Charcoal

- Charcoal sticks are made from kiln-fired willow twigs.
- Charcoal is mostly used in stick or pencil form for sketching and free drawing.
- It is crumbly, smudges easily and can be blended by using fingers or erasers.

Graphite Pencils

- Use a combination of both H and B pencils to create a full range of values.
- H pencils work for the light and middle values, B pencils for middle and dark values.
- 6H is the lightest (hardest), and the 6B is the darkest (softest).

Watercolour Pencils

- Wet the pencil and then draw with it or wet the paper or surface you are working on.
- Always use watercolour paper, regular drawing paper will buckle when it gets wet.
- When using water it will look a few shades lighter than the pencils you are using.

Markers

- These are used to lay down strong areas of colour.
- Great for drawing and colouring in.
- Available in thin, thick, permanent, whiteboard and metallic and available in a large assortment of different colours.

Fabric Markers

- Used for drawing on any type of fabrics or materials.
- Great for use with stencils.
- Less messy than paint and creates cleaner line work.

Pens

- A variety of different styled pens for all drawing and sketching.
- Pens that write on any surface.
- Fine line pens for detailed work.
- Gel pens are thick and stand out on dark surfaces.

Calligraphy

- Decorative handwritten lettering.
- Can use either markers, nibs or brush pens to achieve strokes.
- Use with inks on cartridge paper for best results
- Develop your own unique style.

'A group of malleable substances used to sculpt and build'

Tips to keep your clay from drying out

- Place leftover clay in a large plastic container or bucket that has a lid. Fill the clay bucket with air temperature tap water until all the clay is completely submerged.
- Replace lid firmly or cover opening with thick plastic sheeting and let sit for a week without stirring.
- Check clay after approx. 5 days. Test this by digging your fingers into the clay. If it feels thick but like melted ice cream, it's ready.
- Lift the bucket and drain excess water into the sink.
- Stir clay up until consistently thick before removing from container onto a kneading board.
- Wrap clay tightly in thick plastic or store in plastic container with air tight lid until needed.

Clay

- There are different types of clay: modelling, paper, air dry, oven bake and kiln clay.
- Modelling clay comes in a variety of colours and doesn't dry out.
- Paper clay is very lightweight and easy to mould.
- Air dry clay dries naturally at room temperature.
- Oven bake clay must be put in an oven to harden.
- Kiln clay must be fired at 1100-1200°C in a kiln.
- Clay can also come in natural forms of white earthenware and terracotta.
- Leftover clay should always be stored in an air tight container.

Dough

- A modelling compound used by young children for art and craft projects at home and in school.
- Dough is soft to mould with, and never dries out if stored correctly.
- Available in an assortment of colours, including skin tone shades.
- Cream of tartar allows you to make your own dough! There is a recipe on page 229.
- Use our range of modelling tools to create different shapes and textures in the dough.

Kinetic Sand

- An easy to shape sand that moulds well and has motion.
- 98% pure sand, 2% Polydimethyl siloxane, a silicon-based organic polymer that gives kinetic sand its fluid like movement once pressed by your hand.
- A great sensory activity for children.
- It never dries out therefore continuous play for hours.

Plaster of Paris

- Plaster of Paris is suitable for producing moulded figures from latex or other plastic moulds.
- Mixing is simple – just add water and mix to a creamy consistency.
- Dries naturally at room temperature, then can be painted on.
- Supplied in powder form or plaster rolls for modelling around wire.
- Great for the whole class to work on to create their own unique designs.
