

Construct a Forest

Material

- Cone template
- Green paper
- Paper towel tube or two toilet paper tubes
- Tape or stapler
- Crayons, markers, or other decorations
- Bling Grab Template

(from primotoys.com/resources)

Time

30 minutes

Difficulty

Easy

Instructions

Step 1

Trace your cone template on to a piece of paper. Cut out cone.

Step 2

This will be your tree. Decorate it however you like.

Step 3

Fold into cone shape and attach with tape or stapler.

Step 4

Stack two toilet paper tubes on top of one another. Balance cone on tube. Repeat for as many trees as you like. Alternatively, use scrunched paper for tree tops.

Step 5

Place on map and have Cubetto navigate his way through the forest!

For schools and large groups:

Have each child make his own tree. Then use our Blind Grab Template (find it at primotoys.com/resources), to have each child draw a space from a bag and place on the map. Work as a group to move Cubetto around the map!
