

COVID-19 HYGIENE

→ At KUBO, we have chosen high quality materials for our robot to give both teachers and students the best possible learning experience. To follow the latest guidelines on cleaning and disinfecting surfaces, we have developed the following guidelines to clean your KUBO products safely.

BEFORE

Before cleaning any KUBO elements, be sure to practice hand hygiene and follow your local education department's guidance on cleaning and disinfecting classroom materials.

Use a soft cloth with water and soap, which is wrunged until almost dry, to clean all KUBO elements included in the KUBO product except the cardboard map.

When cleaning the robot, be sure not to wipe any electronic parts such as the charger or pin connector area.

Be sure to wipe away all water with a dry cloth after cleaning.

DURING

During use, a maximum of 2 kids should be in contact with a KUBO product at the same time. The cleaning process should be repeated before the kit is used by other kids.

AFTER

All KUBO elements should be cleaned before and after use.

Disclaimer

DO NOT use disinfection wipes, as it may damage the plastic and break the robot open. DO NOT get water into any of KUBO's electronic parts. Not following the guidelines will void the warranty.
