

Watch a Seed Grow

by Bronwen Wall

In *Watch a Seed Grow*, we learn about the lifecycle of a sycamore tree, but we also learn about other types of seeds. Complete the chart below to compare the differences between a sycamore seed and a coconut seed. The first few examples have been given. Can you think of any more? Use the book to help you.

Coconut seed	Sycamore seed
big and heavy	
travels by water	
floats	
thick outer shell
