

Alphabet Flashcards

There are many different ways you can use your flashcards, but here are just a few great learning activities to try:

- Look at the familiar images with your child and talk about what you can see.
- Help your child to sound out the initial letter of each word whilst pointing to it, making the link between the letter shape and sound.
- As your child becomes more confident use the letters on the reverse of the cards with no images.
- Encourage your child to find the initial letters of the words on the flashcards on the alphabet reference board. As they become more confident, sound out letters and ask your child to find them.
