Bystander

Hi Puzzlers,

Welcome to another deviously puzzling puzzle where almost everything begins with the letter B even though you might not think so.

For example, you will see a BARBECUE and next to it you will see an old-fashioned BARBER'S POLE, both of which begin with a B, and next to them there's a queue of people who are waiting for a haircut. So that is a BARBER QUEUE.

Inside the B, just below the big pink bandage, there is a BRASS BAR and next to it there is a BELL. If you add them together, they become a BARBELL.

Some things also appear more than once, like BANJOS, BEARS, BOATS and BOOKS. I've lost count, but there are at least ten BOOKS.

There is NO competition to find everything that does begin with a B. This is because although I did make a list (attached here), there might actually be some extra secret things that are not on the list. This means that no matter how few or how many things you find, you are a winner. Also, I can't actually remember what some of the words I've drawn mean. If you look closely, you should be able to find the national flag and silhouette of some countries that begin with B.

So just enjoy this puzzle and if you really want to have a competition you can always challenge your friends and relatives.

Good luck and very best wishes,

Colin Thompson
